

2019 ANNUAL REPORT

Inventing Our Future

IF WHAT YOU NEED DOESN'T EXIST, INVENTIT.

TO OUR SHAREHOLDERS

Quad was founded on a simple yet powerful premise: create a better way for our employees, our clients, our shareholders and, ultimately, our world. Our inventive nature has fueled our transformation as a marketing solutions partner with a strong foundation in print. Our unique integrated platform helps clients reduce the complexity of working with multiple agency partners, increase workflow efficiencies, and improve the effectiveness of their overall marketing spend.

In 2019, we continued to accelerate our transformation with the goal of repositioning our company for long-term sustainability and growth. Our transformation strategy, known as Quad 3.0, drove \$225 million of organic net sales growth in 2019, which helped offset more than five percentage points of annual print sales decline. Our principal objective is to completely offset this decline through growth in higher margin marketing services, which also drives incremental print revenue across all our product categories. With our expanded service offerings, we provide clients unmatched scale for on-site services, and expanded subject expertise in marketing strategy, creative solutions, media deployment for all channels, and marketing management services.

We continued to accelerate our transformation in 2019 and early 2020 through:

• Aggressively managing our product portfolio with a focus on long-term value creation and strategic fit. For example, in 2019 we divested our industrial wood-crating business, Transpak, and announced a decision to divest our book business, as we determined these businesses could no longer be leveraged as part of our greater integrated marketing solutions offering. In early 2020, we sold our Omaha, Nebraska, packaging plant, to better focus our future efforts on highervalue packaging solutions that help clients create a cohesive brand experience across all channels.

- Expanding partnerships with clients. Given the pressure on retailers to effectively market to today's consumer and differentiate themselves, our expanded offering creates new opportunities for us to help companies optimize their marketing spend across all media types to improve return on investment. We help retailers identify and implement a high-performing media mix strategy that includes direct mail, catalogs, online, broadcast, out-of-home and in-store programs, as well as traditional retail advertising inserts. Then, with our data analytics expertise, we measure outcomes, so retailers can further tailor campaigns for even greater effectiveness.
- Introducing the power of print to direct-to-consumer (DTC) brands.

Many DTC brands market exclusively in social media channels; however, they are finding that social media alone is not enough to support long-term growth. As online customer acquisition costs increase — and the effectiveness of those efforts decrease — we are helping DTC companies expand into print to build their customer base. They are finding that print can effectively create an engaging experience, drive traffic, and increase frequency of engagement.

2019 PERFORMANCE

While 2019 was a challenging year, we finished with strong momentum, driven by continued execution against our strategic priorities, aggressive cost management, improved manufacturing productivity, and winning new work to offset organic sales decline.

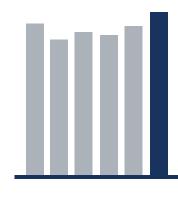

Operationally, the fourth quarter was one of our company's best within the past decade in terms of customer service. We achieved strong quality and on-time delivery performance for our clients in their busiest season. These improvements were driven in large part by our decision to invest an estimated \$40 million in increased hourly production employees' wages. Given this performance, we were able to exceed our fourth quarter financial expectations.

Net sales in 2019 decreased 1.6% to \$3.9 billion. Excluding acquisitions, organic sales declined 3.5%. Organic sales reflected \$225 million of new revenues generated from our Quad 3.0 transformation strategy offset by ongoing print industry volume declines and pricing pressures primarily in our large-scale print category of retail inserts, magazines and directories.

Net loss from continuing operations was \$56 million as compared to net earnings of \$30 million in 2018. Non-GAAP Adjusted EBITDA was \$335 million as compared to \$428 million in 2018. Non-GAAP Adjusted EBITDA margin was 8.5% compared to 10.7% in 2018. These results reflect the impact from the organic sales decline, the impact from strategic investments made to increase hourly production employees' wages, and a decrease in print profits from the reduction in market price for paper byproduct recycling, which was partially offset by cost reduction activities.

Net cash provided by operating activities was \$156 million as compared to \$261 million in 2018, primarily due to lower net earnings and \$61 million in transaction costs associated with a terminated acquisition. Free Cash Flow, excluding the \$61 million in transaction costs, was \$106 million as compared to \$164 million in 2018, primarily due to lower net earnings and increased capital expenditures on long-term investments in automation and productivity improvements in the manufacturing platform.

We closed 2019 with a Debt Leverage Ratio of 3.12x. This is above our long-term target leverage range of 2.0x to 2.5x due to the timing of compelling strategic investments, including the 2019 Periscope acquisition.

OPERATIONALLY

the 4th quarter was one of our company's best quarters within the past decade in terms of customer service performance.

Quad's higher-margin marketing services, which also drives more incremental print revenue across all our product categories, have grown over the past three years and now represent 21% of net sales versus 15% in 2017.

2020 FINANCIAL OBJECTIVES

As we continue to transform our company and our future, we remain focused on the following financial objectives to make Quad a compelling long-term investment:

- Generate significant Free Cash Flow to support our disciplined capital deployment strategy, and respond effectively to the rapidly evolving coronavirus (COVID-19) situation and its ramifications for the global economy.
- Drive earnings and increase margins through organic net sales growth related to our transformation strategy, as well as through effective cost management and productivity improvements.
- Strengthen the balance sheet through ongoing debt reduction, with a continued focus on being within our targeted debt leverage range of 2.0x to 2.5x.

We will continue to closely monitor the COVID-19 pandemic and its impacts on our clients and the worldwide economy, and will adjust our priorities to support our financial objectives.

INVENTING THE FUTURE

Since our founding in 1971, Quad has drawn on our strong values and unique company culture to create a better way, every day, for all our stakeholders. Our ingenuity has led us to evolve our offering at a critical time of media disruption and worldwide economic uncertainty amidst the COVID-19 situation to deliver more value for our clients as a marketing solutions partner. I am proud of our ability to transform, which is fueled by our employees who approach their jobs with the ownership mentality of being empowered to create a better way. In this way, we are inventing the future.

Sincerely,

J. Joel Quadracci Chairman, President & Chief Executive Officer

FINANCIALS

At a glance

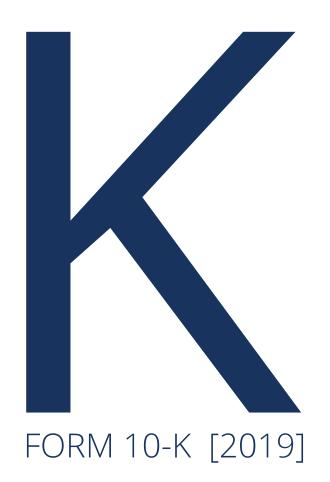

FINANCIAL HIGHLIGHTS ⁽¹⁾ (in millions, except per share and ratio data)	2019	2018
Net Sales	\$ 3,923	\$ 3,986
Net Earnings (Loss) From Continuing Operations	\$ (56)	\$ 30
Adjusted EBITDA ⁽²⁾	\$ 335	\$ 428
Adjusted EBITDA Margin ⁽²⁾	8.5%	10.7%
Cash Flow From Operations	\$ 156	\$ 261
Free Cash Flow ⁽²⁾	\$ 106	\$ 164
Debt Leverage Ratio – Net of Excess Cash (2)	3.12x	2.05x
Dividends Declared Per Share	\$ 1.05	\$ 1.20

⁽¹⁾ During 2019, the Company made the decision to sell its United States Book business as part of an ongoing process to review its business portfolio and divest assets non core to the Company's transformation strategy. These financial highlights are being reported to reflect the Company's Book business as discontinued operations for all periods presented in accordance with United States generally accepted accounting principles (GAAP), with the exception of cash flow related financial metrics which have not been adjusted to separately disclose cash flows related to discontinued operations.

(2) Adjusted EBITDA, Adjusted EBITDA Margin, Free Cash Flow and Debt Leverage Ratio – Net of Excess Cash are financial measures not prepared in accordance with GAAP in the United States of America. The Company believes that these Non-GAAP measures, when presented in conjunction with comparable GAAP measures, provide additional information for evaluating Quad's performance and are important measures by which Quad's management assesses the profitability and liquidity of its business. These Non-GAAP measures should be considered in addition to, not as a substitute for or superior to, net earnings (loss) as a measure of operating performance or to cash flows provided by operating activities as a measure of liquidity. These Non-GAAP measures may be different than Non-GAAP financial measures used by other companies. Adjusted EBITDA is defined as net earnings (loss) attributable to Quad common shareholders excluding interest expense, income tax expense (benefit), depreciation and amortization, restructuring, impairment and transaction-related charges, earnings (loss) from discontinued operations, net of tax, net pension income, employee stock ownership plan contribution, (gain) loss on debt extinguishment, equity in (earnings) loss of unconsolidated entity, the Adjusted EBITDA for unconsolidated equity method investments (calculated in a consistent manner with the calculation for Quad) and net earnings (loss) attributable to non-controlling interests. Adjusted EBITDA Margin is defined as Adjusted EBITDA divided by net sales. Free Cash Flow is defined as net cash provided by operating activities less purchases of property, plant and equipment, plus LSC-related payments, which includes payments for transaction-related costs associated with the now terminated acquisition of LSC Communications, Inc. and the incremental interest payments associated with the 2019 amended debt refinancing. Debt Leverage Ratio is defined as total debt and capital lease obligations divided by the last twelve months of Adjusted EBITDA. The Company typically has cash balances of approximately \$10 million and the Debt Leverage Ratio — Net of Excess Cash assumes that any cash balance over \$10 million is used to further pay down debt. A reconciliation of these non-GAAP financial measures to GAAP financial measures can be found in our press release dated February 18, 2020, disclosing our financial results for 2019, and which is also an exhibit to our Form 8-K furnished to the Securities and Exchange Commission on February 18, 2020.

Please note: Forward-looking statements in this letter and Annual Report 10-K are subject to safe-harbor provisions as explained on page 1 of the Annual Report on Form 10-K.

Forward-Looking Statements

To the extent any statements in this Annual Report on Form 10-K contain information that is not historical, these statements are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements relate to, among other things, the objectives, goals, strategies, beliefs, intentions, plans, estimates, prospects, projections and outlook of Quad/Graphics, Inc. (the "Company" or "Quad"), and can generally be identified by the use of words such as "may," "will," "expect," "intend," "estimate," "anticipate," "plan," "foresee," "believe" or "continue" or the negatives of these terms, variations on them and other similar expressions. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements.

These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond the control of the Company. These risks, uncertainties and other factors could cause actual results to differ materially from those expressed or implied by those forward-looking statements. Among risks, uncertainties and other factors that may impact Quad are those described in Part I, Item 1A, "Risk Factors," of this Annual Report on Form 10-K, as such may be amended or supplemented in Part II, Item 1A, "Risk Factors," of the Company's subsequently filed Quarterly Reports on Form 10-Q, and the following:

- The impact of decreasing demand for printed materials and significant overcapacity in a highly competitive environment creates downward pricing pressures and potential under-utilization of assets;
- The impact of digital media and similar technological changes, including digital substitution by consumers;
- The impact of fluctuations in costs (including labor and labor-related costs, energy costs, freight rates and raw materials) and the impact of fluctuations in the availability of raw materials;
- The inability of the Company to reduce costs and improve operating efficiency rapidly enough to meet market conditions;
- The impact of increased business complexity as a result of the Company's transformation to a marketing solutions partner;
- The failure to successfully identify, manage, complete and integrate acquisitions, investment opportunities or other significant transactions, as well as the successful identification and execution of strategic divestitures;
- The failure of clients to perform under contracts or to renew contracts with clients on favorable terms or at all;
- The impact of changing future economic conditions;
- The fragility and decline in overall distribution channels, including newspaper distribution channels;
- The impact of changes in postal rates, service levels or regulations;
- The impact of the various restrictive covenants in the Company's debt facilities on the Company's ability to operate its business;
- The failure to attract and retain qualified talent across the enterprise;
- The impact of regulatory matters and legislative developments or changes in laws, including changes in cyber-security, privacy and environmental laws;

- Significant capital expenditures may be needed to maintain the Company's platforms and processes and to remain technologically and economically competitive;
- The impact of risks associated with the operations outside of the United States ("U.S."), including costs incurred or reputational damage suffered due to improper conduct of its employees, contractors or agents;
- The impact of an other than temporary decline in operating results and enterprise value that could lead to non-cash impairment charges due to the impairment of property, plant and equipment and other intangible assets; and
- The impact on the holders of Quad's class A common stock of a limited active market for such shares and the inability to independently elect directors or control decisions due to the voting power of the class B common stock.

Quad cautions that the foregoing list of risks, uncertainties and other factors is not exhaustive and you should carefully consider the other factors detailed from time to time in Quad's filings with the United States Securities and Exchange Commission ("SEC") and other uncertainties and potential events when reviewing the Company's forward-looking statements.

Because forward-looking statements are subject to assumptions and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. You are cautioned not to place undue reliance on such statements, which speak only as of the date of this Annual Report on Form 10-K. Except to the extent required by the federal securities laws, Quad undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

<u>PART I</u>

Item 1. Business

Overview

Quad is a worldwide marketing solutions partner dedicated to creating a better way for its clients through a data-driven, integrated marketing platform that helps reduce complexity, increase efficiency and enhance marketing spend effectiveness. Quad provides its clients with unmatched scale for on-site services and expanded subject expertise in marketing strategy, creative solutions, media deployment (which includes a strong foundation in print) and marketing management services. With a client-centric approach, that drives its expanded offering, combined with leading-edge technology and single-source simplicity, the Company believes it has the resources and knowledge to help a wide variety of clients in multiple vertical industries, including retail, financial/insurance, healthcare, consumer packaged goods, publishing and direct-to-consumer.

Quad was founded in Pewaukee, Wisconsin, as a Wisconsin corporation, in 1971 by the late Harry V. Quadracci. As of January 31, 2020, the Quadracci family, through the Quad/Graphics, Inc. Amended and Restated Voting Trust Agreement ("Quad Voting Trust"), has voting control of approximately 71%, which the Company believes provides it with continued stability and flexibility as Quad works to achieve its long-term strategic vision. As of December 31, 2019, the Company had approximately 19,600 full-time equivalent employees in North America, South America, Europe and Asia, and served a diverse base of approximately 5,600 clients. Quad locations span 14 countries, including 56 manufacturing and distribution facilities and more than 75 client-based on-site locations, with additional investments in printing operations in Brazil and India.

During Quad's first 40 years, the Company grew rapidly through greenfield growth, built a premier manufacturing and distribution platform equipped with the latest technology, established its reputation as one of the printing industry's foremost innovators and created a Company culture based on strong values that remains in place today.

Beginning in 2010, Quad began its transformative journey, which has expanded its offerings to create enhanced value for its clients. Quad saw an opportunity to participate in industry consolidation in response to economic and industry pressures following the great recession of 2008 and 2009, which severely impacted print volumes and accelerated the impact of media disruption. Through a series of disciplined consolidating acquisitions that included World Color Press, Inc. ("World Color Press"), Vertis Holdings Inc. and Brown Printing Company, the Company added experienced talent and was able to enhance and expand its product and service offerings, while removing inefficient and underutilized capacity, reducing costs and transitioning work to more efficient facilities. This period of consolidation created the advanced, highly automated and efficient manufacturing and distribution platform the Company has today.

The Company believes it will continue to drive productivity improvements into the future through an engaged workforce and ongoing adoption of the latest manufacturing automation and technology. Through this strategy, the Company believes it can maintain the strongest, most efficient print manufacturing platform and remain the high-quality, low-cost producer. This strategy also allows Quad to generate the earnings and cash flow necessary to support future value-creating opportunities.

More recently, significant media disruption created the opportunity for Quad to create greater value for its clients by extending its offering beyond print and content execution to include an integrated stack of marketing services. Today, the Company leverages its data-driven print expertise as part of an integrated marketing platform that helps its clients not only plan and produce marketing programs, but also deploy, manage and measure them across all traditional and digital channels. In February 2019, the Company evolved its brand from Quad/Graphics to Quad to reflect the role it now plays with clients as a marketing solutions partner.

More information regarding Quad is available on the Company's website at <u>QUAD.com</u>. Quad is not including the information contained on or available through its website as part of, or incorporating such information by reference into, this Annual Report on Form 10-K. The Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports are made available to the public at no charge through a link appearing on the Investor Relations section of the Company's website. Quad provides access to such materials through its website as soon as reasonably practicable after electronically filing such material with, or furnishing it to, the SEC.

Industry and Competition

According to a November 2019 Dun & Bradstreet First Research report, the U.S. advertising services industry is forecast to grow at an annual compounded rate of 4% between 2019 and 2023, as compared to the printing industry which is in secular decline. This opportunity supports Quad's transformation as a marketing solutions partner.

The advertising and marketing services industry is highly fragmented. According to the November 2019 Dun & Bradstreet First Research report, the top 50 companies in the U.S. advertising and marketing services industry generate approximately 40% of industry revenue. Services in this industry include advertising for print, broadcast and online media (about 25% of industry sales); public relations (12%); and direct marketing (10%). Other services include display advertising, media buying (reselling advertising time or space), and media representation (selling advertising time or space on behalf of media outlet owners). The U.S. advertising and marketing services industry includes about 38,000 establishments (single-location companies and units of multi-location companies), with combined annual revenue of about \$105 billion.

The commercial print industry is also highly fragmented. According to the August 2019 *Printing in the U.S.* IBISWorld industry report, the United States commercial printing industry, in the aggregate, generates an estimated \$77 billion in annual revenue, employs over 420,000 people and is comprised of approximately 46,000 companies. The report also states that no printing company accounts for more than 5% of total commercial print industry annual revenue in the United States.

In addition to being highly fragmented, competition in the printing industry remains intense, and the Company believes that there are indicators of heightened competitive pressures. The industry has excess manufacturing capacity created by continued declines in industry volumes which, in turn, have created accelerated downward pricing pressures. The Company faces competition due to the increased accessibility and quality of digital alternatives to traditional delivery of printed documents through the online distribution and hosting of media content, and the digital distribution of documents and data. The Company faces competition from print management and marketing consulting firms that look to streamline processes and reduce the overall print spend of the Company's clients.

The commercial print industry has moved toward a demand for shorter print runs, faster product turnaround and increased production efficiency of products with lower page counts and increased complexity. This, combined with increases in postage expenses and the increased use of digital marketing and communication channels, has led to excess manufacturing capacity in the print industry. This excess capacity has allowed certain larger printers, like Quad, with economies of scale, strong balance sheets and access to capital markets, the ability to invest in automation and more efficient equipment, take advantage of consolidating acquisition opportunities to remove excess, inefficient and/or underutilized capacity, and reduce overall costs.

Competition in both the advertising and marketing services and print industries is affected by real gross domestic product growth, as economic activity and advertising spending are key drivers of consumer demand. In times of economic prosperity, advertisers may increase spending to build brand awareness and to drive sales. Conversely, in times of global economic uncertainty and budget pressures, advertisers may reduce spending or shift their spending to other forms of media. For print specifically, magazine publishers that face diminished advertising pages reduce total page counts and frequency; catalog marketers reduce page counts, circulation and frequency of print campaigns; retailers curb investments in store inventory and cut back on retail insert newspaper circulation and advertising; and other advertisers reduce their direct mail volume, particularly in the banking, insurance, credit card, real estate and nonprofit industries. It is possible that these customers instead decide to move advertising spend to digital alternatives. Marketing services providers face pressure to satisfy major clients' needs, as the win or loss of a major client account can impact revenue significantly. Another challenge facing marketing service providers relates to public concern and general annoyance with advertising methods. For example, data collection of personal information for marketing purposes is an issue under scrutiny from federal legislation, and marketing service providers are facing future restrictions on certain types of data they collect. In Europe, the European Union enforces data protection through the General Data Protection Regulations.

The Company faces competition in the advertising and marketing services industry based on access to a skilled workforce, pricing, adapting quickly to new technology, creating unique and effective campaigns and offering superior customer service. Across Quad's range of printed products, competition is based on total price of printing, materials and distribution; quality; distribution capabilities; customer service; access to a highly skilled workforce; availability to schedule work on appropriate equipment; on-time production and delivery; and state-of-the-art technology to meet a client's business objectives, including the ability to adopt new technology quickly.

As consumer media consumption habits change, marketing services providers face increased demand to offer end-to-end marketing services, from strategy and creative through execution, across all channels, traditional and digital. As new marketing and advertising channels emerge, marketing services providers must expand their services beyond traditional channels, such as for television, newspapers, print publications and radio, to digital channels, such as mobile, internet search, internet display and video, to create effective multichannel campaigns for their clients.

Quad believes that business users of print and print-related services are focused on generating and tracking the highest returns on their marketing spend. Quad believes it is well positioned to help clients achieve greater process efficiencies and marketing spend effectiveness through data-driven integrated marketing solutions. The Company believes that its clients receive the greatest return on their marketing spend when they start with a strong marketing strategy that uses print in combination with other media channels, informed by customer data, to create targeted and relevant multichannel marketing campaigns.

Seasonality

Quad is subject to seasonality in its quarterly results as net sales and operating income are higher in the third and fourth quarters of the calendar year as compared to the first and second quarters. The fourth quarter is typically the highest seasonal quarter for cash flows from operating activities and Free Cash Flow due to the reduction of working capital requirements that reach peak levels during the third quarter. Seasonality is driven by increased magazine advertising page counts, retail inserts, catalogs and books primarily due to back-to-school and holiday-related advertising and promotions. The Company expects this seasonality impact to continue in future years.

Strategy

Quad believes employee pride, combined with a relentless quest to create a better way, builds the opportunity to invent the future as a preferred marketing solutions partner, helping its clients win every day. To accomplish this vision, Quad remains focused on its consistent strategic priorities as follows:

Walk in the Shoes of Clients

The Company encourages all employees, regardless of job title, to walk in the shoes of clients by putting a priority on listening to clients' needs and challenges, doing what they can to make it easy to work with Quad, and making the client experience enjoyable at every touchpoint. As part of its transformation, the Company has focused on evolving client print-production conversations to conversations encompassing consultative, enterprise-wide solutions that solve marketing and process challenges, and create more value for clients. To accomplish this, a key component of Quad's client-facing strategy is to strengthen relationships at higher levels within a client's organization so the Company can better understand, anticipate and satisfy the organization's needs. Quad seeks to become an invaluable strategic marketing partner for its clients, helping them successfully navigate today's constantly evolving media landscape through innovative data-driven solutions, produced and deployed across multiple media channels. The Company also believes its proactive thought leadership in the key issues facing its clients, including data-driven marketing and postal reform, will foster loyalty to the Quad brand.

Grow the Business Profitably

This strategy centers on Quad's ability to grow its business at a time when significant media disruption and print industry headwinds continue. Key components of this strategy are as follows:

- *Transformation as a marketing solutions partner*, with an integrated marketing platform that the Company believes creates more value than the traditional agency approach that operates in silos and is focused on profit by individual media channel. The Company calls this transformation Quad 3.0. Quad's unique integrated marketing platform removes the complexity Quad's clients face when working with multiple agency partners and vendors, eliminating multiple handoffs that compromise both the strategy of programs as well as the speed at which they are executed. In addition, the Company believes its platform increases client efficiencies through workflow re-engineering, content production and process optimization; and improves their clients' overall marketing spend effectiveness across all channels through data-driven consumer insights, media planning, and creative and campaign strategy.
- **Organic growth**, in which the Company leverages knowledge from existing client relationships in key growth vertical industries to develop complementary products and services that help brand owners market more efficiently and effectively across media channels. Quad is also focused on ensuring it has the right talent in the right positions to facilitate strategic marketing conversations with its clients that lead to a better understanding of their needs, developing tailored solutions and growing market share.
- **Disciplined investments,** that take many different forms. For example, the Company intends to continue to pursue acquisitions that help accelerate Quad 3.0 as well as value-driven industry consolidating acquisitions that meet its disciplined acquisition criteria. In addition, the Company intends to continue making the long-term investments in its talent, such as hiring marketing talent, that will accelerate its transformation as a marketing solutions partner, as well as investments to increase productivity, such as through increased hourly production employees' wages.

Strengthen the Core

Quad uses a disciplined return on capital framework and historically has made significant investments in its print manufacturing platform and data management capabilities that have resulted in what it believes is the most integrated, automated, efficient, innovative and modern manufacturing platform and distribution network in the printing industry. The Company's continued focus to strengthen its core manufacturing platform through investments that streamline, automate and improve efficiencies and throughput, while reducing labor costs, promotes sustainable cash flow and continued value creation. Further, Quad's disciplined culture of holistic Continuous Improvement and commitment to Lean Manufacturing methodologies is a high priority throughout the Company and supports its goal of strengthening the production and distribution functions for core product lines so that Quad can remain the printing industry's high-quality, low-cost producer. Quad also strengthens its core print offering through continually enhancing its product portfolio, especially in the direct marketing and packaging space, with innovations that support clients' ability to stand out in the mailbox or on the store shelf.

Empower Employees

Quad's strategy to empower employees throughout their career journey builds on key aspects of the Company's distinct corporate culture, which the Company uses to fuel Quad 3.0. These aspects include strong and lasting Company values and an organization-wide entrepreneurial spirit and opportunity-seeking mentality. Employees are encouraged to take pride and ownership in their work, take advantage of continuous learning programs to advance in their careers and improve leadership skills, share knowledge by mentoring others and innovate solutions to drive performance. With the encouragement to do things differently, to be something greater and to create a better way, the Company believes its employees are more fully engaged in producing better results for clients and advancing the Company's strategic goals, while supporting community activities, initiatives and organizations that impact the quality of life near Quad's facilities and where employees work on site at client locations. As Quad continues to expand its integrated marketing platform, the Company believes this creates possibilities for each employee that are advantageously distinct from other employees.

Enhance Financial Strength and Create Shareholder Value

Quad follows a disciplined approach to maintaining and enhancing financial strength to create shareholder value, which is essential given ongoing media disruption and printing industry challenges. This strategy is centered on the Company's ability to maximize net earnings, Free Cash Flow and operating margins; maintain consistent financial policies to ensure a strong balance sheet, liquidity level and access to capital; and retain the financial flexibility needed to strategically allocate and deploy capital as circumstances change. The priorities for capital allocation and deployment are adjusted based on prevailing circumstances and what the Company thinks is best for shareholder value creation at any particular point in time. Those priorities currently include the following: (1) deleveraging the Company's balance sheet through debt and pension liability reductions; (2) making compelling investments that drive profitable organic growth and productivity in the Company's print manufacturing and distribution operations, as well as expansion into higher-growth marketing services that help accelerate Quad 3.0, and pursuing value-driven industry consolidation; and (3) returning capital to shareholders through dividends and share repurchases.

To provide ongoing improvement in manufacturing productivity, the Company applies holistic Continuous Improvement and Lean Manufacturing methodologies to simplify and streamline processes and to ultimately maximize operating margins. These same methodologies are applied to its selling, general and administrative functions to create a truly Lean Enterprise. The Company has been working diligently to lower its cost structure by consolidating its manufacturing platform into its most efficient facilities, as well as realizing purchasing, mailing and logistics efficiencies by centralizing and consolidating print manufacturing volumes and eliminating redundancies in its administrative and corporate operations. Quad believes that its focused efforts to be the high-quality, low-cost producer generates increased Free Cash Flow and allows the Company to maintain a strong balance sheet through debt and pension liability reduction. The Company's disciplined financial approach also allows it to maintain sufficient liquidity and to reduce refinancing risk, with the nearest significant debt maturity not occurring until May 2022.

Competitive Advantages

Quad's strategic priorities are powered by three key competitive advantages that the Company believes distinguishes itself from its competitors: a commitment to ongoing innovation, a commitment to platform excellence, and a commitment to its people and lasting culture.

Commitment to Ongoing Innovation

At the forefront of innovation for more than 48 years, Quad believes its commitment to ongoing innovation drives its purpose to create a better way. To accomplish this, Quad takes a disciplined approach to expanding its existing offerings, developing new offerings and delivering solutions dedicated to solving client marketing and process challenges. Quad's platform, in and of itself, is innovative, representing a non-siloed approach to marketing solutions that includes execution through digital and traditional print channels as well as vertically integrated print and non-print capabilities - an important point of differentiation from traditional printers and large agency holding companies.

Quad prides itself on strategically investing in and developing the talent (i.e., expertise), tools, technology and businesses that either fortify or fill gaps in its existing offerings to increase revenue or reduce costs as follows:

Marketing

To drive innovation in key strategic marketing functions, Quad continues to hire business professionals with client-side marketing experience to help advance conversations with clients to be more consultative and solutions-based. Quad has created an enterprise sales team that is focused on understanding client pain points, especially through expanded relationships with higher-level executives, including Chief Executive Officers and Chief Marketing Officers, to sell solutions that incorporate a broad range of products and services.

Another way the Company drives innovation is through acquisitions that quickly scale service offerings within its integrated marketing platform, provided they meet Quad's disciplined acquisition criteria. For example, on February 21, 2018, the Company acquired Ivie & Associates, LLC ("Ivie"), a premier marketing services provider specializing in customized marketing and business process outsourcing, to provide clients with unmatched scale for on-site marketing services, integrated execution, and expanded subject matter expertise in digital, media and creative. On January 3, 2019, the Company acquired Periscope, Inc. ("Periscope"), one of the nation's top five independent creative agencies by annual revenue, offering world-class capabilities in strategy, including media buying and analytics, creative and account management, as well as packaging design and premedia services. The acquisition supports and accelerates Quad's transformation strategy, creating a highly efficient global platform for creating marketing campaigns and programs—from strategy and creative through execution—across all media channels.

Quad also fosters innovation by partnering with companies whose expertise helps fill a specific gap or amplify an existing offering. For example, to strengthen its integrated marketing platform, Quad established a partnership with Rise Interactive Media & Analytics, LLC ("Rise"), a digital marketing agency specializing in media, analytics and customer experience, and owns a controlling interest. The partnership brings together Quad's expertise in optimizing a client's marketing spend in traditional channels with Rise's expertise in digital channels. The Company believes this creates more integrated, multichannel campaigns and, ultimately, advances data-driven marketing through the delivery of highly relevant, consistent messages, at scale, to consumers.

The Company uses a variety of approaches to drive innovation in marketing solutions, including dedicated Product Development & Innovation ("PDI") and Client Technology ("CT") teams, both of which are focused on understanding and alleviating client pain points. The PDI team aggregates ideas for enhancing Quad's marketing solutions portfolio according to a disciplined process that includes assessing client interest and need, development time and resources, and revenue-generating potential. Ideas selected for development are tested and refined with the help of clients before launching to the marketplace. The CT team is focused on helping clients connect strategy, data and analytics consistently and intelligently across all media channels. Given the myriad of marketing technology (aka MarTech) solutions available in the marketplace today, the CT team consults with clients to both optimize and configure industry-leading platforms, and develop solutions to address market voids. In this way, the CT team acts as the

consultant, architect and back-end executor all in one. The team's solutions enable clients to better understand and connect with their customers and create assets smarter and faster, among other benefits. The Company is proud to have more than 50,000 individual users of its CT solutions at hundreds of clients.

As part of its marketing solutions thought leadership, Quad conducts annual quantitative research called *Customer Focus*®TM. This extensive survey, conducted by a third party, provides consumer insights on singular and integrated media usage. The survey reveals the unique characteristics of special demographic, generational, gender and socio-economic groups and how they consume advertising and marketing messaging, and their attitudes and engagement preferences in several industry segments. According to survey data, print remains a strong driver across generations. This active response to print has influenced magazine publishers to increase usage of custom product covers to enhance reader engagement and retailers who primarily use digital channels, such as online-only retailers, to incorporate print into their marketing strategy. Further, Quad can combine the insights from *Customer Focus*®TM and use its proprietary segmentation tool, called Accelerated Insights®, to leverage client data and create a virtual testing platform through which its clients are able to rapidly test direct mail creative and formats without a physical mailing, saving significant time and money. The ability to generate content that is relevant to the consumer is one way the Company believes it can help its clients influence consumer behavior, lift response and enhance return on investment.

Manufacturing and Distribution

The Company also remains committed to ongoing innovation throughout its print manufacturing and distribution processes to better serve its clients and remain the industry's high-quality, low-cost producer. Over the last five years, Quad has invested an average of 2.5% of its annual net sales for capital expenditures in its core print manufacturing and distribution platform. This investment has resulted in what the Company believes is the most advanced and efficient print manufacturing and distribution platform in the industry and has allowed the Company to reduce the amount invested in recent years without impacting its leading technological excellence.

To improve internal processes, enhance client service levels and further drive efficiencies, the Company has consistently focused on the rapid adoption of technological innovations. In its early years, the Company integrated its imaging, manufacturing and distribution networks into a single platform using a networked information technology infrastructure. This platform, connected via Quad's own *Smartools*® proprietary enterprise resource planning system, provides seamless, real-time information flow across sales and estimating, production planning, scheduling, manufacturing, warehousing, logistics, invoicing, reporting and customer service. The Company has extended its spirit of innovation through Continuous Improvement and Lean Manufacturing methodologies, and business process management tools that further simplify and improve existing internal workflows. This includes pricing, job specifications and client acceptance to streamlining and automating the handoffs between departments throughout the entire order workflow through invoicing. Quad also has applied robotic process automation to streamline data processing and report generation. This allows employees to focus on value-adding tasks, while the robotic process completes the transactional, repetitive functions. Where appropriate, Quad also leverages artificial intelligence in areas such as labor management, scheduling and predictive machine maintenance.

Vertically Integrated Capabilities

A commitment to innovation and creating a better way to do business has also helped to expand Quad's vertically-integrated print and non-print capabilities. Through ongoing innovation in prepress/premedia services, paper procurement and ink manufacturing (through Quad's Chemical Research\Technology subsidiary), the Company maintains a competitive advantage in delivering lower costs and enhanced customer service for its clients while providing the Company with substantial control over critical links in the overall print supply chain to help control the quality, cost and availability of key inputs in the printing process.

The Company created a health and wellness subsidiary, QuadMed, LLC ("QuadMed"), in 1990 to address its own employees' needs for quality, cost-effective healthcare. Today, QuadMed also provides employer-sponsored healthcare solutions on a national level to employers of all sizes, including private and public sector companies. These solutions include, but are not limited to, on-site and near-site healthcare clinics, occupational health services, telemedicine, and health and wellness programs.

Commitment to Platform Excellence

Platform excellence pertains to Quad's Manufacturing, Mailing and Distribution, and Marketing platforms, all of which are integrated to provide a single, cohesive platform.

Manufacturing Platform

Quad continues to invest in equipment and leading-edge technology to ensure its manufacturing platform remains the strongest and most sustainable in the printing industry and that it continues to support a vast range of traditional and digital print solutions, finishing techniques and distribution capabilities to create value for its clients. At the same time, the Company has continued to strengthen its platform by removing excess and/or under-utilized capacity, and by consolidating work into facilities where it can achieve the greatest manufacturing and distribution efficiencies. Over the past nine years, the Company has closed 45 manufacturing plants to reduce under-utilized production capacity. This commitment to consolidating work into fewer facilities to maximize capacity is one key way Quad maintains platform excellence and remains the industry's high-quality, low-cost producer.

The Company has continuously invested in its print manufacturing platform through state-of-the-art equipment and automation that reduces labor costs, maximizes labor productivity and increases throughput. Within the last five years, these investments have included multiple wide-web offset presses and digital presses; more than 50 automated guided vehicles or computer-controlled robotic forklifts; and more than 60 automated palletizers, which automatically configure bundles of finished magazines and catalogs on pallets at the end of a binding line.

The Company's investment in its manufacturing platform has consistently been based on evaluating the economic useful life of the underlying equipment rather than focusing on the potential mechanical life of the equipment. This discipline is critical in an industry in which technological change can create obsolescence well before the end of the mechanical life of equipment. To remain the industry's high-quality, low-cost producer, Quad makes a concerted effort to treat all costs as variable and maintains a stringent focus on achieving productivity improvements and sustainable cost reductions through a variety of holistic Continuous Improvement and Lean Enterprise programs in both manufacturing and administrative areas.

Another key aspect of the Company's modern manufacturing platform is the operation of very large facilities (greater than one million square feet) that produce multiple different product lines under one roof to maximize utilization of equipment and labor resources. In addition, the Company believes these very large facilities drive savings in certain product lines (such as publications and catalogs) due to economies of scale and from ongoing investments in automation and technology. These facilities are part of an "always-on" global production platform that capitalizes on the talent and production resources in North America, South America, Europe and Asia to provide clients with around-the-clock service or in a desired geography.

The Company continues to transform its manufacturing platform through ongoing investments in digital press technology to give marketers and publishers a full range of options to produce and deliver more relevant direct mail, packaging and other commercial products faster and more cost-effectively versus conventional web offset press technology. For example, in the Company's high-end folding carton packaging business, recent investments in digital press technology have enabled Quad to cost-competitively accommodate shorter runs with quicker turns, and enter markets in which it previously was not as competitive, such as private label packaging. In the Company's direct mail business, ongoing investments in digital press technology (along with innovative front-end toolsets and data workflows, and industry-best, back-end logistics and postal optimization) have enabled Quad to better serve the needs of today's leading marketers through advanced personalization and targeting capabilities. Using Quad's technology-enabled direct mail platform, clients are able to reach the right recipients with a relevant message at the right time which, in turn, helps them increase consumer response rates, maximize their return on print spending and reduce overall costs. Built over many years, Quad's data-driven, one-to-one direct marketing platform includes in-house capabilities to analyze mailing list data, demographic data, consumer transaction data and other consumer-specific data to help its clients create targeted and personalized printed materials.

Mailing and Distribution Platform

Quad is also able to leverage the volume of products running through its printing plants for further client distribution savings by coordinating and consolidating shipments, and then by routing them directly to thousands of local newspapers, United States Postal Service ("USPS") processing facilities or other distribution facilities. In addition, each major United States metropolitan area is within one day's drive of at least one of the Company's strategically located facilities, providing its clients the flexibility to print closest to their end consumers.

Postal rates are a significant component of many clients' cost structures, and Quad believes that postal costs influence the number of pieces that its clients print and mail. Therefore, the Company has invested significantly in its mailing and distribution platform to mitigate increasing postage costs, and to help clients successfully navigate the everchanging postal environment. The Company performs an analysis of mail list data as part of its logistics services, which allows it to reduce client freight costs for shipments to newsstands and postal centers, while providing a high level of dependability and rapid response times that are crucial to the delivery of time-sensitive materials. Further, the Company manages mail distribution of most of its clients' products to maximize efficiency and reduce these costs. One of Quad's postal optimization programs is co-mailing, which involves the sorting and bundling of multiple printed products to be mailed to consumers, in order to facilitate better integration with the USPS. In return, the USPS offers significant work-sharing discounts for this sorting, bundling and drop-shipping. Quad's co-mail program is the largest in the print industry (based on information published or otherwise made available from competitors). In 2019, Quad co-mailed approximately 3.7 billion publications, catalogs and direct marketing pieces. Due to the continuously increasing costs of utilizing the USPS and to help control costs for its clients, Quad continues to expand its alternate delivery service for clients that altogether bypasses the USPS to deliver products to consumers' doorsteps.

Marketing Platform

The Company's commitment to platform excellence extends to integrated marketing solutions, which are provided at Quad facilities as well as at client on-site or near-site locations. For clients who engage the Company's on-site marketing solutions model, Quad employees serve as a natural extension of a client's internal marketing department and fulfill traditional agency executional roles while also providing production efficiencies at scale for content creation, creative production and marketing execution. The Company believes this model increases process efficiencies and enables clients to focus on what they do best: sell more products, services and content. Quad now has more than 500 professionals embedded at more than 75 on-site locations, including retail and publishing.

Commitment to People and Lasting Culture

Quad believes that its employees do not just make a difference—they *are* the difference. The Company believes this is a key competitive advantage that is not easily replicated by its competitors given its long-standing culture.

Quad believes that its distinct corporate culture, which evolved from a core set of values conceived by the late founder Harry V. Quadracci, drives thoughtful decision-making, especially with regard to its disciplined approach to managing operations, creating solutions that redefine print in a multichannel media marketplace, and better positioning the Company to prevail in the dynamic and competitive printing industry. The Company fosters an entrepreneurial environment by inspiring and empowering employees to own projects and enact solutions that advance the Company's goals. Employees in the United States also may have a beneficial ownership interest in Quad through Company stock held in the Quad/Graphics, Inc. Employee Stock Ownership Plan ("ESOP"), enhancing their sense of ownership. The Company believes this sense of employee engagement and distinct corporate culture drives its disciplined approach to all aspects of its business.

The Company demonstrates its commitment to employee engagement in a variety of ways, including the following:

• Offering employees a competitive compensation and benefits package;

- Providing employees with a safe work environment with robust safety training and accountability programs;
- Offering continuous learning and career advancement opportunities, such as through registered mechanical and electrical apprenticeship programs, youth apprenticeship programs, the Company's own Accelerated Career Training program for production employees, digital media training, business resource groups and leadership development training;
- Offering business resource groups—including The Circle for women launched in 2016, and the Frontline for military veterans launched in 2019, with additional groups expected to be launched in future years—to promote diversity and inclusion and provide the Company with feedback on ways to enhance the employee experience through the development and improvement of current policies that help Quad remain their employer of choice;
- Promoting employee health and wellness through a variety of personal improvement programs and facilities, including the Company's own full-service QuadMed primary care clinics;
- Acting on employee feedback garnered through regular surveys and open forums at department and company-wide meetings;
- Offering an employee referral program and investing in technology and improved processes to facilitate an
 easy hiring and on-boarding process; and
- Fostering pride through employee recognition programs; employee and family events; long-standing focus on corporate social responsibility, including community outreach activities and support, and environmental sustainability efforts, such as effective management of resources and reducing waste; and adhering to a published code of ethics.

Quad is led by an experienced management team with a proven track record in the printing industry that is committed to preserving the Company's values-based culture. The senior management team includes entrepreneurially minded leaders with a long tenure at Quad mixed with strategic new hires or leaders from recent acquisitions, further supplemented by managers and employees committed to advancing print and marketing solutions in coordination with the ever-evolving multichannel media landscape. The Company believes the experience and stability of senior management, paired with next-generation talent, will contribute to its long-term success as it continues its path forward as a marketing solutions partner with a strong foundation in print.

Quad also enjoys a competitive advantage in consistent, stable leadership that is focused on making decisions in the best long-term interest of the Company. It is able to do this because of the Quadracci family voting control, which enables the Company to manage its strategy and disciplined financial policy by being able to make decisions today that could benefit the Company years from now and avoid the pitfalls of short-term decision making that could potentially jeopardize the stability and longevity of the Company.

Environmental Stewardship

Quad strives to be the leader in the printing industry in adopting new technologies and processes to minimize the Company's impact on the environment. The Company believes it has long been known for its environmental stewardship. Quad's proactive approach to incorporate holistic practices has also positively impacted operating costs through the reduction of waste, energy use, and emissions, as well as through the implementation of water conservation solutions. The Company has also undertaken steps to reduce greenhouse gas emissions from its manufacturing processes and to improve fuel efficiency and reduce emissions in its fleet of Company-owned tractor trailers.

As the owner, lessee or operator of various real properties and facilities, Quad is subject to various federal, state and local environmental laws and regulations, including those relating to air emissions; waste generation, handling, management and disposal; sanitary and storm water discharge; and remediation of contaminated sites. Historically, compliance with these laws and regulations has not had a material adverse effect on the Company's results of operations, financial position or cash flows. Compliance with existing or new environmental laws and regulations may require the Company to make future expenditures.

Clients

Quad enjoys long-standing relationships with a diverse base of clients, which includes both national and regional corporations in North America, South America, Europe and Asia. The Company's clients include industry-leading blue chip companies that operate in a wide range of industries and serve both businesses and consumers, including retailers, publishers and direct marketers. The Company's relationships with its largest clients average over 15 years in duration.

In 2019, Quad served approximately 5,600 clients, and its ten largest clients accounted for approximately 15% of consolidated sales, with none representing more than 5% individually. The Company believes that its large and diverse client base, broad geographic coverage and extensive range of printing and print-related capabilities are competitive strengths.

Patents, Trademarks and Trade Names

Quad operates research and development facilities that support the development of new equipment, process improvements, raw materials and content management, and distribution technologies to better meet client needs and improve operating efficiencies. The Company continues to innovate within the printing and print-related industry and, as a result, has developed what it believes to be one of the most powerful patent portfolios in the print industry.

Quad currently holds or has rights to commercialize a wide variety of worldwide patents and applications relating to its business. The Company intends to continue to file patent applications that it believes will help ensure the continued strength of the Company and its portfolio. Additionally, the Company markets products, services and capabilities under a number of trademarks and trade names. Quad aggressively defends its intellectual property rights and intends to continue to do so in the future.

Raw Materials

The primary raw materials that Quad uses in its print business are paper, ink and energy. At this time, the Company's supply of raw materials is readily available from numerous vendors; however, based on market conditions, that could change in the future. The Company generally buys these raw materials based upon market prices that are established with the vendor as part of the procurement process.

Approximately half of the paper used by the Company is supplied directly by its clients. For those clients that do not directly supply their own paper, the Company makes use of its purchasing efficiencies to supply paper by negotiating with leading paper vendors, uses a wide variety of paper grades, weights and sizes, and does not rely on any one vendor. In addition, the Company generally includes price adjustment clauses in sales contracts for paper and other critical raw materials in the printing process. Although these clauses generally mitigate paper price risk, higher paper prices and tight paper supplies may have an impact on client demand for printed products. The Company's working capital requirements, including the impact of seasonality, are partially mitigated through the direct purchasing of paper by its clients.

The Company produces the majority of ink used in its print production, allowing it to control the quality, cost and supply of key inputs. Raw materials for the ink manufacturing process are purchased externally from a variety of vendors.

The Company generally cannot pass on to clients the impact of higher electric and natural gas energy prices on its manufacturing costs, and increases in energy prices result in higher manufacturing costs for certain of its operations. The Company mitigates its risk through natural gas hedges when appropriate. In its logistic operations, however, the Company is able to pass a substantial portion of any increase in fuel prices directly to its clients.

Employees

As of December 31, 2019, Quad had approximately 19,600 full-time equivalent employees in North America, South America, Europe and Asia. Within the United States, there were approximately 15,900 full-time equivalent employees, of which approximately 400 were covered by a collective bargaining agreement. Outside of the United States, there were approximately 3,700 full-time equivalent employees, of which approximately 1,200 were either governed by an industry-wide agreement, by a collective bargaining agreement or through a works council or similar arrangement. Quad believes that its employee relations are good and that the Company maintains an employee-centric culture.

Business Acquisitions and Strategic Investments

The Company completed the acquisition of Periscope on January 3, 2019, for a net preliminary purchase price of \$121 million, excluding acquired cash. Periscope is a creative agency headquartered in Minneapolis, Minnesota and provides a comprehensive offering, including media buying and analytics, creative and account management. Periscope also has packaging design and premedia services that complement Quad's print-production capabilities.

For additional information related to the Company's acquisition activity, see Note 3, "Acquisitions and Strategic Investments," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K.

Information About Our Executive Officers

The following table sets forth the names, ages (as of January 31, 2020) and positions of Quad's executive officers.

Name	Age	Position
J. Joel Quadracci	51	Chairman, President and Chief Executive Officer
Eric N. Ashworth	54	Executive Vice President of Product and Market Strategy, and President of Quad Agency Solutions
Renee B. Badura	56	Executive Vice President of Sales and Marketing
Thomas J. Frankowski .	59	Executive Vice President and Chief Operating Officer
David J. Honan	51	Executive Vice President and Chief Financial Officer
Jennifer J. Kent	48	Executive Vice President of Administration and General Counsel
Kelly A. Vanderboom	45	Executive Vice President, President of Logistics and Treasurer
Steven D. Jaeger	55	Vice President and Chief Information Officer
Anne M. Bauer	55	Executive Director and Chief Accounting Officer

Mr. Quadracci has served as the Chairman, President and Chief Executive Officer of Quad since January 2010. Since March, 2018, Mr. Quadracci also serves on the Board of Directors of Rise Interactive Media & Analytics, LLC. He previously served as President and Chief Executive Officer from July 2006 to January 2010, President from January 2005 to July 2006 and has served as a director of Quad since 2003. Mr. Quadracci joined Quad in 1991 and, prior to becoming President and Chief Executive Officer, served in various capacities, including Sales Manager, Regional Sales Strategy Director, Vice President of Print Sales, Senior Vice President of Sales & Administration, and President and Chief Operating Officer. Mr. Quadracci is the brother of Kathryn Quadracci Flores, a director of Quad, and the brotherin-law of Christopher B. Harned, a director of Quad. Mr. Ashworth has served as Executive Vice President of Product and Market Strategy, and President of Quad Agency Solutions since April 2016. Since March, 2018, Mr. Ashworth also serves on the Board of Directors of Rise Interactive and Analytics, LLC. He previously served as President of BlueSoHo and Media Solutions from August 2015 to April 2016. Prior to joining Quad, Mr. Ashworth was President of SGK, Inc. (formerly Schawk, Inc.) from July 2012 to July 2015, Chief Growth and Strategy Officer of SGK from September 2009 to July 2012 and Global Chief Growth Officer of Anthem Worldwide (a division of SGK) from November 2003 to September 2009. Prior thereto, Mr. Ashworth was co-founder and President of BlueMint Associates from June 2002 through November 2003, after serving in various marketing related roles since 1992 at Levi Strauss & Co., the Clorox Corporation and Colgate-Palmolive.

Ms. Badura has served as Executive Vice President of Sales and Marketing since June 2015. She previously served as Vice President of Omnichannel Sales Strategy from February 2014 to June 2015, as Regional Vice President of Sales-Midwest for Marketing Solutions from January 2012 to February 2014, as Vice President of Sales - East Coast for Magazines and Catalogs from April 2007 to December 2011, as Vice President of Sales - West Coast from January 2004 to March 2007 and in various other capacities since she joined Quad in 1986.

Mr. Frankowski has served as Executive Vice President and Chief Operating Officer since March 2014. He previously served as Executive Vice President of Manufacturing Operations and President of Europe from July 2010 to March 2014. Prior thereto, Mr. Frankowski was Senior Vice President of Manufacturing from 2004 to July 2010, President of Quad Europe, Quad Polish subsidiary, from 2008 to July 2010, and he served in various other capacities since he joined Quad in 1979.

Mr. Honan has served as Executive Vice President and Chief Financial Officer since January 2015. He previously served as Vice President and Chief Financial Officer from March 2014 to January 2015, Vice President and Chief Accounting Officer from July 2010 to March 2014, Vice President and Corporate Controller from December 2009 to July 2010 and as Quad's Corporate Controller from when he joined Quad in May 2009 until December 2009. Prior to joining Quad, Mr. Honan served as Vice President, General Manager and Chief Financial Officer of Journal Community Publishing Group, a subsidiary of media conglomerate Journal Communications Inc., for five years. Before joining Journal Community Publishing Group, Mr. Honan worked in executive-level roles in investor relations and corporate development at Newell Rubbermaid, a global marketer of consumer and commercial products. Prior thereto, Mr. Honan worked at the accounting firm Arthur Andersen LLP for 11 years.

Ms. Kent has served as Executive Vice President of Administration and General Counsel since June 2015. She previously served as Vice President and General Counsel from December 2013 to June 2015 and as Quad's Assistant General Counsel from when she joined Quad in August 2010 until December 2013. Prior to joining Quad, Ms. Kent held various positions in the legal department at Harley-Davidson Motor Company from March 2003 to July 2010. Prior thereto, Ms. Kent served as an Assistant United States Attorney for the Eastern District of Wisconsin and practiced law at Foley & Lardner LLP, a Milwaukee-based law firm.

Mr. Vanderboom has served as Executive Vice President since 2018. Since March 2018, Mr. Vanderboom has also served on the Board of Directors of Rise Interactive Media & Analytics, LLC. He has also served as Treasurer and President of Logistics since March 2014. He previously served as Quad's Vice President & Treasurer from 2008 to March 2014 and as its Treasurer from 2007 to 2008. Prior to becoming Quad's Treasurer, Mr. Vanderboom served as Director of Treasury, Risk & Planning from 2006 until 2007, as Controller of Quad's Distribution and Facilities departments from 2004 until 2006, and in various other capacities since he joined Quad in 1993.

Mr. Jaeger has served as Vice President and Chief Information Officer since November 2015. He previously served as Executive Vice President, President of Direct Marketing and Chief Information Officer from November 2014 to November 2015, as Executive Vice President, President of Direct Marketing and Media Solutions and Chief Information Officer from March 2014 to November 2014, as Corporate Vice President of Information and Technology for Quad since 2013, Vice President of Information Systems and Infrastructure from 2007 to 2012 and as President of Quad/Direct since August 2007. Prior thereto, Mr. Jaeger had been Quad's Vice President of Information Systems from 1998 to 2006 and had worked in various other capacities since he joined Quad in 1994. Prior to joining Quad, Mr. Jaeger worked for Andersen Consulting for eight years.

Ms. Bauer has served as Executive Director and Chief Accounting Officer since March 2017. She previously served as Director - Corporate Controller of Quad from May 2016 until March 2017. She joined Quad in September 2011, serving as Director of Corporate Accounting until May 2016. Prior to joining Quad, Ms. Bauer held various accounting positions at Journal Communications, Inc. during her 18 years there, including Vice President and Controller from June 2000 until September 2011.

Executive officers of Quad are elected by and serve at the discretion of Quad's Board of Directors. Other than described above, there are no family relationships between any directors or executive officers of Quad.

Item 1A. <u>Risk Factors</u>

You should carefully consider each of the risks described below, together with all of the other information contained in this Annual Report on Form 10-K, before making an investment decision with respect to Quad's securities. If any of the following risks develop into actual events, the Company's business, financial condition or results of operations could be materially and adversely affected, and you may lose all or part of your investment.

The Company operates in a highly competitive environment.

The advertising and marketing services industries are highly competitive and are expected to remain so. Any failure on the part of the Company to compete effectively in the markets it serves could have a material adverse effect on its results of operations, financial condition or cash flows and could require changes to the way it conducts its business or require it to reassess strategic alternatives involving its operations.

The Company operates primarily in the commercial print portion of the printing industry, which is highly fragmented and competitive. The Company competes for business not only with large and mid-sized printers, but also with smaller regional printers and the growing forms of digital alternatives to print. In certain circumstances, due primarily to factors such as freight rates and client preference for local services, printers with better access to certain regions of a given country may be preferred by clients in such regions.

The printing industry continues to experience a reduction in demand for printed materials and overcapacity due to various factors including the great recession of 2008 and 2009, which severely impacted print volumes and accelerated the impact of media disruption. Specifically, there is a sustained and increasing shift of digital substitution by marketers and advertisers, to both replace and augment campaigns that were historically focused on print. The impacts of overcapacity and intense competition have led to continued downward pricing pressures. Printing industry revenues may continue to decrease in the future. Some of the industries that the Company services have been subject to consolidation efforts, leading to a smaller number of potential clients. Furthermore, if the smaller clients of the Company are consolidated with larger companies using other printing companies, the Company could lose its clients to competing printing companies.

Significant downward pricing pressure and decreasing demand for printing services caused by factors outside of the Company's control may adversely affect the Company.

The Company has experienced significant downward pricing pressures for printing services in the past, and pricing for printing services has declined significantly in recent years. Such pricing may continue to decline from current levels. In addition, demand for printing services has decreased in recent years and may continue to decrease. Any increases in the supply of printing services or decreases in demand could cause prices to continue to decline, and prolonged periods of low prices, weak demand and/or excess supply could have a material adverse effect on the Company's business growth, results of operations and liquidity.

The impact of digital media and similar technological changes, including the substitution of printed products with digital content, may continue to adversely affect the results of the Company's operations.

The media landscape is experiencing rapid change due to the impact of digital media and content on printed products. Improvements in the accessibility and quality of digital media through the online distribution and hosting of

media content, mobile technologies, e-reader technologies, digital retailing and the digital distribution of documents and data has resulted and may continue to result in increased consumer substitution. Continued consumer acceptance of such digital media, as an alternative to print materials, is uncertain and difficult to predict and may decrease the demand for the Company's printed products, result in reduced pricing for its printing services and additional excess capacity in the printing industry, and adversely affect the results of the Company's operations.

As competition increases among retail-based customers, they may enter into business combinations or alliances and establish companies in other market segments to expand their businesses. In addition, new and enhanced technologies, including search, web and infrastructure computing services, digital content, and electronic devices, affect the customers' reliance on the use of printed materials. The internet facilitates competitive entry and comparison shopping, and the reliance on digital retailing may reduce the Company's sales and profits.

The Company may be adversely affected by increases in its operating costs, including the cost and availability of raw materials, labor-related costs, fuel and other energy costs and freight rates.

The primary raw materials that the Company uses in its print business are paper, ink and energy. The price of such raw materials has fluctuated over time and has caused fluctuations in the Company's net sales and cost of sales. This volatility may continue and the Company may experience increases in the costs of its raw materials in the future as prices in the overall paper, ink and energy markets are expected to remain beyond its control.

Approximately half of the paper used by the Company is supplied directly by its clients. For those clients that do not directly supply their own paper, the Company generally includes price adjustment clauses in sales contracts for paper and other critical raw materials in the printing process. Although these clauses generally mitigate paper price risk, higher paper prices and tight paper supplies may have an impact on client demand for printed products. If the Company passes along increases in the cost of paper and the price of the Company's products and services increases as a result, client demand could be adversely affected, and thereby, negatively impact the Company's financial performance. If the Company is unable to continue to pass along increases in the cost of paper to its clients, future increases in paper costs would adversely affect its margins and profits.

Due to the significance of paper in the Company's print business, it is dependent on the availability of paper. In periods of high demand, certain paper grades have been in short supply, including grades used in the Company's business. In addition, during periods of tight supply, many paper producers allocate shipments of paper based upon historical purchase levels of customers. Additionally, the declining number of paper suppliers in the United States and Canada has resulted in a contraction in the overall paper manufacturing industry. This contraction of suppliers may cause overall supply issues, may cause certain paper grades to be in short supply or unavailable, and may cause paper prices to substantially increase.

Although historically the Company generally has not experienced significant difficulty in obtaining adequate quantities of paper, continued decline in suppliers, changes as noted above in United States import or trade regulations, or other unforeseen developments in the overall paper markets could result in a decrease in the supply of paper and could adversely affect the Company's revenues or profits. In addition, the Company may not be able to resell waste paper and other by-products or the prices received for their sale may decline substantially.

The Company is dependent upon the vendors within the Company's supply chain to maintain a steady supply of inventory, parts and materials. Many of the Company's products are dependent upon a limited number of vendors, and significant disruptions could adversely affect operations. Under recent market conditions, it is possible that one or more of the Company's vendors will be unable to fulfill their operating obligations due to financial hardships, liquidity issues or other reasons.

The Company generally cannot pass on to clients the impact of higher electric and natural gas energy prices on its manufacturing costs, and increases in energy prices result in higher manufacturing costs for certain of its operations. If the Company is unable to pass along increases in energy costs, future increases would adversely affect its margins and profits. Even if the Company could pass along increases in energy costs, the price of the Company's products and services would increase as a result. Client demand could be adversely affected, and would thereby negatively impact the Company's financial performance.

Labor represents a significant component of the cost structure of the Company. Increases in wages, salaries and benefits, such as medical, dental, pension and other post-retirement benefits, may impact the Company's financial performance. Changes in interest rates, investment returns or the regulatory environment may impact the amounts the Company will be required to contribute to the pension plans that it sponsors and may affect the solvency of these pension plans. The Company may be unable to achieve labor productivity targets, to retain employees or labor may not be adequately available in locations in which the Company operates, which could negatively impact the Company's financial performance.

Freight rates and fuel costs also represent a significant component of the Company's cost structure. In general, the Company has been able to pass along increases in the cost of freight and fuel to many of its clients. If the Company is not able to pass along a substantial portion of increases in freight rates or in the price of fuel, future increases in these items would adversely impact the Company's margin and profits. If the Company passes along increases in the cost of freight and fuel and the price of the Company's products and services increases as a result, client demand could be adversely affected, and thereby, negatively impact the Company's financial performance.

The Company may not be able to reduce costs and improve its operating efficiency rapidly enough to meet market conditions.

Because the markets in which the Company competes are highly competitive, the Company will need to continue to improve its operating efficiency in order to maintain or improve its profitability. There can be no assurance that the Company's continuing cost reduction efforts will continue to be beneficial to the extent anticipated, or that the estimated productivity, cost savings or cash flow improvements will be realized as anticipated or at all. If the Company's efforts are not successful, it could have an adverse effect on the Company's operations and competitive position. In addition, the need to reduce ongoing operating costs have and, in the future, may continue to result in significant up-front costs to reduce workforce, close or consolidate facilities, or upgrade equipment and technology.

The Company's transformation to a marketing solutions partner increases the complexity of the Company's business, and if the Company is unable to successfully adapt its business processes as required by these new markets, the Company will be at a competitive disadvantage and its ability to grow will be adversely affected.

As the Company expands its integrated marketing platform, the overall complexity of the Company's business increases at an accelerated rate and the Company becomes subject to different market dynamics. The new markets into which the Company is expanding, or may expand, may have different characteristics from the markets in which the Company historically competed. These different characteristics may include, among other things, demand volume requirements, demand seasonality, product generation development rates, client concentrations and performance and compatibility requirements. The Company's failure to make the necessary adaptations to its business model to address these different characteristics, complexities and new market dynamics could adversely affect the Company's operating results.

If the Company fails to identify, manage, complete and integrate acquisitions, investment opportunities or other significant transactions, as well as identify and execute strategic divestitures, it may adversely affect the Company's future results and ability to implement its business strategy.

The Company may pursue acquisitions of, investment opportunities in, or other significant transactions with, companies that are complementary to the Company's business, as well as divestitures of businesses, product lines or other assets. In order to pursue this strategy successfully, the Company must identify attractive acquisition or investment opportunities, successfully complete the transaction, some of which may be large and complex, and manage post-closing

issues such as integration of the acquired company or employees. The Company may not be able to identify or complete appealing acquisition or investment opportunities given the intense competition for these transactions. Even if the Company identifies and completes suitable corporate transactions, the Company may not be able to successfully address inherent risks in a timely manner, or at all. These inherent risks include, among other things: failure to achieve all or any projected synergies, performance targets or other anticipated benefits of the acquisition, investment or divestiture; failure to successfully integrate the purchased operations, technologies, products or services and maintain uniform standard controls, policies and procedures; substantial unanticipated integration costs; loss of key employees, including those of an acquired business; diversion of management's attention from other business concerns; failure to retain the clients of the acquired business; additional debt and/or assumption of known or unknown liabilities; potential dilutive issuances of equity securities; and a write-off of goodwill, client lists, other intangibles and amortization of expenses. If the Company fails to successfully integrate an acquisition, the Company may not realize all or any of the anticipated benefits of the acquisition, and the Company's future results of operations could be adversely affected.

In addition, the acceleration of the Company's transformation to a marketing solutions partner is expected to be partially dependent upon the Company's ability to identify and execute strategic divestiture opportunities to generate cash and related benefits. For example, on October 30, 2019, the Company announced plans to divest its book business as part of ongoing portfolio optimization. There can be no assurance whether the strategic benefits and expected financial impact of any divestitures will be achieved.

The Company may suffer a data-breach of sensitive information. If the Company's efforts to protect the security of such information are unsuccessful, any such failure may result in costly government enforcement actions and/or private litigation, and the Company's business and reputation could suffer.

The Company and its clients are subject to various United States and foreign cyber-security laws, which require the Company to maintain adequate protections for electronically held information. The Company may not be able to anticipate techniques used to gain access to the Company's systems or facilities, the systems of the Company's clients or vendors, or implement adequate prevention measures. Moreover, unauthorized parties may attempt to access the Company's systems or facilities, or the systems of the Company's clients or vendors, through fraud or deception. In the event and to the extent that a data breach occurs, such breach could have an adverse effect on the Company's business and results of operations. Complying with these various laws could cause the Company to incur substantial costs or require changes to the Company's business practices in a manner adverse to the Company's business.

The Company's business depends substantially on customer contract renewals and/or customer retention. Any contract non-renewals, renewals on different terms and conditions or decline in the Company's customer retention or expansion could materially adversely affect the Company's results of operations, financial condition and cash flows.

The Company has historically derived a significant portion of its revenue from long-term contracts with significant clients. If the Company loses significant clients, is unable to renew such contracts on similar terms and conditions, or at all, or is not awarded new long-term contracts with important clients in the future, its results of operations, financial condition and cash flows may be adversely affected.

The Company is exposed to risks of loss in the event of nonperformance by its clients. Some of the Company's clients are highly leveraged or otherwise subject to their own operating and regulatory risks. Even if the Company's credit review and analysis mechanisms work properly, the Company may experience financial losses and loss of future business if its clients become bankrupt, insolvent or otherwise are unable to pay the Company for its work performed. Any increase in the nonpayment or nonperformance by clients could adversely affect the Company's results of operations and financial condition.

Certain industries in which the Company's clients operate are experiencing consolidation. When client consolidation occurs, it is possible that the volume of work performed by the Company for a client after the consolidation will be less than it was before the consolidation or that the client's work will be completely moved to competitors. In addition, new and enhanced technologies, including search, web and infrastructure computing services, digital content, and electronic devices, may affect customers. The internet facilitates competitive entry and comparison shopping, and the reliance on digital retailing may reduce customers' volume. Any such reduction or loss of work could adversely affect the Company's results of operations and financial condition.

Future declines in economic conditions may adversely affect the Company's results of operations.

In general, demand for the Company's products and services is highly related to general economic conditions in the markets the Company's clients serve. Declines in economic conditions in the United States or in other countries in which the Company operates may adversely impact the Company's financial results, and these impacts may be material. Because such declines in demand are difficult to predict, the Company or the industry may have increased excess capacity as a result. An increase in excess capacity has resulted, and may continue to result, in declines in prices for the Company's products and services. In addition, a prolonged decline in the global economy and an uncertain economic outlook has and could further reduce the demand in the printing industry. Economic weakness and constrained advertising spending have resulted, and may in the future result, in decreased revenue, operating margin, earnings and growth rates and difficulty in managing inventory levels and collecting accounts receivable. The Company has experienced, and expects to experience in the future, excess capacity and lower demand due to economic factors affecting consumers' and businesses' spending behavior. Uncertainty about future economic conditions makes it difficult for the Company to predict results of operations, financial position and cash flows and to make strategic decisions regarding the allocation and deployment of capital.

The fragility of and decline in overall distribution channels, including newspaper distribution channels, may adversely impact customers' access to cost effective distribution of their advertising materials, and therefore may adversely impact the Company's business.

The distribution channels of print products and services, including the newspaper industry, face significant competition from other sources of news, information and entertainment content delivery. If overall distribution channels, including newspaper distribution channels, continue to decline, the Company's customers may be adversely impacted by the lack of access to cost effective distribution of their advertising materials. In turn, this decline in cost effective distribution channels may force customers to use other avenues of distribution that may be at significantly higher cost, which may decrease customer demand for the Company's products and services, and thus adversely affect the Company's financial condition, results of operations and cash flows.

Changes in postal rates, postal regulations and postal services may adversely impact customers' demand for print products and services.

Postal costs are a significant component of the cost structures of many of the Company's clients and potential clients. Postal rate changes and USPS regulations that result in higher overall costs can influence the volume that these clients will be willing to print and ultimately send through the USPS.

Integrated distribution with the postal service is an important component of the Company's business. Any material change in the current service levels provided by the postal service could impact the demand that clients have for print services. The USPS continues to experience financial problems. Without increased revenues or action by Congress to reform the USPS' cost structure, these losses will continue into the future. As a result of these financial difficulties, the USPS has come under increased pressure to adjust its postal rates and service levels. Additional price increases may result in customers reducing mail volumes and exploring the use of alternative methods for delivering a larger portion of their products, such as continued diversion to the internet and other alternative media channels in order to ensure that they stay within their expected postage budgets.

The USPS offers "work-share" discounts that provide incentives to co-mail and place product as far down the mail-stream as possible. Discounts are earned as a result of less handling of the mail, and therefore, lower costs for the USPS. As a result, the Company has made substantial investments in co-mailing technology and equipment to ensure customers benefit from these discounts. As the USPS reacts to its financial difficulties, it often revises design standards for mail entering its system. These design standards often increase costs for customers and, in turn, decrease the value of the cost reductions that the Company's co-mailing services provide. If the incentives to co-mail are decreased by USPS regulations, the overall cost to mail printed products will increase and may result in print volumes declining.

Current federal law limits postal rate increases (outside of an "exigent circumstance") to the increase in the Consumer Price Index ("CPI"). This cap works to ensure funding stability and predictability for mailers. However, that same federal statute requires the Postal Regulatory Commission ("PRC") to conduct a review of the overall rate-making structure for the USPS. The results of that study found that the current rate structure has been partially successful in meeting the USPS' goals. The current system does result in predictable and stable rate making. However, the PRC also concluded that the current rate structure does not meet USPS' revenue needs and lacks pricing efficiency. As a result, the PRC proposed a new rate-making structure that would provide the USPS with additional pricing flexibility over the current CPI cap, which may result in a substantially altered rate structure for mailers. Any newly revised rates that would be effective as a result of new rules issued by the PRC may include a higher rate cap, or potentially the elimination of a rate cap altogether, which will result in no restrictions on the USPS' ability to increase rates from year to year. This may lead to price spikes for mailers and may also reduce the incentive for the USPS to continue to take out costs and instead continue to rely on postage to cover the costs of an outdated postal service that does not reflect the industry's ability or willingness to pay. The result may be reduced demand for printed products as customers may move more aggressively into other delivery methods, such as the many digital and mobile options now available to consumers.

The Company's debt facilities include various covenants imposing restrictions that may affect the Company's ability to operate its business.

On September 1, 1995, and as last amended on November 24, 2014, the Company entered into a senior secured note agreement (the "Master Note and Security Agreement") pursuant to which the Company has issued over time senior notes in an aggregate principal amount of \$1.1 billion in various tranches. As of December 31, 2019, the borrowings outstanding under the Master Note and Security Agreement were \$70.7 million. On April 28, 2014, and as last amended on January 31, 2019, the Company entered into a senior secured credit facility (the "Senior Secured Credit Facility,") which included three different loan facilities: an \$825.0 million delayed draw Term Loan A, a \$500.0 million Term Loan B, and an \$800.0 million revolving credit facility. On July 26, 2019, following the termination of the proposed acquisition of LSC Communications, Inc. ("LSC"), Quad fully funded the \$825.0 million delayed draw Term Loan A to retire the entire amount outstanding on the \$500.0 million Term Loan B and reduced the borrowings under the revolving credit facility and the \$825.0 million Term Loan A both mature on January 31, 2024. As of December 31, 2019, the borrowings outstanding under the Senior Secured Credit Facility were \$768.3 million. On April 28, 2014, the Company issued \$300.0 million aggregate principal amount of its unsecured 7.0% senior notes due May 1, 2022 ("Senior Unsecured Notes,"), of which \$243.5 million remained outstanding as of December 31, 2019.

The Company's various lending arrangements include certain financial covenants. In addition to the financial covenants, the debt facilities also include certain limitations on acquisitions, indebtedness, liens, dividends and repurchases of capital stock. As of December 31, 2019, the Company was in compliance with all financial covenants in its debt agreements. While the Company currently expects to be in compliance in future periods with all of the financial covenants, there can be no assurance that these covenants will continue to be met. The Company's failure to maintain compliance with the covenants could prevent the Company from borrowing additional amounts and could result in a default under any of the debt agreements. Such default could cause the outstanding indebtedness to become immediately due and payable, by virtue of cross-acceleration or cross-default provisions.

Failure to attract and retain qualified talent across the enterprise could materially adversely affect the Company's business, competitive position, financial condition and results of operations.

The Company continues to be substantially dependent on its production personnel to print the Company's products in a cost-effective and efficient manner that allows the Company to obtain new customers and to drive sales from the Company's existing customers. The Company believes that there is significant competition for production personnel with the skills and technical knowledge that the Company requires. The Company's ability to continue efficient operations, reduce production costs, and consolidate operations will depend, in large part, on the Company's success in recruiting, training, integrating and retaining sufficient numbers of production personnel to support the Company's production, cost savings and consolidation targets. New hires require significant training and it may take significant time before they achieve full productivity. In addition, an increase in the wages paid by competing employers could result in an increase in the wage rates that the Company must pay. As a result, the Company may incur significant costs to attract, train and retain employees, including significant expenditures related to salaries and benefits, and the Company may lose new, as well as existing, employees to competitors or other companies before the Company realizes the benefit of its investment in recruiting and training them. The Company's recent hires and planned hires may not become productive as quickly as the Company expects, and the Company may be unable to hire or retain sufficient numbers of qualified individuals in the markets where the Company does business or plans to do business. In addition, due to turnover, a large percentage of employees will be new to the Company. If the Company is unable to hire and train sufficient numbers of personnel, the Company's business would be adversely affected.

The Company is heavily dependent on its executive management team, including its Chief Executive Officer and other skilled personnel and, if the Company is unable to retain such personnel or hire qualified personnel, the Company may not be able to compete effectively.

The Company's future success depends on its continuing ability to identify, hire, develop, and retain its executive management team, including its Chief Executive Officer, and other skilled personnel for all areas of the organization. The Company's continued ability to compete effectively depends on its ability to attract new employees and retain its existing employees.

The Company and its facilities are subject to various consumer protection and privacy laws and regulations, and will become subject to additional laws and regulations in the future. If the Company's efforts to comply with such laws or protect the security of information are unsuccessful, any failure may subject the Company to material liability, require it to incur material costs or otherwise adversely affect its results of operations as a result of compliance with such laws, costly enforcement actions and private litigation.

The nature of the Company's business includes the receipt and storage of information about the Company's clients, vendors and the end-users of the Company's products and services. The Company and its clients are subject to various United States and foreign consumer protection, information security, data privacy and "do not mail" requirements at the federal, states, provincial and local levels. The Company is subject to many legislative and regulatory laws and regulations around the world concerning data protection and privacy. In addition, the interpretation and application of consumer and data protection laws in the United States and elsewhere are often fluid and uncertain. To the extent that the Company or its clients become subject to additional or more stringent requirements or that the Company is not successful in its efforts to comply with existing requirements or protect the security of information, demand for the Company's results of operations. In addition, such laws may be interpreted and applied in a manner inconsistent with the Company's internal policies. If so, the Company could suffer costly enforcement actions (including an order requiring changes to the Company's data practices) and private litigation, which could have an adverse effect on the Company's business and results of operations. Complying with these various laws could cause the Company to incur substantial costs or require changes to the Company's business practices in a manner adverse to the Company's business.

The Company may be required to make capital expenditures to sustain its platforms and processes, in part to keep pace with industry developments and client expectations, and to remain technologically and economically competitive, which may increase its costs, reduce its profits, disrupt its operations or adversely affect its ability to implement its business strategy.

The printing and marketing services industries are experiencing rapid change as new digital technologies are developed that offer clients an array of choices for their marketing and publication needs. In order to grow and remain competitive, the Company will need to adapt to future changes, especially with regard to technology, to enhance the Company's existing offerings and introduce new offerings to address the changing demands of clients. In order to remain technologically and economically competitive, the Company may need to make significant capital expenditures as it develops and continues to maintain its platforms and processes, and to develop and integrate new technologies. In order to accomplish this effectively, the Company will need to deploy its resources efficiently, maintain effective cost controls and bear potentially significant market and raw material risks. If the Company's revenues decline, it may impact the Company's ability to expend the capital necessary to develop and implement new technology and be economically competitive. Debt or equity financing, or cash generated from operations, may not be available or sufficient for these requirements or for other corporate purposes or, if debt or equity financing is available, it may not be on terms favorable to the Company. In addition, even if capital is available to the Company, there is risk that the Company's vendors will have discontinued the production of parts needed for repairs, replacements or improvements to the Company's existing platforms, leading the Company to expend more capital than expected to perform such repairs, replacements or improvements. The Company's ability to grow will also depend upon its ability to keep pace with technological advances, industry evolutions and client expectations on a continuing basis and to integrate available technologies and provide additional services commensurate with client needs in a commercially appropriate manner. The Company's business and operating results may be adversely affected if the Company is unable to keep pace with relevant technological and industry changes or if the technologies or business strategies that the Company adopts or services it promotes do not receive widespread market acceptance.

If the Company is unable to make the capital expenditures necessary to adapt to industry and technological developments, the Company may experience a decline in demand for its services, be unable to implement its business strategy and its business operating results may be adversely affected. Additionally, if the Company is unable to meet future challenges from competing technologies on a timely basis or at an acceptable cost, the Company could lose clients to competitors. In general, the development of new communication channels inside and outside the printing and media solutions industry requires the Company to anticipate and respond to the varied and continually changing demands of clients. The Company may not be able to accurately predict technological trends or the success of new services in the market.

There are risks associated with the Company's operations outside of the United States.

Although the substantial majority of the Company's business activity takes place in the United States, a portion of the Company's net sales are derived from operations in foreign countries. The Company's products and services are sold primarily throughout North America, South America and Europe. In addition, the Company strategically sources packaging product manufacturing over multiple end markets in Central America and Asia. The Company's printing operations located in Europe and Latin America include operations in England, France, Germany, Poland, Argentina, Colombia, Mexico and Peru, as well as investments in printing operations in Brazil and India. Net sales from the Company's wholly-owned subsidiaries outside of the United States accounted for approximately 10% of its consolidated net sales for the years ended December 31, 2019, 2018 and 2017.

As a result, the Company is subject to the risks inherent in conducting business outside of the United States, including, but not limited to: the impact of economic and political instability; fluctuations in currency values, foreigncurrency exchange rates, devaluation and conversion restrictions; exchange control regulations and other limits on the Company's ability to import raw materials or finished product; tariffs and other trade barriers; trade restrictions and economic embargoes by the United States or other countries; social unrest, acts of terrorism, force majeure, war or other armed conflicts; inflation and fluctuations in interest rates; language barriers; difficulties in staffing, training, employee retention and managing international operations; logistical and communications challenges; differing local business practices and cultural consideration; restrictions on the ability to repatriate funds; foreign ownership restrictions and the potential for nationalization or expropriation of property or other resources; longer accounts receivable payment cycles; potential adverse tax consequences and being subject to different legal and regulatory regimes that may preclude or make more costly certain initiatives or the implementation of certain elements of its business strategy. Any international expansion or acquisition that the Company undertakes could amplify these risks related to operating outside of the United States.

The Company is exposed to the economic and political conditions in Argentina. The Argentine economy has experienced significant volatility in recent years, characterized by periods of low or negative growth, high and variable levels of inflation and currency devaluation. As a consequence, the Company's business and operations have been, and could be in the future, affected from time to time to varying degrees by economic and political developments and other material events affecting the Argentine economy. The majority of the Company's employees in Argentina are covered by a collective bargaining agreement. A strike, work stoppage or other form of labor protest in Argentina in the future could disrupt the Company's Argentina operations and result in a material adverse impact to the Company's Argentina operations' financial condition, results of operations and cash flows, which could force the Company to reassess its strategic alternatives involving operations in Argentina. In addition, on March 25, 2015, due to deteriorating economic conditions, including inflation and currency devaluation, combined with uncertain political conditions, declining print volumes and labor challenges, the Company's Argentina subsidiaries, Anselmo L. Morvillo S.A. ("Morvillo") and World Color Argentina, S.A. (the "Argentina Subsidiaries") commenced bankruptcy restructuring proceedings with a goal of consolidating operations. The Company completed such consolidation and emerged from bankruptcy; however, the Company's Argentina operations' repayment and other obligations resulting from such consolidation, if not successfully completed as and when due, may result in an adverse effect on the Company's Argentina operations' financial position and cash flows. As of December 31, 2019, the Company had \$18.2 million of total assets in Argentina, representing 0.8% of the Company's consolidated total assets. For the year ended December 31, 2019, the Company recognized \$29.9 million of net sales in Argentina, representing 0.8% of the Company's consolidated net sales.

The Company may incur costs or suffer reputational damage due to improper conduct of its employees, contractors or agents.

The Company could be adversely affected by engaging in business practices that are in violation of United States and foreign anti-corruption laws, including the United States Foreign Corrupt Practices Act. The Company operates in parts of the world with developing economies that have experienced governmental corruption to some degree, and in certain circumstances, strict compliance with anti-corruption laws may conflict with local customs and practices. In certain countries, the Company does substantial business with government entities or instrumentalities, which creates increased risk of a violation of the Foreign Corrupt Practices Act and international laws. There can be no assurance that all of the Company's employees, contractors or agents, including those representing the Company in countries where practices which violate anti-corruption laws may be customary, will not take actions that violate the Company's policies and procedures. The failure to comply with the laws governing international business practices may result in substantial penalties and fines. For additional information, see Note 11, "Commitments and Contingencies — Litigation," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K.

Changes in the legal and regulatory environment could limit the Company's business activities, increase its operating costs, reduce demand for its products or result in litigation.

The conduct of the Company's businesses is subject to various laws and regulations administered by federal, state and local government agencies in the United States, as well as to foreign laws and regulations administered by government entities and agencies in markets in which the Company operates. These laws and regulations and interpretations thereof may change, sometimes dramatically, as a result of political, economic or social events, such as the election of the new administration. Such regulatory environment changes may include changes in taxation requirements, accounting and disclosure standards, immigration laws and policy, environmental laws, and requirements of United States and foreign occupational health and safety laws. Changes in laws, regulations or governmental policy and the related interpretations may alter the environment in which the Company does business, and therefore, may impact its results or increase its costs or liabilities.

In addition, the Company and its subsidiaries are party to a variety of legal and environmental remediation obligations arising in the normal course of business, as well as environmental remediation and related indemnification proceedings in connection with certain historical activities, former facilities and contractual obligations of acquired businesses. Permits are required for the operation of certain parts of the Company's business, and these permits are subject to renewal, modification and, in some circumstances, revocation. Due to regulatory complexities, uncertainties inherent in litigation and the risk of unidentified contaminants on current and former properties, the potential exists for remediation, liability and indemnification costs to differ materially from the costs the Company has estimated. The Company cannot assure you that the Company's costs in relation to these matters will not exceed its established liabilities or otherwise have an adverse effect on its results of operations.

Various laws and regulations addressing climate change are being considered at the federal and state levels. Proposals under consideration include limitations on the amount of greenhouse gas that can be emitted (so-called "caps") together with systems of trading allowed emissions capacities. The impacts of such proposals could have a material adverse impact on the Company's financial condition and results of operations.

The Company's revenue, operating income from continuing operations and cash flows are subject to cyclical and seasonal variations.

The Company's business is seasonal, with the Company recognizing the majority of its operating income from continuing operations in the third and fourth quarters of the financial year, primarily as a result of the increased magazine advertising page counts and retail inserts and catalogs from back-to-school and holiday-related advertising and promotions. The fourth quarter is typically the highest seasonal quarter for cash flows from operating activities and Free Cash Flow due to the reduction of working capital requirements that reach peak levels during the third quarter. If the Company does not successfully manage the increased workflow, necessary increases in paper and ink inventory, production capacity flows and other business elements during these high seasons of activity, this seasonality could adversely affect the Company's cash flows and results of operations.

The Company may be adversely affected by interest rates, particularly floating interest rates, and foreign exchange rates.

As of December 31, 2019, 35% of the Company's borrowings were subject to variable interest rates. As a result, the Company is exposed to market risks associated with fluctuations in interest rates, and increases in interest rates could adversely affect the Company.

The Company currently holds two interest rate swap contracts designated as cash flow hedges, as the purpose is to reduce the variability of cash flows from interest payments related to a portion of the Company's variable-rate debt. The swaps effectively convert the notional value of the Company's variable rate debt based on one-month London Interbank Offered Rate ("LIBOR") to a fixed rate, including a spread on underlying debt, and a monthly reset in the variable interest rate.

Because a portion of the Company's operations are outside of the United States, significant revenues and expenses are denominated in local currencies. Although operating in local currencies may limit the impact of currency rate fluctuations on the results of operations of the Company's non-United States subsidiaries and business units, fluctuations in such rates may affect the translation of these results into the Company's consolidated financial statements. To the extent revenues and expenses are not in the applicable local currency, the Company may enter into foreign exchange forward contracts to hedge the currency risk. There can be no assurance, however, that the Company's efforts at hedging will be successful. There is always a possibility that attempts to hedge currency risks will lead to greater losses than predicted.

An other than temporary decline in operating results and enterprise value could lead to non-cash impairment charges due to the impairment of property, plant and equipment, goodwill and other intangible assets.

The Company has a material amount of property, plant, equipment, goodwill and other intangible assets on its balance sheet, due in part to acquisitions. As of December 31, 2019, the Company had the following long-lived assets on its consolidated balance sheet included in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K:

- Property, plant and equipment of \$1,036.5 million;
- Goodwill of \$103.0 million; and
- Other intangible assets, primarily representing the value of customer relationships acquired, of \$137.2 million.

As of December 31, 2019, these assets represented approximately 53% of the Company's total assets. The Company assesses impairment of property, plant and equipment and other intangible assets based upon the expected future cash flows of the respective assets. These valuations include management's estimates of sales, profitability, cash flow generation, capital structure, cost of debt, interest rates, capital expenditures and other assumptions. A decline in expected profitability, significant negative industry or economic trends, inability to effectively integrate acquired businesses, unexpected significant changes or planned changes in use of the assets or in entity structure, divestitures and discontinued operations may adversely impact the assumptions used in the valuations. As a result, the recoverability of these assets could be called into question, and the Company could be required to write down or write off these assets. Such an occurrence could have a material adverse effect on the Company's results of operations and financial position.

Holders of class A common stock are not able to independently elect directors of the Company or control any of the Company's management policies or business decisions because the holders of class A common stock have substantially less voting power than the holders of the Company's class B common stock, all of which is owned by certain members of the Quadracci family, trusts for their benefit or other affiliates of the Company, whose interests may be different from the holders of class A common stock.

The Company's outstanding stock is divided into two classes of common stock: class A common stock ("class A stock") and class B common stock ("class B stock"). The class B stock has ten votes per share on all matters and the class A stock is entitled to one vote per share. As of January 31, 2020, the class B stock constitutes approximately 77% of the Company's total voting power. As a result, holders of class B stock are able to exercise a controlling influence over the Company's business, have the power to elect its directors and indirectly control decisions such as whether to issue additional shares, declare and pay dividends or enter into corporate transactions. All of the class B stock is owned by certain members of the Quadracci family or trusts for their benefit, whose interests may differ from the interests of the holders of class A stock.

As of January 31, 2020, approximately 93% of the outstanding class B stock was held of record by the Quad Voting Trust, and that constitutes approximately 71% of the Company's total voting power. The trustees of the Quad Voting Trust have the authority to vote the stock held by the Quad Voting Trust. Accordingly, the trustees of the Quad Voting Trust are able to exercise a controlling influence over the Company's business, have the power to elect its directors and indirectly control decisions such as whether to issue additional shares, declare and pay dividends or enter into corporate transactions.

Furthermore, in response to recent public focus on dual class capital structures, certain stock index providers are implementing limitations on the inclusion of dual class share structures in their indices. If these restrictions increase, they may impact who buys and holds the Company's stock.

The Company is a controlled company within the meaning of the rules of the New York Stock Exchange ("NYSE") and, as a result, it relies on exemptions from certain corporate governance requirements that provide protection to shareholders of other companies.

Since the Quad Voting Trust owns more than 50% of the total voting power of the Company's stock, the Company is considered a controlled company under the corporate governance listing standards of the NYSE. As a controlled company, an exception under the NYSE listing standards exempts the Company from the obligation to comply with certain of the NYSE's corporate governance requirements, including the requirements:

- that a majority of the Company's Board of Directors consist of independent directors, as defined under the rules of the NYSE;
- that the Company have a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and
- that the Company have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities.

Accordingly, for so long as the Company is a controlled company, holders of class A stock may not have the same protections afforded to shareholders of companies that are subject to all of the corporate governance requirements of the NYSE.

If QuadMed, a wholly-owned subsidiary of the Company, fails to comply with applicable healthcare laws and regulations, the Company could face substantial penalties, and its business, reputation, operations, prospects and financial condition of the Company's subsidiary could be adversely affected.

QuadMed provides employer-sponsored healthcare solutions on a national level to employers of all sizes, including the Company and other private and public-sector companies. These solutions include, but are not limited to, on-site and near-site healthcare clinics, occupational health services, telemedicine, and health and wellness programs. The healthcare industry is heavily regulated, constantly evolving and subject to significant change and fluctuation. The U.S. federal and state healthcare laws and regulations that impact the QuadMed subsidiary business include, among others:

- the Health Insurance Portability and Accountability and the Health Information Technology for Economic and Clinical Health Acts, which, in general and among other things, establish comprehensive federal standards with respect to privacy, security and transmission of individually identifiable health information and impose requirements for the use of standardized electronic transactions with respect to transmission of such information;
- the laws and regulations administered and enforced by the Food and Drug Administration, including the Federal Food Drug and Cosmetics Act, Controlled Substances Act and other federal statutes and regulations;
- the federal Anti-Kickback Statute, which generally prohibits, among other things, soliciting, receiving or providing remuneration to induce the referral of an individual for an item or service or the purchasing or ordering of an item or service for which payment may be made under federal healthcare programs;
- the federal false claims laws, which generally prohibit, among other things, knowingly presenting or causing to be presented claims for payment from third-party payors that are false or fraudulent;

- state law equivalents of each of these federal laws, such as anti-kickback and false claims laws that may
 apply to items or services reimbursed by any third-party payor, including commercial insurers, and state
 laws governing the privacy and security of health information in certain circumstances, many of which
 differ from each other in significant ways and may not be preempted by applicable federal laws, thus
 complicating compliance efforts; and
- state prohibitions on the Corporate Practice of Medicine (many of these state laws differ from one another in significant ways and are not preempted by federal law).

The Company has significant liabilities with respect to defined benefit pension plans that could cause the Company to incur additional costs.

As a result of the 2010 acquisition of World Color Press, the Company assumed frozen single employer defined benefit pension plans for certain of its employees in the United States. The majority of the plans' assets are held in North American and global equity securities and debt securities. The asset allocation as of December 31, 2019, was approximately 30% equity securities and 70% debt securities.

As of December 31, 2019, the Company had underfunded pension liabilities of \$78.9 million for single employer defined benefit plans in the United States. Under current United States pension law, pension funding deficits are generally required to be funded over a seven-year period. These pension deficits may increase or decrease depending on changes in the levels of interest rates, pension plan investment performance, pension legislation and other factors. Declines in global debt and equity markets would increase the Company's potential pension funding obligations. Any significant increase in the Company's required contributions could have a material adverse impact on its business, financial condition, results of operations and cash flows.

In addition to the single employer defined benefit plans described above, the Company has previously participated in multiemployer pension plans ("MEPPs") in the United States, including the Graphic Communications International Union - Employer Retirement Fund ("GCIU") and the Graphic Communications Conference of the International Brotherhood of Teamsters National Pension Fund ("GCC"). Prior to the acquisition of World Color Press by the Company, World Color Press received notice that certain plans in which it participated were in critical status, as defined in Section 432 of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"). As a result, the Company could have been subject to increased contribution rates associated with these plans or other MEPPs suffering from declines in their funding levels. Due to the significantly underfunded status of the United States multiemployer plans and the potential increased contribution rates, the Company withdrew from participation in these multiemployer plans and has replaced these pension benefits with a Company-sponsored "pay as you go" defined contribution plan, which is historically the form of retirement benefit provided to the Company's employees. As of December 31, 2019, the Company estimates and has recorded in its financial statements a pre-tax withdrawal liability for all United States MEPPs of \$44.1 million in the aggregate. The Company is scheduled to make payments to the GCIU and GCC until April 2032 and February 2024, respectively.

The Company may not be able to utilize deferred tax assets to offset future taxable income.

As of December 31, 2019, the Company had deferred tax assets, net of valuation allowances, of \$192.9 million. The Company expects to utilize the deferred tax assets to reduce consolidated income tax liabilities in future taxable years. However, the Company may not be able to fully utilize the deferred tax assets if its future taxable income and related income tax liability is insufficient to permit their use. In addition, in the future, the Company may be required to record a valuation allowance against the deferred tax assets if the Company believes it is unable to utilize them, which would have an adverse effect on the Company's results of operations and financial position.

The Company may be adversely affected by strikes and other labor protests, and catastrophic events.

As of December 31, 2019, the Company had a total of approximately 19,600 full-time equivalent employees, of which approximately 1,600 were covered by an industry wide agreement, a collective bargaining agreement or through a works council or similar arrangement. As of December 31, 2019, the Company had four collective bargaining agreements in the United States and seven agreements outside of the United States that are either industry-wide individual collective bargaining agreements or works councils or similar arrangements.

While the Company believes its employee relations are good and that the Company maintains an employeecentric culture, and there has not been any material disruption in operations resulting from labor disputes, the Company cannot be certain that it will be able to maintain a productive and efficient labor environment. The Company cannot predict the outcome of any future negotiations relating to the renewal of the collective bargaining agreements, nor can there be any assurance that work stoppages, strikes or other forms of labor protests pending the outcome of any future negotiations will not occur.

A strike or other forms of labor protest affecting a series of major plants in the future, natural disasters, conflicts, wars, terrorist attacks, fires or other catastrophic events affecting the Company's plants, distribution centers or other facilities, could materially disrupt the Company's operations and result in an adverse impact on its financial condition, results of operations and cash flows, which could force the Company to reassess its strategic alternatives involving certain of its operations.

Unfavorable outcomes in legal proceedings could result in substantial costs and may harm the Company's financial condition.

The Company's financial condition may be affected by the outcome of pending and future litigation, claims, investigations, legal and administrative cases and proceedings, whether civil or criminal, or lawsuits by governmental agencies or private parties. For example, in late 2019, two substantially similar actions, which have now been consolidated, were filed by purported shareholders against the Company and certain of the Company's officers alleging that the Company and those officers misrepresented and/or omitted material information in the Company's public filings prior to the earnings release for the third quarter of 2019, rendering statements therein allegedly false and misleading and in violation of the Securities Exchange Act of 1934 and related regulations. The actions seek to recover unspecified damages, and costs and expenses, including attorneys' and expert fees. Even if the lawsuits are without merit, defending against these claims, any similar future litigation, or any other legal proceedings to which the Company is subject, can result in substantial costs and divert management time and resources. An adverse judgment could result in monetary damages, which could have a negative impact on the Company's liquidity and financial condition and/or cause significant reputational harm to the Company's business.

Item 1B. <u>Unresolved Staff Comments</u>

The Company has no unresolved staff comments to report pursuant to this item.

Item 2. <u>Properties</u>

Quad's corporate office is located in Sussex, Wisconsin. The Company owned or leased 141 facilities located in 14 countries including manufacturing operations, warehouses and office space totaling approximately 25,324,000 square feet, of which approximately 18,605,000 is owned space and approximately 6,719,000 is leased space as of December 31, 2019. In addition to these owned and leased facilities, the Company has more than 75 client-based marketing on-site locations, as well as investments in printing operations located in Brazil and India.

Within the United States Print and Related Services segment, the Company operated 48 owned or leased manufacturing facilities, encompassing approximately 19,677,000 square feet as of December 31, 2019. Within the International segment, the Company operated eight owned or leased manufacturing facilities, encompassing approximately 1,829,000 square feet as of December 31, 2019. The following table lists the Company's operating locations with manufacturing facilities totaling over 500,000 square feet as of December 31, 2019:

Locations	Square Feet	Property Type	Segment
Lomira, Wisconsin, United States	2,174,000	Owned	United States Print and Related Services
Martinsburg, West Virginia, United States	2,123,000	Owned	United States Print and Related Services
Sussex, Wisconsin, United States.	1,970,000	Owned	United States Print and Related Services
Hartford, Wisconsin, United States	1,682,000	Owned	United States Print and Related Services
Oklahoma City, Oklahoma, United States	1,128,000	Owned	United States Print and Related Services
Versailles, Kentucky, United States (1)	1,065,000	Owned	United States Print and Related Services
Saratoga Springs, New York, United States	1,034,000	Owned	United States Print and Related Services
West Allis, Wisconsin, United States	913,000	Owned	United States Print and Related Services
The Rock, Georgia, United States	797,000	Owned	United States Print and Related Services
Wyszkow, Poland	709,000	Owned	International
Effingham, Illinois, United States	564,000	Owned	United States Print and Related Services
Merced, California, United States	539,000	Owned	United States Print and Related Services

⁽¹⁾ The Company has committed to a plan to sell its United States Book business, which includes the facility in Versailles, Kentucky.

Item 3. Legal Proceedings

The Company is subject to various legal actions, administrative proceedings and claims arising out of the ordinary course of business. The Company believes that such unresolved legal actions, proceedings and claims will not materially adversely affect its results of operations, financial condition or cash flows. For additional information, see Note 11, "Commitments and Contingencies — Litigation," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K.

Item 4. <u>Mine Safety Disclosures</u>

Not applicable.

PART II

Item 5. <u>Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of</u> <u>Equity Securities</u>

Capital Stock and Dividends

Quad's authorized capital stock consists of 105.0 million shares of class A stock, 80.0 million shares of class B stock, 20.0 million shares of class C common stock and 0.5 million shares of preferred stock. The Company's outstanding capital stock as of December 31, 2019, consisted of 39.2 million shares of class A stock, 13.5 million shares of class B stock and no shares of class C common stock or preferred stock. As of January 31, 2020, there were 2,526 record holders of the class A stock and 21 record holders of the class B stock.

The Company's class A stock is listed on the NYSE under the symbol "QUAD". The class A stock is entitled to one vote per share. The Company's class B stock is held by certain members of the Quadracci family or trusts for their benefit (and can only be voluntarily transferred to the Company or to a member of the Quadracci "family group" as defined in the Company's Articles of Incorporation; and any transfer in violation of the Company's Articles of Incorporation results in the automatic conversion of such class B stock into class A stock). The class B stock is entitled to ten votes per share. Each share of class B stock may, at the option of the holder, be converted at any time into one share of class A stock. There is no public trading market for the class B stock. The Company has paid quarterly dividends for each class of common stock then outstanding during the years ended December 31, 2019, 2018 and 2017.

Pursuant to the Company's Articles of Incorporation, each outstanding class of common stock has equal rights with respect to cash dividends. Pursuant to the Company's debt facilities, the Company is subject to limitations on dividends and repurchases of capital stock. If the Company's Total Net Leverage Ratio is greater than 2.75 to 1.00 (as defined in the Company's Senior Secured Credit Facility), the Company is prohibited from making greater than \$120.0 million of annual dividend payments, capital stock repurchases and certain other payments. If the Total Net Leverage Ratio is less than 2.75 to 1.00, there are no such restrictions. As the Company's Total Net Leverage ratio as of December 31, 2019, was 3.01 to 1.00, the limitations described above are currently applicable.

Securities Authorized For Issuance Under Equity Compensation Plans

See Part III, Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters," of this Annual Report on Form 10-K for certain information regarding the Company's equity compensation plans.

Issuer Purchases of Equity Securities

Information about the Company's repurchases of its class A stock during the three months ended December 31, 2019, were as follows:

		Issuer Purchases of	f Equity Securities	
Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽²⁾
October 1, 2019 to October 31, 2019	_			100,000,000
November 1, 2019 to November 30, 2019	—	—	—	100,000,000
December 1, 2019 to December 31, 2019.	—	—	—	100,000,000
Total				

(1) Represents shares of the Company's class A stock.

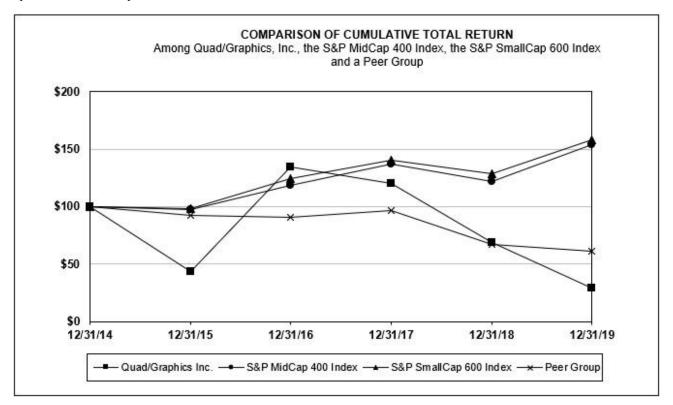

(2) On September 6, 2011, the Company's Board of Directors authorized a share repurchase program of up to \$100.0 million of the Company's outstanding class A stock. On July 30, 2018, the Company's Board of Directors discontinued the remainder of the September 6, 2011 share repurchase program and authorized a new share repurchase program of up to \$100.0 million of the Company's outstanding class A stock. Under the authorization, share repurchases may be made at the Company's discretion, from time to time, in the open market and/or in privately negotiated transactions as permitted by federal securities laws and other legal requirements. The timing, manner, price and amount of any repurchase will depend on economic and market conditions, share price, trading volume, applicable legal requirements and other factors. The program may be suspended or discontinued at any time.

There were no shares of the Company's class A stock repurchased during the year ended December 31, 2019. During the year ended December 31, 2018, the Company repurchased 1,871,631 shares of its class A stock at a weighted average price of \$19.59 per share for a total purchase price of \$36.7 million. During the year ended December 31, 2017, the Company repurchased 200,605 shares of its class A stock at a weighted average price of \$18.89 per share for a total purchase price of \$3.8 million. As of December 31, 2019, there were \$100.0 million of authorized repurchases remaining under the program.

Stock Performance Information

The following graph compares cumulative shareholder return on Quad's class A stock since December 31, 2014, as compared to the Standard & Poor's ("S&P") MidCap 400 Index, the S&P SmallCap 600 Index and a selected peer group of companies over the same period. Due to the diversity of its product and service offerings, the Company does not believe that any single published industry index is appropriate for comparing stockholder return. As such, the Company has compiled a peer group to use in the below performance graph, incorporating companies from different industries, including commercial printing, marketing services and publishing. The stock performance graph has been updated to include the S&P SmallCap 600 Index, which will replace the S&P MidCap 400 Index next year, to better reflect the Company's current market capitalization.

The graph assumes a \$100.00 investment and that all dividends are reinvested. The returns of each peer group company have been weighted to reflect their relative market capitalizations. The comparison in the graph below is based upon historical stock performance and should not be considered indicative of future stockholder returns.

Indexed Returns

R.R. Donnelley & Sons Co. ^(b)	Scholastic Corp.
Gannett Co., Inc. ^(c)	John Wiley & Sons, Inc.
Harte Hanks, Inc.	

(a) Included through September 7, 2018, when Cenveo ceased trading due to bankruptcy.

(b) Adjusted for reverse split and spin offs of LSC Communications, Inc. and Donnelley Financial Solutions, Inc.

⁽c) Included from June 23, 2015, when Gannett Co., Inc. spun off from its parent company

⁽d) Included from October 1, 2016, when LSC Communications, Inc. spun off from R.R. Donnelley & Sons Co.

Item 6. **Selected Financial Data**

The selected consolidated statements of operations data for the years ended December 31, 2019, 2018 and 2017, and the selected consolidated balance sheets data at December 31, 2019 and 2018, are derived from the audited consolidated financial statements of the Company included in Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K. The selected financial data includes the results of operations of acquired businesses prospectively from their respective acquisition dates. For additional information related to the Company's acquisition activity, see Note 3, "Acquisitions and Strategic Investments," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K. The selected consolidated statements of operations data for the years ended December 31, 2016 and 2015, and the consolidated balance sheets data at December 31, 2017, 2016 and 2015, are derived from audited consolidated financial statements not included herein. The results of operations of the Company's United States Book business ("Book business") have been reported as discontinued operations for the years ended December 31, 2019, 2018, and 2017, in accordance with Accounting Standards Codification ("ASC") 205-20 — Discontinued Operations. The effects of the results of operations and balance sheet information for discontinued operations of the Book business have not been reflected in the selected financial data for the years ended December 31, 2016 and 2015. As a result of this, comparability in the Selected Financial Data table below may be limited.

SELECTED FINANCIAL DATA

(1)Includes restructuring, impairment and transaction-related charges of \$89.4 million, \$103.3 million, \$59.9 million, \$73.6 million and \$164.9 million for the years ended December 31, 2019, 2018, 2017, 2016 and 2015, respectively.

Includes goodwill impairment charges of \$808.3 million (\$542.4 million, net of tax) for the year ended December 31, 2015.

Includes a \$28.8 million net income tax benefit recorded during the year ended December 31, 2017, as a result of the 2017 Tax Cuts and Jobs Act (the "Tax Act"). See Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and Note 14, "Income Taxes," to the Company's consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for further discussion.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Following discussion of the financial condition and results of operations of Quad should be read together with Quad's audited consolidated financial statements for each of the three years in the period ended December 31, 2019, including the notes thereto, included in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K. This discussion contains forward-looking statements that reflect the Company's plans, estimates and beliefs. The Company's actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to these differences include, but are not limited to, those discussed in "Forward-Looking Statements" and Part I, Item 1A, "Risk Factors," included earlier within this Annual Report on Form 10-K.

Management's discussion and analysis of financial condition and results of operations is provided as a supplement to the Company's consolidated financial statements and accompanying notes to help provide an understanding of the Company's financial condition, the changes in the Company's financial condition and the Company's results of operations. This discussion and analysis is organized as follows:

- *Overview.* This section includes a general description of the Company's business and segments, an overview of key performance metrics the Company's management measures and utilizes to evaluate business performance, and an overview of trends affecting the Company, including management's actions related to the trends.
- *Results of Operations*. This section contains an analysis of the Company's results of operations by comparing the results for (1) the year ended December 31, 2019, to the year ended December 31, 2018; and (2) the year ended December 31, 2018, to the year ended December 31, 2017. The comparability of the Company's results of operations between periods was impacted by acquisitions, strategic investments and divestitures, including the 2019 acquisition of Periscope; and the 2018 acquisition of Ivie and the strategic investment in Rise. The results of operations of these acquisitions and investments are included in the Company's consolidated results prospectively from their respective dates of acquisition or consolidation. The results of the Company's United States Book business have been reported as discontinued operations for all periods presented. Forward-looking statements providing a general description of recent and projected industry and Company developments that are important to understanding the Company's results of operations. This section also provides a discussion of EBITDA and EBITDA margin, financial measures that the Company uses to assess the performance of its business that are not prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").
- Liquidity and Capital Resources. This section provides an analysis of the Company's capitalization, cash
 flows, a statement about off-balance sheet arrangements and a discussion and table of outstanding debt and
 commitments. Forward-looking statements important to understanding the Company's financial condition
 are included in this section. This section also provides a discussion of Free Cash Flow and Debt Leverage
 Ratio, non-GAAP financial measures that the Company uses to assess liquidity and capital allocation and
 deployment.
- *Critical Accounting Policies and Estimates.* This section contains a discussion of the accounting policies that the Company's management believes are important to the Company's financial condition and results of operations, as well as allowances and reserves that require significant judgment and estimates on the part of the Company's management. In addition, all of the Company's significant accounting policies, including critical accounting policies, are summarized in Note 1, "Basis of Presentation and Summary of Significant Accounting Policies," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K.

Overview

Business Overview

Quad is a worldwide marketing solutions partner dedicated to creating a better way for its clients through a data-driven, integrated marketing platform that helps reduce complexity, increase efficiency and enhance marketing spend effectiveness.

For a full description of the Company's business overview, refer to Part I, Item 1, "Business," of this Annual Report on Form 10-K.

The Company's operating and reportable segments are aligned with how the chief operating decision maker of the Company currently manages the business. The Company's operating and reportable segments, including their product and service offerings, and a "Corporate" category, are summarized below.

The United States Print and Related Services segment is predominantly comprised of the Company's United States printing operations and is managed as one integrated platform. This includes retail inserts, publications, catalogs, special interest publications, journals, direct mail, directories, in-store marketing and promotion, packaging, newspapers, custom print products, other commercial and specialty printed products and global paper procurement, together with marketing and other complementary services, including consumer insights, audience targeting, personalization, media planning and placement, process optimization, campaign planning and creation, pre-media production, videography, photography, digital execution, print execution and logistics. This segment also includes the manufacture of ink. The United States Print and Related Services segment accounted for approximately 90% of the Company's consolidated net sales during the year ended December 31, 2019.

The International segment consists of the Company's printing operations in Europe and Latin America, including operations in England, France, Germany, Poland, Argentina, Colombia, Mexico and Peru, as well as investments in printing operations in Brazil and India. This segment provides printed products and marketing and other complementary services consistent with the United States Print and Related Services segment. The International segment accounted for approximately 10% of the Company's consolidated net sales during the year ended December 31, 2019.

Corporate consists of unallocated general and administrative activities and associated expenses including, in part, executive, legal and finance, as well as certain expenses and income from frozen employee retirement plans, such as pension benefit plans.

Key Performance Metrics Overview

The Company's management believes the ability to generate net sales growth, profit increases and positive cash flow, while maintaining the appropriate level of debt, are key indicators of the successful execution of the Company's business strategy and will increase shareholder value. The Company uses period-over-period net sales growth, EBITDA, EBITDA margin, net cash provided by operating activities, Free Cash Flow and Debt Leverage Ratio as metrics to measure operating performance, financial condition and liquidity. EBITDA, EBITDA margin, Free Cash Flow and Debt Leverage Ratio are non-GAAP financial measures (see the definitions of EBITDA, EBITDA margin and the reconciliation of net earnings (loss) attributable to Quad common shareholders to EBITDA in the "Results of Operations" section below, and see the definitions of Free Cash Flow and Debt Leverage Ratio, the reconciliation of net cash provided by operating activities to Free Cash Flow, and the calculation of Debt Leverage Ratio in the "Liquidity and Capital Resources" section below).

Net sales growth. The Company uses period-over-period net sales growth as a key performance metric. The Company's management assesses net sales growth based on the ability to generate increased net sales through increased sales to existing clients, sales to new clients, sales of new or expanded solutions to existing and new clients, and opportunities to expand sales through strategic investments, including acquisitions.

EBITDA and EBITDA margin. The Company uses EBITDA and EBITDA margin as metrics to assess operating performance. The Company's management assesses EBITDA and EBITDA margin based on the ability to increase revenues while controlling variable expense growth.

Net cash provided by operating activities. The Company uses net cash provided by operating activities as a metric to assess liquidity. The Company's management assesses net cash provided by operating activities based on the ability to meet recurring cash obligations while increasing available cash to fund cash restructuring requirements related to cost reduction activities, as well as to fund capital expenditures, debt service requirements, World Color Press single employer pension plan contributions, World Color Press MEPPs withdrawal liabilities, acquisitions and other investments in future growth, shareholder dividends and share repurchases. Net cash provided by operating activities can be significantly impacted by the timing of non-recurring or infrequent receipts or expenditures.

Free Cash Flow. The Company uses Free Cash Flow as a metric to assess liquidity and capital deployment. The Company's management assesses Free Cash Flow as a measure to quantify cash available for strengthening the balance sheet (debt and pension liability reduction), for strategic capital allocation and deployment through investments in the business (acquisitions and strategic investments) and for returning capital to the shareholders (dividends and share repurchases). The priorities for capital allocation and deployment will change as circumstances dictate for the business, and Free Cash Flow can be significantly impacted by the Company's restructuring activities and other unusual items.

Debt Leverage Ratio. The Company uses the Debt Leverage Ratio as a metric to assess liquidity and the flexibility of its balance sheet. Consistent with other liquidity metrics, the Company monitors the Debt Leverage Ratio as a measure to determine the appropriate level of debt the Company believes is optimal to operate its business, and accordingly, to quantify debt capacity available for strategic capital allocation and deployment through investments in the business (capital expenditures, acquisitions and strategic investments), for strengthening the balance sheet (pension liability reduction), and for returning capital to the shareholders (dividends and share repurchases). The Company's priorities for capital allocation and deployment will change as circumstances dictate for the business, and the Debt Leverage Ratio can be significantly impacted by the amount and timing of large expenditures requiring debt financing, as well as changes in profitability.

The Company remains disciplined with its debt leverage. The Company's consolidated debt and finance lease obligations increased by \$171 million during the year ended December 31, 2019, primarily to fund the acquisition of Periscope. Since the Company completed the World Color Press acquisition in July 2010, the Company has reduced debt and finance lease obligations by \$627 million and has reduced the obligations for pension, postretirement and MEPPs by \$439 million, for a total obligation reduction since July 2010 of over \$1.0 billion.

Overview of Trends Affecting Quad

As consumer media consumption habits change, marketing services providers face increased demand to offer end-to-end marketing services, from strategy and creative through execution, across all media channels. As new marketing and advertising channels emerge, marketing services providers must expand their services beyond traditional channels such as for television, newspapers, print publications and radio, to digital channels such as mobile, internet search, internet display and video, to create effective multichannel campaigns for their clients. This trend greatly influences Quad's ongoing efforts to redefine the future of integrated marketing and create greater value for its clients who are looking for less complexity, greater transparency and accountability from their business partners.

The Company leverages its data-driven print expertise as part of an integrated marketing platform that helps its clients not only plan and produce marketing programs, but also deploy, manage and measure them across all media channels. Competition in the printing industry remains highly fragmented and intense, and the Company believes that there are indicators of heightened competitive pressures. The industry has excess manufacturing capacity created by continued declines in industry volumes which, in turn, has created accelerated downward pricing pressures. In addition, digital delivery of documents and data, including the online distribution and hosting of media content and mobile technologies, offer alternatives to traditional delivery of printed documents. Increasing consumer acceptance of digital delivery of content has resulted in marketers and publishers allocating their marketing and advertising spend across the expanding selection of digital delivery options, which further reduces printing demand and contributes to print industry

overcapacity. The Company also faces competition from print management firms, which look to streamline processes and reduce the overall print spend of the Company's clients, as well as from strategic marketing firms focused on helping businesses integrate multiple channels into their marketing campaigns.

For a full description of the Company's industry and competition overview, refer to Part I, Item 1, "Business," of this Annual Report on Form 10-K.

The Company believes that a disciplined approach for capital management and a strong balance sheet are critical to be able to invest in profitable growth opportunities and technological advances, thereby providing the highest return for shareholders. Management balances the use of cash between deleveraging the Company's balance sheet (through reduction in debt and pension obligations), compelling investment opportunities (through capital expenditures, acquisitions and strategic investments) and returns to shareholders (through share repurchases and quarterly dividends).

The Company continues to make progress on integrating and streamlining all aspects of its business, thereby lowering its cost structure by consolidating its manufacturing platform into its most efficient facilities, as well as realizing purchasing, mailing and logistics efficiencies by centralizing and consolidating print manufacturing volumes and eliminating redundancies in its administrative and corporate operations. The Company has continued to evolve its manufacturing platform, equipping facilities to be product line agnostic, which enables the Company to maximize equipment utilization. Quad believes that the large plant size of certain of its key printing facilities allows the Company to drive savings in certain product lines (such as publications and catalogs) due to economies of scale and from investments in automation and technology. The Company continues to focus on proactively aligning its cost structure to the realities of the top-line pressures it faces in the printing industry through Lean Manufacturing and sustainable continuous improvement programs. Restructuring actions initiated by the Company beginning in 2010 have resulted in the announcement of 45 plant closures through December 31, 2019.

The Company believes it will continue to drive productivity improvements and sustainable cost reduction initiatives into the future through an engaged workforce and ongoing adoption of the latest manufacturing automation and technology. Through this strategy, the Company believes it can maintain the strongest, most efficient print manufacturing platform to remain a high-quality, low-cost producer.

Integrated distribution with the USPS is an important component of the Company's business. Any material change in the current service levels provided by the USPS could impact the demand that clients have for print services. The USPS continues to experience financial problems. Without increased revenues or action by Congress to reform the USPS' cost structure, these losses will continue into the future. Because of these financial difficulties, the USPS has come under increased pressure to adjust its postal rates and service levels. Additional price increases may result in customers reducing mail volumes and exploring the use of alternative methods for delivering a larger portion of their products, such as continued diversion to the internet and other alternative media channels to ensure that they stay within their expected postage budgets.

Current federal law limits postal rate increases (outside of an "exigent circumstance") to the increase in the CPI. This cap works to ensure funding stability and predictability for mailers. However, that same federal statute requires the PRC to conduct a review of the overall rate-making structure for the USPS. The PRC proposed a new rate-making structure that would provide the USPS with additional pricing flexibility over the current CPI cap, and which may result in a substantially altered rate structure for mailers. Any newly revised rates that would be effective because of new rules issued by the PRC may include a higher rate cap, or potentially the elimination of a rate cap altogether, which will result in no restrictions on the USPS' ability to increase rates from year to year. This may lead to price spikes for mailers and may also reduce the incentive for the USPS to continue to take out costs and instead continue to rely on postage to cover the costs of an outdated postal service that does not reflect the industry's ability or willingness to pay. The result may be reduced demand for printed products as customers may move more aggressively into other delivery methods, such as the many digital and mobile options now available to consumers.

The Company has invested significantly in its mail preparation and distribution capabilities to mitigate the impact of increases in postage costs, and to help clients successfully navigate the ever-changing postal environment. Through its data analytics, unique software to merge mail streams on a large scale, advanced finishing capabilities and technology, and in-house transportation and logistics operations, the Company manages the mail preparation and distribution of most of its clients' products to maximize efficiency, to enable on-time and consistent delivery and to partially reduce these costs; however, the net impact of increasing postal costs may create a decrease in client demand for print and mail products.

In 2019, the Company continued to focus on building out its integrated marketing platform by acquiring Minneapolis-based creative agency, Periscope, on January 3, 2019, for a purchase price of \$121 million, excluding acquired cash and non-cash equity awards granted. Periscope's comprehensive offering includes media buying and analytics, creative and account management, as well as packaging design and premedia services that complement Quad's print-production capabilities. With Periscope, the Company has a highly efficient global platform for creating marketing campaigns and programs, from strategy and creative through execution, across all media channels. This integrated, end-to-end marketing platform creates more value for clients than the traditional agency approach that operates in silos by reducing complexity and improving process efficiencies and marketing spend effectiveness.

Throughout 2019, the Company also continued to make strategic investments in its manufacturing platform as part of its ongoing commitment to maintaining the most efficient, automated and dependable manufacturing and distribution platform in the printing industry. These investments, which included digital press technology to help clients gain a competitive edge with data-driven, personalized print marketing and quick-makeready wide-web offset press technology, automated guided vehicles (driverless fork trucks) and automated palletizers at the end of finishing lines that enhance productivity and offset labor shortages, help Quad sustain its position as a high-quality, low-cost producer.

During the third quarter of 2019, the Company made the decision to sell its Book business as a part of an ongoing process to review its business portfolio and divest assets not core to its transformation strategy. Accordingly, the Company has classified the Book business as assets and liabilities held for sale and as a discontinued operation in accordance with ASC 205-20 — *Discontinued Operations*. The Book business consists of three facilities: Versailles, Kentucky; Fairfield, Pennsylvania; and Martinsburg, West Virginia. The Company's Book business has historically been included within the United States Print and Related Services segment and the Core Print and Related Services reporting unit.

Results of Operations for the Year Ended December 31, 2019, Compared to the Year Ended December 31, 2018

Summary Results

The Company's operating income from continuing operations, operating margin, net earnings (loss) attributable to Quad common shareholders (computed using a 25% normalized tax rate for all items subject to tax) and diluted earnings (loss) per share attributable to Quad common shareholders for the year ended December 31, 2019, changed from the year ended December 31, 2018, as follows (dollars in millions, except per share data):

	Operating Income from Continuing Operations	Operating Margin	Net Earnings (Loss) Attributable to Quad Common Shareholders	Diluted Earnings (Loss) Per Share Attributable to Quad Common Shareholders
For the year ended December 31, 2018	\$ 87.3	2.2 %	\$ 8.5	\$ 0.16
Restructuring, impairment and transaction-related charges ⁽¹⁾	13.9	0.3 %	10.4	0.16
Interest expense ⁽²⁾	N/A	N/A	(12.6)	(0.29)
Net pension income ⁽³⁾	N/A	N/A	(4.8)	(0.09)
2019 loss on debt extinguishment ⁽⁴⁾	N/A	N/A	(22.9)	(0.46)
Income taxes ⁽⁵⁾	N/A	N/A	(4.6)	(0.09)
Loss from discontinued operations, net of tax ⁽⁶⁾	N/A	N/A	(78.6)	(1.58)
Investments in unconsolidated entity and noncontrolling interests, net of tax $^{(7)}$	N/A	N/A	(1.9)	(0.04)
Operating income from continuing operations ⁽⁸⁾	(66.5)	(1.6)%	(49.8)	(0.89)
For the year ended December 31, 2019	\$ 34.7	0.9 %	\$ (156.3)	\$ (3.12)

⁽¹⁾ Restructuring, impairment and transaction-related charges decreased \$13.9 million (\$10.4 million, net of tax), to \$89.4 million during the year ended December 31, 2019, and included the following:

- a. A \$0.8 million decrease in employee termination charges from \$23.0 million during the year ended December 31, 2018, to \$22.2 million during the year ended December 31, 2019;
- b. An \$18.3 million decrease in impairment charges from \$26.2 million during the year ended December 31, 2018, to \$7.9 million during the year ended December 31, 2019;
- c. A \$43.4 million increase in transaction-related charges from \$8.2 million during the year ended December 31, 2018, to \$51.6 million during the year ended December 31, 2019;
- d. A \$2.0 million increase in integration-related charges from \$1.3 million during the year ended December 31, 2018, to \$3.3 million during the year ended December 31, 2019; and
- e. A \$40.2 million decrease in various other restructuring charges from \$44.6 million during the year ended December 31, 2018, to \$4.4 million during the year ended December 31, 2019.

The Company expects to incur additional restructuring and integration costs in future reporting periods in connection with eliminating excess manufacturing capacity and properly aligning its cost structure in conjunction with the Company's acquisitions and strategic investments, and other cost reduction programs.

⁽²⁾ Interest expense increased \$16.8 million (\$12.6 million, net of tax) during the year ended December 31, 2019, to \$90.0 million. This change was due to a higher weighted average interest rate on borrowings and higher average debt levels during the year ended December 31, 2019, as compared to the year ended December 31, 2018.

- ⁽³⁾ Net pension income decreased \$6.4 million (\$4.8 million, net of tax) during the year ended December 31, 2019, to \$6.0 million. This was due to a \$4.9 million decrease from the change in the expected long-term return on pension plan assets assumption to 6.25% from 6.50%, and a \$1.5 million increase from interest cost on pension plan liabilities.
- ⁽⁴⁾ A \$30.5 million loss on debt extinguishment (\$22.9 million, net of tax) was recognized during the year ended December 31, 2019 and includes \$15.9 million relating to the third amendment to the Company's Senior Secured Credit Facility, completed on January 31, 2019; and \$14.6 million relating to the retirement of the Term Loan B, completed on July 26, 2019.
- (5) The \$4.6 million decrease in income tax benefit as calculated in the following table is primarily due to a \$6.1 million decreased tax benefit from a decrease in the Company's liability for unrecognized tax benefits in 2018 that did not repeat in 2019, partially offset by a \$1.3 million tax benefit related to the deductibility of acquisition-related transaction costs:

	Year Ended December 31,					
-		2019		2018	\$	Change
Earnings (loss) from continuing operations before income taxes and equity in (earnings) loss of unconsolidated entity	\$	(79.8)	\$	26.5	\$	(106.3)
Normalized tax rate		25.0%		25.0%		
Income tax expense (benefit) at normalized tax rate		(20.0)		6.6		(26.6)
Less: Income tax benefit from the consolidated statements of operations		(24.4)		(2.4)		(22.0)
Impact of income taxes	\$	4.4	\$	9.0	\$	(4.6)

(6) The increase in loss from discontinued operations, net of tax, of \$78.6 million during the year ended December 31, 2019, was primarily due to a \$91.8 million increase in restructuring, impairment and transaction-related charges during the year ended December 31, 2019, to reduce the carrying value of the Book business to its fair value, including an \$86.5 million impairment of tangible property, plant and equipment and a \$5.6 million impairment of contract assets. The Company also recorded a \$10.1 million goodwill impairment charge during the year ended December 31, 2019, due to the carrying value of the Book business net assets exceeding the estimated fair value. The increase in loss was partially offset by a \$26.4 million increase in income tax benefit.

- (7) The decrease from investments in unconsolidated entity and noncontrolling interests, net of tax, of \$1.9 million during the year ended December 31, 2019, was primarily due to a \$1.3 million decrease in earnings at the Company's investment in Plural Industria Gráfica Ltda. ("Plural"), the Company's Brazilian joint venture, and a \$0.6 million decrease in loss attributed to noncontrolling interests in the Company's consolidated statements of operations related to the Company's 57% ownership of Rise.
- (8) Operating income from continuing operations, excluding restructuring, impairment and transaction-related charges, decreased \$66.5 million (\$49.8 million, net of tax) primarily due to the following: (1) lower print volume, pricing and print service sales; (2) an increase in employee-related costs, primarily due to a \$28.6 million increase in production hourly wages in our most competitive labor markets; (3) a \$26.7 million decrease in paper byproduct recoveries; (4) a \$17.5 million net benefit in 2018 in gains from property insurance claims; (5) a \$8.7 million benefit in 2018 from changes in employee vacation policies; and (6) a \$5.6 million non-cash expense related to a special employee retirement contribution in 2018 resulting from the benefit of tax reform that did not repeat in 2019; (2) savings from cost reduction initiatives; and (3) earnings from the Ivie and Periscope acquisitions and investment in Rise.

Operating Results From Continuing Operations

The following table sets forth certain information from the Company's consolidated statements of operations on an absolute dollar basis and as a relative percentage of total net sales for each noted period, together with the relative percentage change in such information between the periods set forth below:

	Year Ended December 31,							
-	201	2019 2018						
-		(do						
-	Amount	% of Net Sales	Amount	% of Net Sales	\$ Change	% Change		
Net sales:								
Products	\$ 3,098.3	79.0%	\$ 3,184.4	79.9%	\$ (86.1)	(2.7)%		
Services	825.1	21.0%	801.4	20.1%	23.7	3.0 %		
Total net sales	3,923.4	100.0%	3,985.8	100.0%	(62.4)	(1.6)%		
Cost of sales:								
Products	2,615.6	66.7%	2,621.1	65.8%	(5.5)	(0.2)%		
Services	576.6	14.7%	600.3	15.1%	(23.7)	(3.9)%		
Total cost of sales	3,192.2	81.4%	3,221.4	80.9%	(29.2)	(0.9)%		
Selling, general & administrative expenses .	397.6	10.1%	358.9	9.0%	38.7	10.8 %		
Depreciation and amortization	209.5	5.3%	214.9	5.4%	(5.4)	(2.5)%		
Restructuring, impairment and transaction- related charges	89.4	2.3%	103.3	2.5%	(13.9)	(13.5)%		
Total operating expenses	3,888.7	99.1%	3,898.5	97.8%	(9.8)	(0.3)%		
Operating income (loss) from continuing operations	\$ 34.7	0.9%	\$ 87.3	2.2%	\$ (52.6)	(60.3)%		

Net Sales

Product sales decreased \$86.1 million, or 2.7%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$71.5 million decrease in product sales in the Company's print product lines due to ongoing industry volume and pricing pressures and \$22.8 million in unfavorable foreign exchange impacts, primarily in Argentina and Europe; partially offset by a \$8.2 million increase from pass-through paper sales.

Service sales, which primarily consist of logistics, distribution, marketing services, imaging and medical services, increased \$23.7 million, or 3.0%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$78.3 million increase in net sales from the Ivie and Periscope acquisitions and investment in Rise, partially offset by the following: (1) a \$30.1 million decrease of sales of marketing services, primarily print management; (2) an \$18.9 million decrease in print imaging services; (3) a \$4.4 million decrease in sales of QuadMed external medical services; and (4) a \$1.2 million decrease in logistics sales.

Cost of Sales

Cost of product sales decreased \$5.5 million, or 0.2%, for the year ended December 31, 2019, compared with the year ended December 31, 2018, primarily due to the following: (1) lower print volume; (2) cost reduction initiatives; and (3) a \$14.0 million non-cash expense related to a special employee retirement contribution in 2018 that did not repeat in 2019. These decreases were partially offset by the following: (1) an increase in employee-related costs, primarily due to a \$28.6 million increase in production hourly wages in our most competitive labor markets; (2) a \$26.7 million decrease in paper byproduct recoveries; and (3) an \$8.7 million net benefit in 2018 from changes in employee vacation policies.

Cost of product sales as a percentage of net sales increased to 66.7% for the year ended December 31, 2019, from 65.8% for the year ended December 31, 2018, primarily due to the reasons provided above.

Cost of service sales decreased \$23.7 million, or 3.9%, for the year ended December 31, 2019, compared with the year ended December 31, 2018, primarily due to the following: (1) lower print service sales; (2) lower freight costs; and (3) a \$2.6 million non-cash expense related to a special employee retirement contribution in 2018 that did not repeat in 2019. These decreases were partially offset by the Ivie and Periscope acquisitions and the investment in Rise.

Cost of service sales as a percentage of net sales decreased to 14.7% for the year ended December 31, 2019, from 15.1% for the year ended December 31, 2018, primarily due to the reasons provided above.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased \$38.7 million, or 10.8%, for the year ended December 31, 2019, compared with the year ended December 31, 2018, primarily due to the following: (1) a \$17.5 million net benefit in 2018 in gains from property insurance claims; (2) a \$9.6 million increase in employee-related costs; (3) an \$8.3 million increase in legal and environmental charges; (4) a \$5.6 million gain in 2018 from a sales tax litigation settlement in Peru that did not repeat in 2019. These increases were partially offset by a \$5.7 million non-cash expense related to a special employee retirement contribution in 2018 that did not repeat in 2019 and savings from cost reduction initiatives. Selling, general and administrative expenses as a percentage of net sales increased from 9.0% for the year ended December 31, 2018, to 10.1% for the year ended December 31, 2019, primarily due to the reasons stated above.

Depreciation and Amortization

Depreciation and amortization decreased \$5.4 million, or 2.5%, for the year ended December 31, 2019, compared with the year ended December 31, 2018, due to a \$15.8 million decrease in depreciation expense from property, plant and equipment becoming fully depreciated over the past year, partially offset by a \$10.4 million increase in amortization expense, primarily related to amortization expense for intangible assets acquired in the Ivie acquisition and the investment in Rise.

Restructuring, Impairment and Transaction-Related Charges

Restructuring, impairment and transaction-related charges decreased \$13.9 million, or 13.5%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to the following:

	Year Ended l		
—	2019	2018	\$ Change
Employee termination charges	22.2	\$ 23.0	\$ (0.8)
Impairment charges ^(a)	7.9	26.2	(18.3)
Transaction-related charges ^(b)	51.6	8.2	43.4
Integration costs	3.3	1.3	2.0
Other restructuring charges			
Vacant facility carrying costs and lease exit charges	9.5	16.9	(7.4)
Equipment and infrastructure removal costs	0.4	1.4	(1.0)
Gains on the sale of facilities ^(c)	(6.1)	(17.3)	11.2
Other restructuring activities ^(d)	0.6	43.6	(43.0)
Other restructuring charges	4.4	44.6	(40.2)
Total restructuring, impairment and transaction-related charges \$	89.4	\$ 103.3	\$ (13.9)

(a) Includes \$7.6 million and \$21.6 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, as well as other capacity reduction restructuring activities during the years ended December 31, 2019 and 2018, respectively; and \$0.3 million and \$4.6 million of land and building impairment charges during the years ended December 31, 2019 and 2018, respectively.

^(b) Includes a \$45.0 million reverse termination fee paid during the year ended December 31, 2019, in connection with the termination of the definitive agreement pursuant to which Quad would have acquired LSC, and includes \$6.4 million in transaction-related charges related to the then proposed acquisition of LSC during the year ended December 31, 2018.

^(c) Includes a \$2.5 million gain on the sale of the Franklin, Kentucky facility and a \$3.5 million gain on the sale of the Hazleton, Pennsylvania facility during the year ended December 31, 2019; and a \$7.5 million gain on the sale of the Taunton, Massachusetts Book facility, a \$7.0 million gain on the sale of the Dallas, Texas facility, and a \$2.2 million gain on the sale of the San Ixhuatepec, Mexico facility during the year ended December 31, 2018.

^(d) Includes \$2.3 million in charges related to a value-added tax assessment for a closed facility, as well as other restructuring activities, net of an \$8.4 million gain on the sale of a business during the year ended December 31, 2019; and includes a \$32.1 million increase to the Company's MEPPs withdrawal liability, as well as \$10.0 million in charges for certain legal matters and customer contract penalties related to the Company's operations in Peru during the year ended December 31, 2018.

EBITDA and EBITDA Margin—Consolidated

EBITDA is defined as net earnings (loss) attributable to Quad common shareholders, excluding (1) interest expense, (2) income tax expense (benefit) and (3) depreciation and amortization. EBITDA margin represents EBITDA as a percentage of net sales. EBITDA and EBITDA margin are presented to provide additional information regarding Quad's performance. Both are important measures by which Quad gauges the profitability and assesses the performance of its business. EBITDA and EBITDA margin are non-GAAP financial measures and should not be considered alternatives to net earnings (loss) as a measure of operating performance, or to cash flows provided by operating activities as a measure of liquidity. Quad's calculation of EBITDA and EBITDA margin may be different from the calculations used by other companies, and therefore, comparability may be limited.

EBITDA and EBITDA margin for the year ended December 31, 2019, compared to the year ended December 31, 2018, were as follows:

	Year Ended December 31,									
	20	2019 2018						2019 2018		
	Amount	% of Net Sales	Amount	% of Net Sales						
		(dollars in	millions)							
EBITDA and EBITDA margin (non-GAAP) \$	118.8	3.0%	\$ 294.2	7.4%						

EBITDA decreased \$175.4 million for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to the following: (1) a \$78.6 million increase in loss from discontinued operations, net of tax; (2) lower print volume, pricing and print service sales; (3) an increase in employee-related costs, primarily due to a \$28.6 million increase in production hourly wages in our most competitive labor markets; (4) a \$26.7 million decrease in paper byproduct recoveries; (5) a \$17.5 million net benefit in 2018 in gains from property insurance claims; (6) an \$8.7 million benefit in 2018 from changes in employee vacation policies; and (7) a \$5.6 million gain in 2018 from a sales tax litigation settlement in Peru. These decreases were partially offset by the following: (1) a \$22.3 million non-cash expense related to a special employee retirement contribution in 2018 resulting from the benefit of tax reform that did not repeat in 2019; (2) \$13.9 million of decreased restructuring, impairment and transaction-related charges; (3) savings from cost reduction initiatives; and (4) earnings from the Ivie and Periscope acquisitions and investment in Rise.

A reconciliation of EBITDA to net earnings (loss) attributable to Quad common shareholders for the years ended December 31, 2019 and 2018, was as follows:

	Year Ended I	Decembe	er 31,
—	2019	2	018
—	(dollars in	million	s)
Net earnings (loss) attributable to Quad common shareholders ⁽¹⁾ \$	(156.3)	\$	8.5
Interest expense	90.0		73.2
Income tax benefit	(24.4)		(2.4)
Depreciation and amortization.	209.5		214.9
EBITDA (non-GAAP)	118.8	\$	294.2

⁽¹⁾ Net earnings (loss) attributable to Quad common shareholders included the following:

- a. Restructuring, impairment and transaction-related charges of \$89.4 million and \$103.3 million for the years ended December 31, 2019 and 2018, respectively;
- b. Employee stock ownership plan non-cash expense related to a special employee retirement contribution of \$22.3 million for the year ended December 31, 2018;
- c. Net pension income of \$6.0 million and \$12.4 million for the years ended December 31, 2019 and 2018, respectively;
- d. Loss on debt extinguishment of \$30.5 million for the year ended December 31, 2019;
- e. Equity in loss of unconsolidated entity of \$0.3 million and equity in earnings of unconsolidated entity of \$1.0 million for the years ended December 31, 2019 and 2018, respectively;
- f. Loss from discontinued operations, net of tax, of \$100.6 million and \$22.0 million for the years ended December 31, 2019 and 2018, respectively; and
- g. Net loss attributable to noncontrolling interests of \$0.6 million for the year ended December 31, 2018.

United States Print and Related Services

The following table summarizes net sales, operating income from continuing operations, operating margin and certain items impacting comparability within the United States Print and Related Services segment:

	Ŋ	Year Ended December 31,					
		2019		2018			
		(dolla	rs in million	s)		
		Amount		Amount	\$	Change	% Change
Net sales:							
Products	\$	2,713.3	\$	2,815.9	\$	(102.6)	(3.6)%
Services		807.7		782.8		24.9	3.2 %
Operating income from continuing operations (including restructuring, impairment and transaction-related charges)		130.1		183.3		(53.2)	(29.0)%
Operating margin		3.7%		5.1%		N/A	N/A
Restructuring, impairment and transaction-related charges	\$	24.6	\$	37.5	\$	(12.9)	(34.4)%

Net Sales

Product sales for the United States Print and Related Services segment decreased \$102.6 million, or 3.6%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$92.5 million decrease in product sales in the Company's print product lines due to ongoing industry volume and pricing pressures and a \$10.1 million decrease from pass-through paper sales.

Service sales for the United States Print and Related Services segment increased \$24.9 million, or 3.2%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a a \$78.3 million increase in net sales from the Ivie and Periscope acquisitions and investment in Rise and a \$0.4 million increase in logistics sales, partially offset by the following: (1) a \$30.5 million decrease of sales of marketing services, primarily print management; (2) an \$18.9 million decrease in print imaging services; and (3) a \$4.4 million decrease in sales of QuadMed external medical services.

Operating Income from Continuing Operations

Operating income from continuing operations for the United States Print and Related Services segment decreased \$53.2 million, or 29.0%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to the following: (1) lower print volume and pricing due to ongoing industry pressures; (2) an increase in employee-related costs, primarily due to a \$28.6 million increase in production hourly wages in our most competitive labor markets; (3) a \$26.7 million decrease in paper byproduct recoveries; (4) a \$17.5 million net benefit in 2018 in gains from property insurance claims; (5) lower print service sales; and (6) a \$8.7 million benefit in 2018 from the change in employee vacation policies. These impacts were partially offset by the following: (1) a \$21.9 million non-cash expense related to a special employee retirement contribution in 2018; (2) a \$12.9 million decrease in restructuring, impairment and transaction-related charges; (3) savings from cost reduction initiatives, including employee-related costs; and (4) earnings from the Ivie and Periscope acquisitions and the investment in Rise.

The operating margin for the United States Print and Related Services segment decreased to 3.7% for the year ended December 31, 2019, from 5.1% for the year ended December 31, 2018, primarily due to the reasons provided above.

Restructuring, Impairment and Transaction-Related Charges

Restructuring, impairment and transaction-related charges for the United States Print and Related Services segment decreased \$12.9 million, or 34.4%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to the following:

	Year Ended		
	2019	2018	\$ Change
Employee termination charges	\$ 20.9	\$ 16.1	\$ 4.8
Impairment charges ^(a)	4.5	18.0	(13.5)
Transaction-related charges	—	0.1	(0.1)
Integration costs	3.3	1.3	2.0
Other restructuring charges ^(b)	(4.1)	2.0	(6.1)
Total restructuring, impairment and transaction-related charges	\$ 24.6	\$ 37.5	\$ (12.9)

(a) Includes \$4.5 million and \$15.8 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, as well as other capacity reduction restructuring activities during the years ended December 31, 2019 and 2018, respectively;and \$2.2 million of land and building impairment charges during the year ended December 31, 2018.

⁽b) Includes a \$2.5 million gain on the sale of the Franklin, Kentucky facility, a \$3.5 million gain on the sale of the Hazleton, Pennsylvania facility and an \$8.4 million gain on the sale of a business during the year ended December 31, 2019; and a \$7.5 million gain on the sale of the Taunton, Massachusetts Book facility and a \$7.0 million gain on the sale of the Dallas, Texas facility during the year ended December 31, 2018.

International

The following table summarizes net sales, operating income from continuing operations, operating margin, certain items impacting comparability and equity in loss of unconsolidated entities within the International segment:

	Year Ended December 31,						
		2019		2018			
		(dollar	s in million	s)		
	A	mount	A	mount	\$ (Change	% Change
Net sales:							
Products	\$	385.0	\$	368.5	\$	16.5	4.5 %
Services		17.4		18.6		(1.2)	(6.5)%
Operating income (including restructuring, impairment and transaction-related charges).		8.6		1.5		7.1	473.3 %
Operating margin.		2.1%		0.4%		N/A	N/A
Restructuring, impairment and transaction-related charges	\$	10.0	\$	22.2	\$	(12.2)	(55.0)%
Equity in (earnings) loss of unconsolidated entity		0.3		(1.0)		1.3	(130.0)%

Net Sales

Product sales for the International segment increased \$16.5 million, or 4.5%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$21.0 million increase in volume, primarily in Europe, Peru and Mexico and an \$18.3 million increase in pass-through paper sales, partially offset by \$22.8 million in unfavorable foreign exchange impacts, primarily in Argentina and Europe.

Service sales for the International segment decreased \$1.2 million, or 6.5%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$1.6 million decrease in logistics revenue in Europe, partially offset by a \$0.4 million increase in marketing service sales.

Operating Income from Continuing Operations

Operating income from continuing operations for the International segment increased \$7.1 million for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$12.2 million decrease in restructuring and impairment expenses, partially offset by a \$5.6 million gain in 2018 from a sales tax litigation settlement in Peru.

Restructuring, Impairment and Transaction-Related Charges

Restructuring, impairment and transaction-related charges for the International segment decreased \$12.2 million, or 55.0%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to the following:

	Year Ended		
	2019	2018	\$ Change
Employee termination charges	\$ 1.3	\$ 3.7	7 \$ (2.4)
Impairment charges ^(a)	0.4	8.2	2 (7.8)
Other restructuring charges ^(b)	8.3	10.3	3 (2.0)
Total restructuring, impairment and transaction-related charges	\$ 10.0	\$ 22.2	2 \$ (12.2)

⁽a) Includes \$5.8 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, as well as other capacity reduction restructuring activities, including \$5.0 million of impairment charges for machinery and equipment in Peru during the year ended December 31, 2018; and \$0.3 million and \$2.4 million of land and building impairment charges during the years ended December 31, 2019 and December 31, 2018, respectively.

(b) Includes \$2.3 million in charges related to a value-added tax assessment for a closed facility during the year ended December 31, 2019, and \$10.0 million in charges for certain legal matters and customer contract penalties related to the Company's operations in Peru, net of a \$2.2 million gain on the sale of the San Ixhuatepec, Mexico facility during the year ended December 31, 2018.

Equity in (Earnings) Loss of Unconsolidated Entities

Investments in entities where Quad has the ability to exert significant influence, but not control, are accounted for using the equity method of accounting. The Company holds a 49% ownership interest in Plural, a commercial printer based in São Paulo, Brazil. The equity in earnings of unconsolidated entity in the International segment decreased \$1.3 million for the year ended December 31, 2019, compared to the year ended December 31, 2018, due to an decrease in earnings at the Company's investment in Plural.

Unrestricted Subsidiaries

As of December 31, 2019, the Company has no unrestricted subsidiaries as defined in the Senior Unsecured Notes indenture.

Corporate

The following table summarizes unallocated operating expenses presented as Corporate:

	Year Ended December 31,									
		2019 2018								
		(dollars in millions)			s)					
		Amount		Amount		Amount \$ Change		\$ Change	% Change	
Operating expenses (including restructuring, impairment and transaction-related charges).	\$	104.0	\$	97.5	\$	6.5	6.7%			
Restructuring, impairment and transaction-related charges		54.8		43.6		11.2	25.7%			

Operating Expenses

Corporate operating expenses increased \$6.5 million, or 6.7%, for the year ended December 31, 2019, compared with the year ended December 31, 2018, primarily due to a \$11.2 million increase in restructuring, impairment and transaction-related charges, partially offset by lower employee-related costs, including \$1.3 million in lower incentive compensation expense and a \$0.4 million non-cash expense related to a special employee retirement contribution in 2018 that did not repeat in 2019.

Restructuring, Impairment and Transaction-Related Charges

Corporate restructuring, impairment and transaction-related charges increased \$11.2 million, or 25.7%, for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to the following:

	Year Ended		
	2019	2018	\$ Change
Employee termination charges	\$	\$ 3.2	\$ (3.2)
Impairment charges ^(a)	3.0	—	3.0
Transaction-related charges ^(b)	51.6	8.1	43.5
Other restructuring charges ^(c)	0.2	32.3	(32.1)
Total restructuring, impairment and transaction-related charges	\$ 54.8	\$ 43.6	\$ 11.2

^(a) Includes \$3.0 million of impairment charges for equipment during the year ended December 31, 2019.

^(b) Includes a \$45.0 million reverse termination fee paid during the year ended December 31, 2019, in connection with the termination of the definitive agreement pursuant to which Quad would have acquired LSC, and includes \$6.4 million in transaction-related charges related to the then proposed acquisition of LSC during the year ended December 31, 2018.

^(c) Includes a \$32.1 million increase to the Company's MEPPs withdrawal liability during the year ended December 31, 2018.

Results of Operations for the Year Ended December 31, 2018, Compared to the Year Ended December 31, 2017

Summary Results

The Company's operating income from continuing operations, operating margin, net earnings attributable to Quad common shareholders and diluted earnings per share attributable to Quad common shareholders for the year ended December 31, 2018, changed from the year ended December 31, 2017, as follows (dollars in millions, except per share data). The information contained in this section has been updated to reflect the impacts of the discontinued operations of the Company's Book business. The effects of the changes on net earnings attributable to Quad common shareholders were computed using a 25% normalized tax rate as adjusted for the Tax Act that was enacted in 2017 for all items subject to tax for the year ended December 31, 2018, and were computed using a 40% normalized tax rate for all items subject to tax for the year ended December 31, 2017, which was the normalized rate used by the Company prior to the enactment of the Tax Act:

	Operating Income from Continuing Operations	Operating Margin	Net Earnings Attributable to Quad Common Shareholders	Diluted Earnings Per Share Attributable to Quad Common Shareholders
For the year ended December 31, 2017	\$ 172.8	4.4 %	\$ 107.2	\$ 2.07
2018 restructuring, impairment and transaction-related charges ⁽¹⁾		(2.6)%	(77.5)	(1.50)
2017 restructuring, impairment and transaction-related charges ⁽²⁾	59.9	1.5 %	35.9	0.69
Interest expense ⁽³⁾	N/A	N/A	(12.3)	(0.24)
Net pension income ⁽⁴⁾	N/A	N/A	3.5	0.07
2017 loss on debt extinguishment ⁽⁵⁾	N/A	N/A	1.6	0.03
Income taxes ⁽⁶⁾	N/A	N/A	(43.8)	(0.85)
Loss from discontinued operations, net of tax ⁽⁷⁾	N/A	N/A	(11.1)	(0.22)
Investments in unconsolidated entity and noncontrolling interests, net of tax $^{(8)}$	N/A	N/A	1.6	0.03
Operating income from continuing operations ⁽⁹⁾	(42.1)	(1.1)%	3.4	0.08
For the year ended December 31, 2018	\$ 87.3	2.2 %	\$ 8.5	\$ 0.16

⁽¹⁾ Restructuring, impairment and transaction-related charges of \$103.3 million (\$77.5 million, net of tax) incurred during the year ended December 31, 2018, included the following:

- a. \$23.0 million of employee termination charges related to workforce reductions through facility consolidations and voluntary and involuntary separation programs;
- b. \$26.2 million of impairment charges, including \$16.6 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Hazleton, Pennsylvania; and Franklin, Kentucky; as well as other capacity and strategic reduction restructuring initiatives, including \$5.0 million of impairment charges for machinery and equipment in Peru; and \$4.6 million of land and building impairment charges, primarily related to the Franklin, Kentucky plant closure;
- c. \$8.2 million of transaction-related charges, consisting of professional service fees for business acquisition and divestiture activities, including \$6.4 million related to the proposed acquisition of LSC;
- d. \$1.3 million of integration costs primarily for the integration of acquired companies; and
- e. \$44.6 million of various other restructuring charges, consisting of a \$32.1 million increase to the Company's MEPPs withdrawal liability, \$10.0 million in charges for certain legal matters and customer contract penalties related to the Company's operations in Peru, and costs to maintain and exit closed facilities. These charges are presented net of

\$17.3 million in gains on the sale of facilities, including a \$7.5 million gain from the sale of the Taunton, Massachusetts Book plant, a \$7.0 million gain from the sale of the Dallas, Texas plant and a \$2.2 million gain from the sale of the San Ixhuatepec, Mexico plant.

- (2) Restructuring, impairment and transaction-related charges of \$59.9 million (\$35.9 million, net of tax) incurred during the year ended December 31, 2017, included the following:
 - a. \$26.4 million of employee termination charges related to workforce reductions through facility consolidations and separation programs;
 - \$12.0 million of impairment charges, including \$6.7 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Columbus, Ohio; and Taunton, Massachusetts, as well as other capacity and strategic reduction restructuring activities; and \$5.3 million of impairment charges for land and building related to the Waseca, Minnesota and Taunton, Massachusetts plant closures;
 - c. \$3.1 million of transaction-related charges, consisting of professional service fees for business acquisition and divestiture activities; and
 - d. \$18.4 million of various other restructuring charges, including costs to maintain and exit closed facilities, as well as lease exit charges, net of \$7.1 million in gains from the sale of the Atglen, Pennsylvania; Dickson, Tennessee; East Greenville, Pennsylvania; Lenexa, Kansas; and Marengo, Iowa plants, and a \$1.2 million gain from the Company's Argentina Subsidiaries' settlements with vendors through bankruptcy proceedings. Other restructuring charges also included a \$6.7 million loss on the sale of a business.
- ⁽³⁾ Interest expense increased \$2.3 million (\$12.3 million, net of tax impact due to the change in the normalized tax rate) during the year ended December 31, 2018, to \$73.2 million. This change was due to a higher weighted average interest rate on borrowings and higher average debt levels during the year ended December 31, 2018, as compared to the year ended December 31, 2017.
- ⁽⁴⁾ Net pension income increased \$2.8 million (\$3.5 million, net of tax impact due to the change in the normalized tax rate) during the year ended December 31, 2018, to \$12.4 million. This change was due to a \$1.3 million decrease from interest cost on pension plan liabilities, a \$0.8 million decrease in settlement charges and a \$0.7 million increase from the expected return on pension plan assets.
- ⁽⁵⁾ A \$2.6 million loss on debt extinguishment (\$1.6 million, net of tax) was recognized during the year ended December 31, 2017, from the refinancing of the Senior Secured Credit Facility, completed on February 10, 2017.
- ⁽⁶⁾ The \$43.8 million decrease in income tax benefit from continuing operations as calculated in the following table is primarily due to a \$28.8 million tax benefit related to the reduced federal rate applied to net domestic deferred tax liabilities in accordance with the Tax Act and a \$13.1 million decreased net tax benefit from the release of valuation allowances related to foreign operations. See Note 14, "Income Taxes," to the consolidated financial statements in Part II, Item 8 of this Annual Report on Form 10-K for further information on income taxes.

	Year Ended December 31,					
		2018		2017	\$	Change
Earnings (loss) from continuing operations before income taxes and equity in loss of unconsolidated entity	\$	26.5	\$	108.9	\$	(82.4)
Normalized tax rate in 2017		40.0%		40.0%		40.0%
Income tax expense at normalized tax rate in 2017		10.6		43.6		(33.0)
Impact of change in normalized tax rate to 25% in 2018		(4.0)		_		(4.0)
Income tax expense at normalized tax rate of 25% in 2018 and 40% in 2017		6.6		43.6		(37.0)
Less: Income tax benefit from the consolidated statements of operations		(2.4)		(9.2)		6.8
Impact of income taxes	\$	9.0	\$	52.8	\$	(43.8)

- ⁽⁷⁾ The increase in loss from discontinued operations, net of tax, of \$11.1 million during the year ended December 31, 2018, was primarily due to lower print pricing from ongoing industry pressures.
- ⁽⁸⁾ The increase from investments in unconsolidated entity and noncontrolling interests, net of tax, of \$1.6 million during the year ended December 31, 2018, was primarily due to a \$1.0 million increase in earnings at the Company's investment in Plural, and the \$0.6 million decrease in earnings attributed to noncontrolling interests in the Company's consolidated statements of operations related to the Company's 57% ownership of Rise.
- (9) Operating income from continuing operations, excluding restructuring, impairment and transaction-related charges, decreased \$42.1 million (\$3.4 million, net of tax impact due to the change in the normalized tax rate) primarily due to the following: (1) lower print volume and pricing due to ongoing industry pressures; (2) a \$22.3 million non-cash expense related to a special employee retirement contribution in 2018 resulting from the benefit of tax reform; and (3) a \$10.7 million net benefit in 2017 from changes in employee vacation policies. These decreases were partially offset by the following: (1) a \$13.3 million net benefit in 2018 in gain from property insurance claims; (2) earnings from the Ivie acquisition and the investment in Rise; (3) a \$5.6 million gain from a sales tax litigation settlement in Peru; and (4) savings from cost reduction initiatives.

Operating Results From Continuing Operations

The following table sets forth certain information from the Company's consolidated statements of operations on an absolute dollar basis and as a relative percentage of total net sales for each noted period, together with the relative percentage change in such information between the periods set forth below:

	20	18	20	17		
		(do	ns)

Operating income from continuing operations.	\$ 87.3	2.2%	\$ 172.8	4.4%	\$ (85.5)	nm

Net Sales

Product sales decreased \$164.4 million, or 4.9%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to a \$202.2 million decrease in product sales in the Company's print product lines due to ongoing industry volume and pricing pressures and \$14.7 million in unfavorable foreign exchange impacts, primarily in Argentina; partially offset by a \$52.5 million increase from pass-through paper sales.

Service sales, which primarily consist of logistics, distribution, marketing services, imaging and medical services, increased \$199.0 million, or 33.0%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to a \$176.2 million increase in net sales from the Ivie acquisition and investment in Rise and a \$29.5 million increase in logistics sales, partially offset by a \$5.7 million decrease in sales of imaging services.

Cost of Sales

Cost of product sales decreased \$38.1 million, or 1.4%, for the year ended December 31, 2018, compared with the year ended December 31, 2017, primarily due to lower print volume and cost reduction initiatives. These decreases were partially offset by an increase in paper costs and a \$14.0 million non-cash expense related to a special employee retirement contribution in 2018.

Cost of product sales as a percentage of net sales decreased to 65.8% for the year ended December 31, 2018, from 67.3% for the year ended December 31, 2017, primarily due to the reasons provided above.

Cost of service sales increased \$168.2 million, or 38.9%, for the year ended December 31, 2018, compared with the year ended December 31, 2017, primarily due to the Ivie acquisition and investment in Rise, increased logistics freight costs and a \$2.6 million non-cash expense related to a special employee retirement contribution in 2018.

Cost of service sales as a percentage of net sales increased to 15.1% for the year ended December 31, 2018, from 10.9% for the year ended December 31, 2017, primarily due to the reasons provided above.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased \$49.8 million, or 12.2%, for the year ended December 31, 2018, compared with the year ended December 31, 2017, primarily due to the following: (1) savings from cost reduction initiatives, including employee-related costs; (2) a \$13.3 million net benefit in 2018 in gain from property insurance claims; and (3) a \$5.6 million gain from a sales tax litigation settlement in Peru, partially offset by a \$10.3 million benefit in 2017 from a change in the salaried employee vacation policy that did not repeat in 2018 and a \$5.7 million non-cash expense related to a special employee retirement contribution in 2018. Selling, general and administrative expenses as a percentage of net sales decreased from 10.4% for the year ended December 31, 2017, to 9.0% for the year ended December 31, 2018, primarily due to the reasons stated above.

Depreciation and Amortization

Depreciation and amortization decreased \$3.6 million, or 1.6%, for the year ended December 31, 2018, compared with the year ended December 31, 2017, due to a \$19.7 million decrease in depreciation expense from property, plant and equipment becoming fully depreciated over the past year, partially offset by a \$16.1 million increase in amortization expense, primarily related to amortization expense for intangible assets acquired in the Ivie acquisition and the investment in Rise.

Restructuring, Impairment and Transaction-Related Charges

Restructuring, impairment and transaction-related charges increased \$43.4 million, or 72.5%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to the following: (1) a \$14.2 million increase in impairment charges; (2) a \$5.1 million increase in transaction-related charges; (3) a \$1.3 million increase in acquisition-related integration costs; and (4) a \$26.2 million increase in other restructuring charges. These decreases were partially offset by a \$3.4 million decrease in employee termination charges.

Restructuring, impairment and transaction-related charges of \$103.3 million incurred in the year ended December 31, 2018, included the following: (1) \$23.0 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$26.2 million of impairment charges, including \$16.6 million of impairment charges for machinery and equipment no longer being utilized in production as a result of

facility consolidations, including Waseca, Minnesota; Hazleton, Pennsylvania; and Franklin, Kentucky; as well as other capacity and strategic reduction restructuring initiatives, including \$5.0 million of impairment charges for machinery and equipment in Peru; and \$4.6 million of land and building impairment charges, primarily related to the Franklin, Kentucky plant closure; (3) \$8.2 million of transaction-related charges consisting of professional service fees related to business acquisition and divestiture activities, including \$6.4 million related to the proposed acquisition of LSC; (4) \$1.3 million of integration costs primarily for the integration of acquired companies; and (5) \$44.6 million of various other restructuring charges, consisting of a \$32.1 million increase to the Company's MEPPs withdrawal liability, \$10.0 million in charges for certain legal matters and customer contract penalties related to the Company's operations in Peru, and costs to maintain and exit closed facilities. These charges are presented net of \$17.3 million in gains on the sale of facilities, including a \$7.5 million gain from the sale of the Taunton, Massachusetts Book plant, a \$7.0 million gain from the sale of the San Ixhuatepec, Mexico plant.

Restructuring, impairment and transaction-related charges of \$59.9 million incurred in the year ended December 31, 2017, included the following: (1) \$26.4 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$12.0 million of impairment charges, including \$6.7 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Columbus, Ohio; and Taunton, Massachusetts, as well as other capacity and strategic reduction restructuring activities; and \$5.3 million of impairment charges for land and building related to the Waseca, Minnesota and Taunton, Massachusetts plant closures; (3) \$3.1 million of transaction-related charges consisting of professional service fees related to business acquisition and divestiture activities; and (4) \$18.4 million of various other restructuring charges, including costs to maintain and exit closed facilities, as well as lease exit charges, net of \$7.1 million in gains from the sale of the Atglen, Pennsylvania; Dickson, Tennessee; East Greenville, Pennsylvania; Lenexa, Kansas; and Marengo, Iowa plants, and a \$1.2 million gain from the Company's Argentina Subsidiaries' settlements with vendors through bankruptcy proceedings. Other restructuring charges also included a \$6.7 million loss on the sale of a business.

EBITDA and EBITDA Margin—Consolidated

EBITDA is defined as net earnings (loss) attributable to Quad common shareholders, excluding (1) interest expense, (2) income tax expense (benefit) and (3) depreciation and amortization. EBITDA margin represents EBITDA as a percentage of net sales. EBITDA and EBITDA margin are presented to provide additional information regarding Quad's performance. Both are important measures by which Quad gauges the profitability and assesses the performance of its business. EBITDA and EBITDA margin are non-GAAP financial measures and should not be considered alternatives to net earnings (loss) as a measure of operating performance, or to cash flows provided by operating activities as a measure of liquidity. Quad's calculation of EBITDA and EBITDA margin may be different from the calculations used by other companies, and therefore, comparability may be limited.

EBITDA and EBITDA margin for the year ended December 31, 2018, compared to the year ended December 31, 2017, were as follows:

	Year Ended December 31,								
_	20	18	20	17					
-	Amount	% of Net Sales	Amount	% of Net Sales					
_		(dollars in	millions)						
EBITDA and EBITDA margin (non-GAAP)	\$ 294.2	7.4%	\$ 387.4	9.8%					

EBITDA decreased \$93.2 million for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to the following: (1) lower print volume and pricing due to ongoing industry pressures; (2) \$43.4 million of increased restructuring, impairment and transaction-related charges; (3) a \$22.3 million non-cash expense related to a special employee retirement contribution in 2018; (4) an \$11.1 million increase in loss from discontinued operations, net of tax; and (5) a \$10.7 million net benefit in 2017 from changes in employee vacation policies. These impacts were partially offset by the following: (1) a \$13.3 million net benefit in 2018 in gain from a sales tax litigation settlement in Peru; and (4) savings from cost reduction initiatives, including employee-related costs.

A reconciliation of EBITDA to net earnings attributable to Quad common shareholders for the years ended December 31, 2018 and 2017, was as follows:

	Year Ended	Year Ended December 31,				
-	2018		2017			
	(dollars	n mill	ions)			
Net earnings attributable to Quad common shareholders ⁽¹⁾	\$ 8.5	\$	107.2			
Interest expense	73.2		70.9			
Income tax benefit	(2.4)	(9.2)			
Depreciation and amortization.	214.9		218.5			
EBITDA (non-GAAP).	\$ 294.2	\$	387.4			

⁽¹⁾ Net earnings attributable to Quad common shareholders included the following:

- a. Restructuring, impairment and transaction-related charges of \$103.3 million and \$59.9 million for the years ended December 31, 2018 and 2017, respectively;
- b. Employee stock ownership plan non-cash expense related to a special employee retirement contribution of \$22.3 million for the year ended December 31, 2018;
- c. Net pension income of \$12.4 million and \$9.6 million for the years ended December 31, 2018 and 2017, respectively;
- d. Loss on debt extinguishment of \$2.6 million for the year ended December 31, 2017;
- e. Equity in earnings of unconsolidated entity of \$1.0 million for the year ended December 31, 2018;
- f. Loss from discontinued operations, net of tax, of \$22.0 million and \$10.9 million for the years ended December 31, 2018 and 2017, respectively; and
- g. Net loss attributable to noncontrolling interests of \$0.6 million for the year ended December 31, 2018.

United States Print and Related Services

The following table summarizes net sales, operating income from continuing operations, operating margin and certain items impacting comparability within the United States Print and Related Services segment:

	J	Year Ended December 31,					
		2018		2017			
		(dolla	rs in million	s)		
		Amount		Amount	\$	Change	% Change
Net sales:							
Products	\$	2,815.9	\$	2,976.7	\$	(160.8)	(5.4)%
Services		782.8		583.2		199.6	34.2 %
Operating income from continuing operations (including restructuring, impairment and transaction-related charges)		183.3		211.8		(28.5)	nm
Operating margin		5.1%		5.9%		N/A	N/A
Restructuring, impairment and transaction-related charges	\$	37.5	\$	53.1	\$	(15.6)	(29.4)%

Net Sales

Product sales for the United States Print and Related Services segment decreased \$160.8 million, or 5.4%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to a \$205.7 million decrease in product sales in the Company's print product lines (predominantly due to ongoing volume and pricing pressures from excess capacity in the printing industry), partially offset by a \$44.9 million increase in pass-through paper sales.

Service sales for the United States Print and Related Services segment increased \$199.6 million, or 34.2%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to a \$176.2 million increase in net sales from the Ivie acquisition and investment in Rise and a \$30.1 million increase in logistics sales, partially offset by a \$5.7 million decrease in sales of imaging services.

Operating Income from Continuing Operations

Operating income from continuing operations for the United States Print and Related Services segment decreased \$28.5 million for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to the following: (1) lower print volume and pricing due to ongoing industry pressures; (2) a \$21.9 million non-cash expense related to a special employee retirement contribution in 2018; (3) a \$10.7 million net benefit in 2017 from changes in employee vacation policies. These impacts were partially offset by the following: (1) a \$15.6 million decrease in restructuring, impairment and transaction-related charges; (2) a \$13.3 million net benefit in 2018 in gain from property insurance claims; (3) earnings from the Ivie acquisition and the investment in Rise; and (4) savings from cost reduction initiatives, including employee-related costs.

The operating margin for the United States Print and Related Services segment decreased to 5.1% for the year ended December 31, 2018, from 5.9% for the year ended December 31, 2017, primarily due to the reasons provided above.

Restructuring, Impairment and Transaction-Related Charges

Restructuring, impairment and transaction-related charges for the United States Print and Related Services segment for the year ended December 31, 2018, were \$37.5 million, consisting of the following: (1) \$16.1 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$18.0 million of impairment charges, including \$15.8 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Hazleton, Pennsylvania; and Franklin, Kentucky; as well as other capacity and strategic reduction restructuring initiatives; and \$2.2 million of impairment charges for land and building related to the Franklin, Kentucky plant closure; and (3) \$2.0 million of various other restructuring charges, including costs to maintain and exit closed facilities, as well as lease exit charges. These charges are presented net of gains on the sale of facilities, including a \$7.5 million gain from the sale of the Taunton, Massachusetts Book plant and a \$7.0 million gain from the sale of the Dallas, Texas plant.

Restructuring, impairment and transaction-related charges for the United States Print and Related Services segment for the year ended December 31, 2017, were \$53.1 million, consisting of the following: (1) \$21.2 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$11.5 million of impairment charges, including \$6.2 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Columbus, Ohio; and Taunton, Massachusetts, as well as other capacity and strategic reduction restructuring activities; and \$5.3 million of impairment charges for land and building related to the Waseca, Minnesota and Taunton, Massachusetts plant closures; and (3) \$19.4 million of various other restructuring charges, including costs to maintain and exit closed facilities, as well as lease exit charges, net of \$7.1 million in gains from the sale of the Atglen, Pennsylvania; Dickson, Tennessee; East Greenville, Pennsylvania; Lenexa, Kansas; and Marengo, Iowa plants. Other restructuring charges also included a \$6.7 million loss on the sale of a business.

International

The following table summarizes net sales, operating income from continuing operations, operating margin, certain items impacting comparability and equity in earnings of unconsolidated entity within the International segment:

	Year Ended December 31,								
		2018		2017		2017			
		(dollar	s in million	s)				
	A	mount	A	mount	\$ (Change	% Change		
Net sales:									
Products	\$	368.5	\$	372.1	\$	(3.6)	(1.0)%		
Services		18.6		19.2		(0.6)	(3.1)%		
Operating income from continuing operations (including restructuring, impairment and transaction-related charges)		1.5		19.6		(18.1)	(92.3)%		
Operating margin		0.4%		5.0%		N/A	N/A		
Restructuring, impairment and transaction-related charges	\$	22.2	\$	3.3	\$	18.9	nm		
Equity in earnings of unconsolidated entity		(1.0)				(1.0)	— %		

Net Sales

Product sales for the International segment decreased \$3.6 million, or 1.0%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to \$14.7 million in unfavorable foreign exchange impacts, partially offset by a \$7.6 million increase in pass-through paper sales and a \$3.5 million increase in volume and pricing, primarily in Mexico.

Service sales for the International segment decreased \$0.6 million, or 3.1%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to a decrease in logistics revenue in Europe.

Operating Income from Continuing Operations

Operating income from continuing operations for the International segment decreased \$18.1 million, or 92.3%, for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to a \$18.9 million increase in restructuring and impairment expenses, partially offset by a \$5.6 million gain from a sales tax litigation settlement in Peru and a \$4.8 million increase in operating income, primarily in Mexico.

Restructuring, Impairment and Transaction-Related Charges

Restructuring, impairment and transaction-related charges for the International segment for the year ended December 31, 2018, were \$22.2 million, consisting of the following: (1) \$3.7 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$8.2 million of impairment charges, including \$5.8 million for machinery and equipment no longer being utilized in production as a result of facility consolidations, as well as other capacity and strategic reduction restructuring initiatives, including \$5.0 million of impairment charges for machinery and equipment in Peru; and \$2.4 million of impairment charges for land and building; (3) \$10.3 million of various other restructuring charges, including \$10.0 million in charges for certain legal matters and customer contract penalties related to the Company's operations in Peru.

Restructuring, impairment and transaction-related charges for the International segment for the year ended December 31, 2017, were \$3.3 million, consisting of the following: (1) \$4.7 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$0.5 million of impairment charges for machinery and equipment no longer being utilized in production as a result of facility consolidations; and (3) \$1.9 million of various other restructuring income primarily related to the Company's Argentina Subsidiaries' gain from settlements with vendors through bankruptcy proceedings, partially offset by charges to maintain and exit closed facilities.

Equity in Earnings of Unconsolidated Entities

Investments in entities where Quad has the ability to exert significant influence, but not control, are accounted for using the equity method of accounting. The Company holds a 49% ownership interest in Plural, a commercial printer based in São Paulo, Brazil. The equity in earnings of unconsolidated entity in the International segment increased \$1.0 million for the year ended December 31, 2018, compared to the year ended December 31, 2017, due to an increase in earnings at the Company's investment in Plural.

Unrestricted Subsidiaries

Unrestricted subsidiaries as defined in the Senior Unsecured Notes indenture represented less than 2.0% of total consolidated net sales for the year ended December 31, 2018.

Corporate

The following table summarizes unallocated operating expenses presented as Corporate:

	Year Ended December 31,					
	 2018		2017			
	(dollars in millions)					
	Amount		Amount		\$ Change	% Change
Operating expenses (including restructuring, impairment and transaction-related charges).	\$ 97.5	\$	58.6	\$	38.9	66.4%
Restructuring, impairment and transaction-related charges	43.6		3.5		40.1	nm

Operating Expenses

Corporate operating expenses increased \$38.9 million, or 66.4%, for the year ended December 31, 2018, compared with the year ended December 31, 2017, primarily due to a \$40.1 million increase in restructuring, impairment and transaction-related charges and a \$0.4 million non-cash expense related to a special employee retirement contribution in 2018.

Restructuring, Impairment and Transaction-Related Charges

Corporate restructuring, impairment and transaction-related charges for the year ended December 31, 2018, were \$43.6 million, consisting of the following: (1) \$3.2 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$8.1 million of transaction-related charges, which primarily included professional service fees; and (3) \$32.3 million of other restructuring charges, including a \$32.1 million increase to its MEPPs withdrawal liability.

Corporate restructuring, impairment and transaction-related charges for the year ended December 31, 2017, were \$3.5 million, consisting of the following: (1) \$0.5 million of employee termination charges related to workforce reductions through facility consolidations and separation programs; (2) \$2.1 million of transaction-related charges which primarily included professional service fees; and (3) \$0.9 million of other restructuring charges.

Liquidity and Capital Resources

The Company utilizes cash flows from operating activities and borrowings under its credit facilities to satisfy its liquidity and capital requirements. At December 31, 2019, the Company had cash and cash equivalents of \$78.7 million. In addition to cash and cash equivalents, the Company had \$764.2 million of unused capacity under its revolving credit arrangement at December 31, 2019, which was net of \$35.8 million of issued letters of credit. The Company believes its expected future cash flows from operating activities, \$764.2 million of unused capacity under the revolving credit arrangement and available cash on hand provide sufficient resources to fund ongoing operating requirements and the integration and restructuring requirements related to acquired operations, as well as future capital expenditures, debt and pension service requirements, investments in future growth to create value for its shareholders, shareholder dividends and share repurchases. There were no borrowings under the \$800.0 million revolving credit facility as of December 31, 2019, and peak borrowings were \$425.4 million during the year ended December 31, 2019.

Net Cash Provided by Operating Activities

Year Ended December 31, 2019, Compared to Year Ended December 31, 2018

Net cash provided by operating activities was \$155.5 million for the year ended December 31, 2019, compared to \$260.6 million for the year ended December 31, 2018, resulting in an \$105.1 million decrease in cash provided by operating activities. The decrease was primarily due to a \$102.9 million decrease in cash from earnings and a \$2.2 million decrease in cash flows from changes in operating assets and liabilities.

Year Ended December 31, 2018, Compared to Year Ended December 31, 2017

Net cash provided by operating activities was \$260.6 million for the year ended December 31, 2018, compared to \$344.0 million for the year ended December 31, 2017, resulting in an \$83.4 million decrease in cash provided by operating activities. The decrease was primarily due to a \$93.4 million decrease in cash from earnings, partially offset by a \$10.0 million increase in cash flows from changes in operating assets and liabilities.

Net Cash Used in Investing Activities

Year Ended December 31, 2019, Compared to Year Ended December 31, 2018

Net cash used in investing activities was \$208.1 million for the year ended December 31, 2019, compared to \$120.5 million for the year ended December 31, 2018, resulting in a \$87.6 million increase in cash used in investing activities. The increase was primarily due to the following: (1) a \$49.6 million increase from the acquisition of businesses; (2) a \$15.2 million decrease in proceeds from the sale of property, plant and equipment; (3) a \$14.7 million increase in purchases of property, plant and equipment; (4) a \$14.2 million decrease in the proceeds from property insurance claims; and (5) a \$5.0 million loan to an unconsolidated entity. These increases were partially offset by an \$11.1 million increase in proceeds from the sale of a business.

Year Ended December 31, 2018, Compared to Year Ended December 31, 2017

Net cash used in investing activities was \$120.5 million for the year ended December 31, 2018, compared to \$47.2 million for the year ended December 31, 2017, resulting in a \$73.3 million increase in cash used in investing activities. The increase was primarily due to the following: (1) a \$71.4 million increase from the acquisition of businesses; (2) a \$14.1 million decrease in proceeds from the sale of a business; and (3) a \$10.4 million increase in purchases of property, plant and equipment. These increases were partially offset by the following: (1) an \$8.8 million increase in proceeds from the sale of property, plant and equipment; (2) a \$7.3 million loan to an unconsolidated entity in 2017 that did not repeat in 2018; and (3) a \$6.5 million increase in proceeds from property insurance claims.

Net Cash Provided by (Used in) Financing Activities

Year Ended December 31, 2019, Compared to Year Ended December 31, 2018

Net cash provided by financing activities was \$61.8 million for the year ended December 31, 2019, compared to \$133.5 million used for the year ended December 31, 2018, resulting in a \$195.3 million increase in cash provided by financing activities. The increase was primarily due to the following: (1) a \$180.1 million increase in net borrowings; (2) a \$36.7 million decrease in purchases of treasury stock; (3) \$5.8 million decrease in payments of cash dividends; and (4) a \$2.4 million decrease in equity awards redeemed to pay employees' tax obligations. This was partially offset by the following: (1) a \$20.2 million increase in payments of debt issuance costs and financing fees; (2) a \$5.3 million increase in contingent cash paid for business acquired; and (3) a \$4.2 million decrease in the proceeds from stock options exercised.

Year Ended December 31, 2018, Compared to Year Ended December 31, 2017

Net cash used in financing activities was \$133.5 million for the year ended December 31, 2018, compared to \$251.7 million for the year ended December 31, 2017, resulting in a \$118.2 million decrease in cash used in financing activities. The decrease was primarily due to the following: (1) a \$143.9 million decrease in net repayments of debt and lease obligations in 2018 as compared to 2017; and (2) a \$4.7 million decrease in payments of debt issuance costs and financing fees. These decreases were partially offset by the following: (1) a \$32.9 million increase in purchases of treasury stock; and (2) a \$3.0 million increase in equity awards redeemed to pay employees' tax obligations.

Free Cash Flow

Free Cash Flow is defined as net cash provided by operating activities less purchases of property, plant and equipment, plus LSC-related payments.

The Company's management assesses Free Cash Flow as a measure to quantify cash available for (1) strengthening the balance sheet (debt reduction), (2) strategic capital allocation and deployment through investments in the business (acquisitions and strategic investments) and (3) returning capital to the shareholders (dividends and share repurchases). The priorities for capital allocation and deployment will change as circumstances dictate for the business, and Free Cash Flow can be significantly impacted by the Company's restructuring activities and other unusual items.

Free Cash Flow is a non-GAAP financial measure and should not be considered an alternative to cash flows provided by operating activities as a measure of liquidity. Quad's calculation of Free Cash Flow may be different from similar calculations used by other companies, and therefore, comparability may be limited.

Free Cash Flow for the years ended December 31, 2019, 2018 and 2017, was as follows:

		Year Ended December 31,								
-	2	019		2018		2017				
-			(dollar	rs in millions)					
Net cash provided by operating activities	\$	155.5	\$	260.6	\$	344.0				
Less: purchases of property, plant and equipment		(111.0)		(96.3)		(85.9)				
Plus: LSC-related payments ⁽¹⁾		61.3								
Free Cash Flow (non-GAAP)	\$	105.8	\$	164.3	\$	258.1				

⁽¹⁾ LSC-related payments include transaction-related costs associated with the proposed, but now terminated, acquisition of LSC, including the \$45.0 million reverse termination fee and incremental interest payments associated with the 2019 amended debt refinancing.

Free Cash Flow decreased \$58.5 million for the year ended December 31, 2019, compared to the year ended December 31, 2018, primarily due to a \$43.8 million decrease in net cash provided by operating activities, when excluding \$61.3 million in LSC-related payments, primarily due to a decrease in cash from earnings, and a \$14.7 million increase in capital expenditures.

Free Cash Flow decreased \$93.8 million for the year ended December 31, 2018, compared to the year ended December 31, 2017, primarily due to an \$83.4 million decrease in net cash provided by operating activities primarily due to a decrease in cash from earnings and a \$10.4 million increase in capital expenditures.

See the "Net Cash Provided by Operating Activities" section above for further explanations of the change in operating cash flows and the "Net Cash Used in Investing Activities" section above for further explanations of the changes in purchases of property, plant and equipment. The above calculation of Free Cash Flow includes the cash flows related to the Book business for all periods presented.

Debt Leverage Ratio

The Debt Leverage Ratio is defined as total debt and finance lease obligations divided by the trailing twelve months Adjusted EBITDA, comprised of the sum of the following: (1) the last twelve months of EBITDA (see the definition of EBITDA and the reconciliation of net earnings (loss) attributable to Quad common shareholders to EBITDA in the "Results of Operations" section above); (2) restructuring, impairment and transaction-related charges; (3) earnings (loss) from discontinued operations, net of tax; (4) net pension income; (5) employee stock ownership plan contributions; (6) loss (gain) on debt extinguishment; (7) equity in (earnings) loss of unconsolidated entity; (8) Adjusted EBITDA for unconsolidated equity method investments (calculated in a consistent manner with the calculation for Quad); and (9) net earnings (loss) attributable to noncontrolling interests.

The Company uses the Debt Leverage Ratio as a metric to assess liquidity and the flexibility of its balance sheet. Consistent with other liquidity metrics, the Company monitors the Debt Leverage Ratio as a measure to determine the appropriate level of debt the Company believes is optimal to operate its business, and accordingly, to quantify debt capacity available for strategic capital allocation and deployment through investments in the business (capital expenditures, acquisitions and strategic investments), for strengthening the balance sheet (pension liability reduction), and for returning capital to the shareholders (dividends and share repurchases). The priorities for capital allocation and deployment will change as circumstances dictate for the business, and the Debt Leverage Ratio can be significantly impacted by the amount and timing of large expenditures requiring debt financing, as well as changes in profitability.

The Debt Leverage Ratio is a non-GAAP measure, and should not be considered an alternative to cash flows provided by operating activities as a measure of liquidity. Quad's calculation of the Debt Leverage Ratio may be different from similar calculations used by other companies and, therefore, comparability may be limited.

The Debt Leverage Ratio calculated below differs from the Total Leverage Ratio, the Total Net Leverage Ratio and Senior Secured Leverage Ratio included in the Company's debt covenant calculations (see Note 12, "Debt," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for further information on debt covenants). The Total Leverage Ratio included in the Company's debt covenants includes letters of credit and surety bonds as debt, excludes non-cash stock-based compensation expense from EBITDA and includes net income (loss) attributable to noncontrolling interests in EBITDA. The Total Net Leverage Ratio includes and excludes the same adjustments as the Total Leverage Ratio, in addition to netting domestic unrestricted cash with debt. Similarly, the Senior Secured Leverage Ratio includes and excludes the same adjustments as the Total Leverage Ratio, in addition to the exclusion of the outstanding balance of the Senior Unsecured Notes and surety bonds from debt and netting domestic unrestricted cash with debt.

The Debt Leverage Ratio as of December 31, 2019 and 2018, was as follows:

	Dec	ember 31, 2019		1ber 31,)18
		(dollars i	n millions	s)
Total debt and finance lease obligations on the consolidated balance sheets	\$	1,112.2	\$	940.8
Divided by:				
Adjusted EBITDA for Quad for the year ended (non-GAAP)		334.9		427.8
Pro forma Adjusted EBITDA for acquired companies (non-GAAP) ⁽¹⁾		_		2.9
Adjusted EBITDA for the year ended (non-GAAP)		334.9		430.7
Debt Leverage Ratio (non-GAAP)		3.32x		2.18x
Debt Leverage Ratio—net of excess cash (non-GAAP) ⁽²⁾		3.12x		2.05x

(1) As permitted by the Company's senior secured credit facility, certain pro forma financial information related to the acquisition of Ivie was included in calculating the Debt Leverage Ratio as of December 31, 2018. As the acquisition of Ivie was completed on February 21, 2018, the \$2.9 million pro forma Adjusted EBITDA represents the period from January 1, 2018, to February 20, 2018. Adjusted EBITDA for Ivie was calculated in a consistent manner with the calculation above for Quad. Ivie's financial information has been consolidated within Quad's financial results since the date of acquisition. If the two months of pro forma Adjusted EBITDA for Ivie was not included in the calculation, the Company's Debt Leverage Ratio would have been 2.20x as of December 31, 2018.

(2) The Company had \$79 million and \$70 million in cash and cash equivalents at December 31, 2019 and 2018, respectively. Based on the Company's typical year-end cash balance of approximately \$10 million, Quad had \$69 million and \$60 million of excess cash at December 31, 2019 and 2018, respectively. If the excess cash in each year was used to further pay down debt, the Debt Leverage Ratio would have been 3.12x and 2.05x as of December 31, 2019 and 2018, respectively.

The calculation of Adjusted EBITDA for the years ended December 31, 2019 and 2018, was as follows:

	Year Ended I	December 31,	
-	2019	2018	-
-	(dollars in	millions)	-
Net earnings (loss) attributable to Quad common shareholders	\$ (156.3)	\$ 8.5	;
Interest expense	90.0	73.2	2
Income tax benefit	(24.4)	(2.4)
Depreciation and amortization.	209.5	214.9)
EBITDA (non-GAAP)	\$ 118.8	\$ 294.2	2
Restructuring, impairment and transaction-related charges	89.4	103.3	;
Loss from discontinued operations, net of tax	100.6	22.0)
Net pension income	(6.0)	(12.4)
Employee stock ownership plan contribution	—	22.3	;
Loss on debt extinguishment	30.5	_	-
Other ⁽¹⁾	1.6	(1.6	5)
Adjusted EBITDA (non-GAAP)	\$ 334.9	\$ 427.8	;

⁽¹⁾ Other is comprised of equity in (earnings) loss of unconsolidated entity, Adjusted EBITDA for unconsolidated equity method investments and net earnings (loss) attributable to noncontrolling interests.

The Debt Leverage Ratio, net of excess cash, increased 1.07x at December 31, 2019, compared to December 31, 2018, primarily due to a \$171.4 million increase in debt and finance lease obligations, primarily related to the cash paid for the Periscope acquisition; the \$45.0 million reverse termination fee paid for the termination of the LSC acquisition; and a \$14.7 million increase in purchases of property, plant and equipment. The Debt Leverage Ratio at December 31, 2019, of 3.32x is above management's desired target Debt Leverage Ratio range of 2.0x to 2.5x; however, the Company operates at times above the Debt Leverage Ratio target range depending on the timing of compelling strategic investment opportunities like the Periscope acquisition, as well as seasonal working capital needs.

Description of Significant Outstanding Debt Obligations as of December 31, 2019

As of December 31, 2019, the Company utilized a combination of debt instruments to fund cash requirements, including the following:

- Senior Secured Credit Facility:
 - \$800.0 million revolving credit facility (no outstanding balance as of December 31, 2019); and
 - \$825.0 million Term Loan A (\$768.3 million outstanding as of December 31, 2019);
- Senior Unsecured Notes (\$243.5 million outstanding as of December 31, 2019); and
- Master Note and Security Agreement (\$70.7 million outstanding as of December 31, 2019).

Senior Secured Credit Facility

On April 28, 2014, the Company entered into its Senior Secured Credit Facility, which included a revolving credit facility, Term Loan A and Term Loan B. The Company completed the third amendment to the Senior Secured Credit Facility on January 31, 2019. This third amendment was completed to provide Quad with the liquidity and structural flexibility to consummate the proposed, but now terminated, acquisition of LSC and to extend existing maturities by (a) increasing the aggregate amount of the existing revolving credit facility from \$725.0 million to \$800.0 million with a term of five years, maturing on January 31, 2024; (b) increasing the aggregate amount of the existing Term Loan A from \$375.0 million to \$825.0 million with a delayed draw feature and term of five years, maturing on January 31, 2024; and (c) increasing the aggregate amount of the existing Term Loan B from \$300.0 million to \$500.0 million with a term of seven years, maturing on January 31, 2026. The Company intended that the loans available under the amended revolving credit facility would be used to repay, refinance, repurchase, redeem, exchange or otherwise terminate LSC's existing indebtedness in connection with the consummation of the merger, and to pay transaction expenses. On July 26, 2019, following the termination of the proposed acquisition of LSC, Quad fully funded the \$825.0 million delayed draw Term Loan A to retire the entire amount outstanding on the \$500.0 million Term Loan B and reduced the borrowings under the revolving credit facility. The third amendment also amended certain of the quarterly financial covenants to which the Company is subject (all financial terms, numbers and ratios are as defined in the Senior Secured Credit Facility, as amended by the third amendment).

At December 31, 2019, the Company had no outstanding borrowings on the revolving credit facility, and had \$35.8 million of issued letters of credit, leaving \$764.2 million available for future borrowings. Borrowings under the revolving credit facility and delayed draw Term Loan A made under the Senior Secured Credit Facility at December 31, 2019, bear interest at 2.50% in excess of reserve adjusted LIBOR, or 1.50% in excess of an alternate base rate. The Senior Secured Credit Facility is secured by substantially all of the unencumbered assets of the Company. The Senior Secured Credit Facility also requires the Company to provide additional collateral to the lenders in certain limited circumstances.

Senior Unsecured Notes

The Company issued \$300.0 million aggregate principal amount of its Senior Unsecured Notes due May 1, 2022, on April 28, 2014. The Senior Unsecured Notes bear interest at 7.00%, and interest is payable semi-annually. The Senior Unsecured Notes were issued to extend and stagger the Company's debt maturity profile, further diversify its capital structure and provide more borrowing capacity to better position the Company to execute on its strategic goals. The Company received \$294.8 million in net proceeds from the sale of the Senior Unsecured Notes, after deducting the initial purchasers' discounts and commissions. The proceeds from the Senior Unsecured Notes were used for the same purposes detailed above for the Senior Secured Credit Facility

Each of the Company's existing and future domestic subsidiaries that is a borrower or guarantees indebtedness under the Company's Senior Secured Credit Facility or that guarantees certain of the Company's other indebtedness or indebtedness of the Company's restricted subsidiaries (other than intercompany indebtedness) fully and unconditionally guarantee or, in the case of future subsidiaries, will guarantee, on a joint and several basis, the Senior Unsecured Notes (the "Guarantor Subsidiaries"). All of the current Guarantor Subsidiaries are 100% owned by the Company. Guarantor Subsidiaries will be automatically released from these guarantees upon the occurrence of certain events, including the following: (1) the designation of any of the Guarantor Subsidiaries as an unrestricted subsidiary; (2) the release or discharge of any guarantee or indebtedness that resulted in the creation of the guarantee of the Senior Unsecured Notes by any of the Guarantor Subsidiaries; or (3) the sale or disposition, including the sale of substantially all the assets, of any of the Guarantor Subsidiaries.

Master Note and Security Agreement

On September 1, 1995, and as last amended on November 24, 2014, the Company entered into the Master Note and Security Agreement pursuant to which the Company issued over time senior notes in an aggregate principal amount of \$1.1 billion in various tranches, of which \$70.7 million was outstanding as of December 31, 2019. The senior notes under the Master Note and Security Agreement had a weighted average interest rate of 7.24% at December 31, 2019, which is fixed to maturity, with interest payable semiannually. Principal payments commenced September 1997 and extend through April 2031 in various tranches. The notes are collateralized by certain United States land, buildings and press and finishing equipment under the terms of the Master Note and Security Agreement.

Covenants and Compliance

The Company's various lending arrangements include certain financial covenants (all financial terms, numbers and ratios are as defined in the Company's debt agreements). Among these covenants, the Company was required to maintain the following as of December 31, 2019:

- *Total Leverage Ratio.* On a rolling twelve-month basis, the Total Leverage Ratio, defined as consolidated total indebtedness to consolidated EBITDA, shall not exceed 3.75 to 1.00 (for the twelve months ended December 31, 2019, the Company's Total Leverage Ratio was 3.22 to 1.00).
- If there is any amount outstanding on the Revolving Credit Facility or Term Loan A, or if any lender has any revolving credit exposure or Term Loan A credit exposure, the Company is required to maintain the following:
 - Senior Secured Leverage Ratio. On a rolling twelve-month basis, the Senior Secured Leverage Ratio, defined as consolidated senior secured net indebtedness to consolidated EBITDA, shall not exceed 3.50 to 1.00 (for the twelve months ended December 31, 2019, the Company's Senior Secured Leverage Ratio was 2.30 to 1.00).
 - *Interest Coverage Ratio.* On a rolling twelve-month basis, the Interest Coverage Ratio, defined as consolidated EBITDA to cash consolidated interest expense, shall not be less than 3.00 to 1.00 (for the twelve months ended December 31, 2019, the Company's Interest Coverage Ratio was 4.52 to 1.00).

The indenture underlying the Senior Unsecured Notes contains various covenants, including, but not limited to, covenants that, subject to certain exceptions, limit the Company's and its restricted subsidiaries' ability to incur and/or guarantee additional debt; pay dividends, repurchase stock or make certain other restricted payments; enter into agreements limiting dividends and certain other restricted payments; prepay, redeem or repurchase subordinated debt; grant liens on assets; enter into sale and leaseback transactions; merge, consolidate, transfer or dispose of substantially all of the Company's consolidated assets; sell, transfer or otherwise dispose of property and assets; and engage in transactions with affiliates.

The Company was in compliance with all financial covenants in its debt agreements as of December 31, 2019. While the Company currently expects to be in compliance in future periods with all of the financial covenants, there can be no assurance that these covenants will continue to be met. The Company's failure to maintain compliance with the covenants could prevent the Company from borrowing additional amounts and could result in a default under any of the debt agreements. Such default could cause the outstanding indebtedness to become immediately due and payable, by virtue of cross-acceleration or cross-default provisions.

In addition to those covenants, the Senior Secured Credit Facility also includes certain limitations on acquisitions, indebtedness, liens, dividends and repurchases of capital stock. The following limitations utilize a Total Net Leverage Ratio calculation, which, on a rolling twelve-month basis, is defined as consolidated net indebtedness to consolidated EBITDA (for the twelve months ended December 31, 2019, the Company's Total Net Leverage Ratio was 3.01 to 1.00).

- If the Company's Total Net Leverage Ratio is greater than 2.75 to 1.00, the Company is prohibited from making greater than \$120.0 million of annual dividend payments, capital stock repurchases and certain other payments. If the Total Net Leverage Ratio is less than 2.75 to 1.00, there are no such restrictions. As the Company's Total Net Leverage Ratio as of December 31, 2019, was 3.01 to 1.00, the limitations described above are currently applicable.
- If the Company's Senior Secured Leverage ratio is greater than 3.00 to 1.00 or the Company's Total Net Leverage Ratio is greater than 3.50 to 1.00, the Company is prohibited from voluntarily prepaying any of the Senior Unsecured Notes and from voluntarily prepaying any other unsecured or subordinated indebtedness, with certain exceptions (including any mandatory prepayments on the Senior Unsecured Notes or any other unsecured or subordinated debt). If the Senior Secured Leverage Ratio is less than 3.00 to 1.00 and the Total Net Leverage Ratio is less than 3.50 to 1.00, there are no such restrictions. The limitations described above are currently not applicable, as the Company's Senior Secured Leverage Ratio was 2.30 to 1.00 and Total Net Leverage Ratio was 3.01 to 1.00, as of December 31, 2019.

Net Pension Obligations

The net underfunded pension and MEPPs obligations decreased by \$10.5 million during the year ended December 31, 2019, from \$133.5 million at December 31, 2018, to \$123.0 million at December 31, 2019. This decrease in overall pension obligations was primarily due to payments totaling \$10.4 million made to the MEPPs during the year ended December 31, 2019, and an actual return on pension plan assets of 21.3% during the year ended December 31, 2019, which was above the expected return on plan assets assumption of 6.25%. The decrease was partially offset by a 102 basis point decrease in the pension discount rate from 4.22% at December 31, 2018, to 3.20% at December 31, 2019.

The Company continues to focus on reducing pension obligations through cash contributions to the plans, lumpsum settlements and plan design changes.

Share Repurchase Program

On September 6, 2011, the Company's Board of Directors authorized a share repurchase program of up to \$100.0 million of the Company's outstanding class A stock. On July 30, 2018, the Company's Board of Directors discontinued the remainder of the September 6, 2011 share repurchase program and authorized a new share repurchase program of up to \$100.0 million of the Company's outstanding class A common stock. Under the authorization, share repurchases may be made at the Company's discretion, from time to time, in the open market and/or in privately negotiated transactions as permitted by federal securities laws and other legal requirements. The timing, manner, price and amount of any repurchase will depend on economic and market conditions, share price, trading volume, applicable legal requirements and other factors. The program may be suspended or discontinued at any time.

There were no shares of the Company's class A stock repurchased during the year ended December 31, 2019. During the year ended December 31, 2018, the Company repurchased 1,871,631 shares of its class A common stock at a weighted average price of \$19.59 per share for a total purchase price of \$36.7 million. During the year ended December 31, 2017, the Company repurchased 200,605 shares of its class A common stock at a weighted average price of \$18.89 per share for a total purchase price of \$3.8 million. As of December 31, 2019, there was \$100.0 million of authorized repurchases remaining under the program.

Risk Management

For a discussion of the Company's exposure to market risks and management of those market risks, see Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," of this Annual Report on Form 10-K.

Off-Balance Sheet Arrangements

Except as set forth below in the Contractual Obligations and Other Commitments table, the Company has no off-balance sheet arrangements, financings or special purpose entities that the Company expects to have a material current or future effect on financial condition, changes in financial condition, results of operations, liquidity, capital expenditures, capital resources or significant components of sales or expenses.

Contractual Obligations and Other Commitments

	Payments Due by Period												
-	Total		2020		2021		2022		2023		2024	The	reafter
Debt obligations ⁽¹⁾	5 1,288.2	\$	96.6	\$	142.4	\$	373.8	\$	117.0	\$	543.7	\$	14.7

MEPPs withdrawal obligations ⁽²⁾	62.5		11.3		6.2		6.2		6.1		4.1		28.6
Pension benefit obligations ⁽³⁾	84.8		12.9		15.0		20.2		18.8		17.9		_
Finance lease obligations ⁽⁴⁾	14.3		8.2		4.1		1.8		0.2				_
Purchase obligations ⁽⁵⁾	29.7		29.3		0.4		_				_		_
Business acquisitions ⁽⁶⁾	10.1		5.1		5.0		_						_
Total ⁽⁷⁾⁽⁸⁾	6 1,605.8	\$	200.0	\$	198.3	\$	420.4	\$	156.6	\$	574.3	\$	56.2

The Company's contractual cash obligations at December 31, 2019, were as follows (in millions):

⁽¹⁾ Debt obligations include \$180.4 million for anticipated future interest payments, including \$7.6 million of estimated interest payments from the interest rate swaps, and excludes \$9.3 million for future amortization of debt issuance costs. During 2019, the Company paid in advance the full amount of required amortization payments on its Term Loan A, totaling \$46.4 million for the year ended December 31, 2020. Amounts included in "Thereafter" include principal payments and estimated interest expense through April 2031.

- (2) MEPPs withdrawal obligations include \$18.5 million for anticipated future interest payments. See Note 16, "Employee Retirement Plans," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for further discussion of the MEPPs withdrawal liability.
- (3) For the pension benefit obligations, contributions and benefit payments to be funded from Company assets included in the table have been actuarially estimated over a five year period. While benefit payments under these benefit plans are expected to continue beyond 2024, the Company believes that an estimate beyond this period is unreasonable.
- ⁽⁴⁾ Finance lease obligations include \$0.6 million for anticipated future interest payments.
- ⁽⁵⁾ Purchase obligations consist primarily of \$26.6 million in firm commitments to purchase press and finishing equipment and \$3.1 million of other purchase obligations.
- ⁽⁶⁾ Business acquisitions represents an estimated \$10.1 million of future cash payments associated with the acquisition of Ivie. See Note 3, "Acquisitions and Strategic Investments," to the consolidated financial statements in Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for further discussion.
- (7) The contractual obligations table above does not include reserves for uncertain tax positions recorded in accordance with the accounting guidance on uncertainties in income taxes. The Company has taken tax positions for which the ultimate amount and the year(s) any necessary payments will be made that pertain to those tax positions is uncertain. The reserve for uncertain tax positions prior to interest and penalties was \$17.8 million as of December 31, 2019, of which \$10.2 million was included in other long-term liabilities, \$7.3 million was included in deferred income taxes and \$0.3 million was included in accrued liabilities in the consolidated balance sheets. The Company has also recorded reserves for interest and penalties related to uncertain tax positions of \$1.0 million and \$0.1 million, respectively, as of December 31, 2019.
- ⁽⁸⁾ The contractual obligations table above does not include the share repurchase program as no repurchases are required under the program. See the "Share Repurchase Program" section above for further discussion, including the maximum potential cash payments under the program.

Critical Accounting Policies and Estimates

The Company's consolidated financial statements are prepared in accordance with GAAP. The Company's most critical accounting policies are those that are most important to the portrayal of its financial condition and results of operations, and which require the Company to make its most difficult and subjective estimates. Management is required to make judgments and estimates that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the statements, and the reported amounts of revenues and expenses during the reporting period. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The Company's management believes that such judgments and estimates are made with consistent and appropriate methods based on information available at the time, and that any reasonable deviation from those judgments and estimates would not have a material impact on the Company's consolidated financial position or results of operations. Actual results may differ from these estimates under different assumptions or conditions. To the extent that the estimates used differ from actual results, adjustments to the consolidated statements of operations and corresponding consolidated balance sheets would be necessary. These adjustments would be made in future statements.

The Company has identified the following as its critical accounting policies and estimates.

Revenue Recognition

Performance Obligations

At contract inception, the Company assesses the products and services promised in its contracts with customers and identifies performance obligations for each promise to transfer to the customer a product or service that is distinct. To identify the performance obligations, the Company considers the goods or services promised in the contract regardless of whether they are explicitly stated or are implied by customary business practices. The Company determined that the following distinct products and services represent separate performance obligations:

- Pre-Press Services
- Print
- Other Services

For Pre-Press and Other Services, the Company recognizes revenue at point-in-time upon completion of the performed service and acceptance by the customer. The Company considers transfer of control to occur once the service is performed as the Company has right to payment and the customer has legal title and risk and reward of ownership.

The Company recognizes its Print revenues upon transfer of title and the passage of risk of loss, which is pointin-time upon shipment to the customer, and when there is a reasonable assurance as to collectability. Revenues related to the Company's logistics operations, which includes the delivery of printed material, are included in the Print performance obligation and are also recognized at point-in-time as services are completed. Revenues related to the Company's imaging operations, which include digital content management, photography, color services and page production, are recognized in accordance with the terms of the contract, typically upon completion of the performed service and acceptance by the customer. Under agreements with certain customers, products may be stored by the Company for future delivery. In these situations, the Company may receive warehouse management fees for the services it provides.

Certain revenues earned by the Company require judgment to determine if revenue should be recorded gross as principal or net of related costs as an agent. Billings for third-party shipping and handling costs, primarily in the Company's logistics operations, and out-of-pocket expenses are recorded gross in net sales and cost of sales in the consolidated statements of operations in Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K. Many of the Company's operations process materials, primarily paper, that may be supplied directly by customers or may be purchased by the Company and sold to customers. No revenue is recognized for customer-supplied paper. Revenues for the Company-supplied paper are recognized on a gross basis. In some instances, the Company will deliver print work for a customer and bill the customer for postage. In these cases, the Company is acting as an agent and billings are recorded on a net basis in net sales.

Significant Payment Terms

Payment terms and conditions for contracts with customers vary. The Company typically offers standard terms of net 30 days. It is not the Company's standard business practice to offer extended payment terms longer than one year. The Company may offer cash discounts or prepayment and extended terms depending on certain facts and circumstances. As such, when the timing of the Company's delivery of products and services differs from the timing of payment, the Company will record either a contract asset or a contract liability.

Variable Consideration

When evaluating the transaction price, the Company analyzes on a contract by contract basis all applicable variable considerations and non-cash consideration and also performs a constraint analysis. The nature of the Company's contracts give rise to variable consideration, including, volume rebates, credits, discounts, and other similar items that generally decrease the transaction price. These variable amounts generally are credited to the customer, based on achieving certain levels of sales activity, when contracts are signed, or making payments within specific terms.

Product returns are not significant because the products are customized; however, the Company accrues for the estimated amount of customer allowances at the time of sale based on historical experience and known trends.

When the transaction price requires allocation to multiple performance obligations, the Company uses the estimated stand-alone selling prices using the adjusted market assessment approach.

Costs to Obtain Contracts

The Company capitalizes certain sales incentives of the sales compensation packages for costs that are directly attributed to being awarded a customer contract or renewal and would not have been incurred had the contract not been obtained. The Company also defers certain contract acquisition costs paid to the customer at contract inception. Costs to obtain contracts with a duration of less than one year are expensed as incurred. For all contract costs with contracts over one year, the Company amortizes the costs to obtain contracts on a straight-line basis over the estimated life of the contract and reviews quarterly for impairment.

The accounting policies and estimates related to revenue recognition were updated effective January 1, 2018 with the adoption of the revised guidance on recognizing revenue from contracts with customers (see Note 1, "Basis of Presentation and Summary of Significant Accounting Policies," and Note 2, "Revenue Recognition," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for more information).

Impairment of Goodwill

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets acquired in a business combination and is assigned to specific reporting units. Changes in management's estimates or judgments, including changes based on actual results differing from the estimates and judgments used in the purchase price allocation process, could result in an impairment charge, and such a charge could have a material adverse effect on the Company's results of operations. In accordance with accounting guidance, the Company performs an annual impairment test for goodwill as of October 31 or more frequently if events or changes in circumstances indicate that it is more likely than not that the fair value of a reporting unit is below its carrying value.

During the third quarter of 2019, the Company initiated an evaluation of strategic alternatives in relation to Quad's Book business within the United States Print and Related Services reporting unit that resulted in the decision to divest the business. Accordingly, the Company performed an interim assessment of the United States Print and Related Services reporting unit's goodwill for impairment. The fair value of the reporting unit was estimated using both an income valuation model (discounted cash flow) and a market approach based on the estimated selling price of the Book business in the then-current market environment. As a result of the then-anticipated divestiture, the Company recognized a non-cash goodwill impairment charge of \$10.1 million, representing the entire balance of goodwill associated with the Book business within the United States Print and Related Services reporting unit, as of July 31, 2019.

Within the United States Print and Related Services Segment, the Company has identified three reporting units: (1) Core Print and Related Services; (2) Specialty Print and Related Services; and (3) Other United States Products and Services. As of December 31, 2019, goodwill totaled \$103.0 million and was allocated to the Core Print and Related Services. The Specialty Print and Related Services reporting unit and the Other United States Products and Services reporting unit have no goodwill allocated to them. Additionally, there is no goodwill in the International segment on the consolidated balance sheets.

In determining the fair value of the Core Print and Related Services reporting unit as of October 31, 2019, the Company used an equal weighting of both the income and market approaches. Significant assumptions used under the income approach included: estimated future cash flows including expected future revenue growth, profit margins, capital expenditures, working capital levels, terminal value multiples and an 10.8% after-tax weighted average cost of capital for the Core Print and Related Services. Estimated future cash flows were based on the Company's internal projection models, industry projections and other assumptions deemed reasonable by management. Significant assumptions used under the market approach included: a control premium based on similar transactions, selection of the guideline public

companies and selected market multiples. This fair value determination was categorized as Level 3 in the fair value hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," to the consolidated financial statements in Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for the definition of Level 3 inputs).

After completing the annual evaluation, the estimated fair value of the Core Print and Related Services reporting unit in the United States Print and Related Services segment was determined to exceed the carrying value of the reporting unit. In addition, the Company performed a sensitivity analysis as of October 31, 2019, on the material assumptions used in the discounted cash flow valuation models. In performing the annual goodwill impairment assessment, the percentage by which estimated fair value exceeded carrying value in the Core Print and Related Services reporting unit was more than 50%. As such, management concluded that no impairment existed as of October 31, 2019. No additional indications of impairment were identified between October 31, 2019, and December 31, 2019.

Impairment of Property, Plant and Equipment and Finite-lived Intangible Assets

The Company performs impairment evaluations of its long-lived assets whenever business conditions, events or circumstances indicate that those assets may be impaired, including whether the estimated useful life of such long-lived assets may warrant revision or whether the remaining balance of an asset may not be recoverable. The Company's most significant long-lived assets are property, plant and equipment and customer relationship intangible assets recorded in conjunction with an acquisition. Assessing the impairment of long-lived assets requires the Company to make important estimates and assumptions, including, but not limited to, the expected future cash flows that the assets will generate, how the assets will be used based on the strategic direction of the Company, their remaining useful life and their residual value, if any. Considerable judgment is also applied in incorporating the potential impact of the current economic climate on customer demand and selling prices, the cost of production and the limited activity on secondary markets for the assets and on the cost of capital. When the estimated future undiscounted cash flows to be generated by the assets are less than the carrying value of the long-lived assets, the assets are written down to fair value and a charge is recorded to current operations. The Company uses internal discounted cash flow estimates, quoted market prices when available and independent appraisals, as appropriate, to determine fair value. This fair value determination was categorized as Level 3 in the fair value hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for the definition of Level 3 inputs).

The Company classifies long-lived assets to be sold as held for sale in the period in which: (i) there is an approved plan to sell the asset and the Company is committed to that plan, (ii) the asset is available for immediate sale in its present condition, (iii) an active program to locate a buyer and other actions required to sell the asset have been initiated, (iv) the sale of the asset is probable, (v) the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value, and (vi) it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Assets held for sale are initially measured at the lower of the carrying value or the fair value less cost to sell. Losses resulting from this measurement are recognized in the period in which the held for sale criteria are met while gains are not recognized until the date of sale. Once designated as held for sale, the Company stops recording depreciation expense on the property, plant and equipment. The fair value less cost to sell of long-lived assets held for sale is assessed at each reporting period until it no longer meets this classification.

Upon the decision to sell the Book business in the third quarter of 2019, the net assets of the Book business were reclassified as held for sale in accordance with the authoritative guidance. The fair value was determined by the Company based on internal discounted cash flows estimates, quoted market prices where available and independent appraisals, as appropriate. Accordingly, during the periods leading up to the pending disposition of the Book business, the Company continues to assess the carrying value of the net assets compared to the value implied by the bids received in connection with the sale process. As a result of this assessment, during the year ended December 31, 2019, the Company recorded non-cash impairment charges of \$92.1 million to reduce the carrying value to its estimated fair value, less costs to sell. See Note 4, "Discontinued Operations," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K for more information about the Company's intent to sell its Book business.

Based on the assessments completed during the years ended December 31, 2019, 2018 and 2017, the Company recognized property, plant and equipment impairment charges from continuing operations of \$7.9 million, \$26.2 million and \$12.0 million, respectively, primarily related to facility consolidations, as well as other capacity and strategic reduction restructuring initiatives. There were no finite-lived intangible asset impairment charges recorded during the years ended December 31, 2019, 2018 and 2017.

The Company continues to monitor groups of assets to identify any new events or changes in circumstances that could indicate that their carrying values are not recoverable, particularly in light of potential declines in profitability that may result from the highly competitive industry landscape and continued uncertainty in the global economy. In the event that there are significant and unanticipated changes in circumstances, such as significant adverse changes in business climate, adverse actions by regulators, unanticipated competition, loss of key customers and/or changes in technology or markets, or that actual results differ from management's estimates, a provision for impairment could be required in a future period.

Pension Plans

As a result of the acquisition of World Color Press, the Company acquired multiple underfunded pension plans. Pension plan costs are determined using actuarial methods and are funded through contributions determined in accordance with the projected benefit method pro-rated based on service. The Company records amounts relating to its pension plans based on calculations which include various actuarial assumptions. The Company believes that the two most critical assumptions are the discount rate and assumed rate of return on assets. Changes in these assumptions are primarily influenced by factors outside of the Company's control and can have a significant effect on the amounts reported in the financial statements. The Company reviews its actuarial assumptions on an annual basis and modifies the assumptions based on current rates and trends when it is appropriate to do so. The effects of modifications are recognized immediately on the consolidated balance sheets, but are generally amortized into operating income over future periods, with the deferred amount recorded in accumulated other comprehensive loss on the consolidated balance sheets included in Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K. The Company believes that the assumptions utilized in recording its obligations under its plans are reasonable based on its experience, market conditions and input from its actuaries and investment advisors. When an event gives rise to both a curtailment and a settlement, the curtailment is accounted for prior to the settlement. The Company's measurement date to measure the defined benefit plan assets and the projected benefit obligation is December 31. For the purposes of calculating the expected return on plan assets, those assets are valued at fair value.

The Company determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs for each pension plan based on an index of high-quality corporate bond yields and matchedfunding yield curve analysis as of that date. The Company measures interest costs for pension benefits by applying the specific spot rates along that yield curve to the plans' liability cash flows.

The weighted average discount rate used to determine benefit obligations for the pension plans at December 31, 2019, was 3.20%, a 102 basis point decrease from the discount rate of 4.22% at December 31, 2018. A one-percentage point change in the discount rate would have the following impact on the projected benefit obligation as of December 31, 2019:

	1.0% Increase	1.0° Decre	
	(in r	nillions)	
Projected benefit obligation	\$ (44.2	7) \$	55.5

The Company employs a total return on investment approach for its pension plans whereby a diversified mix of equity securities and debt securities are used to maximize the long-term pension plan assets. The intent of this strategy is to outperform the growth in plan liabilities over the long run, such that plan contributions can be decreased, balanced with maintaining a lower degree of investment risk. Risk tolerance is established through careful consideration of plan liabilities, plan funded status, and corporate financial condition. Equity securities are diversified across geography and market capitalization through investments in United States large-capitalization stocks, United States small-capitalization

stocks and international securities. Investment risk is measured and monitored on an ongoing basis through annual liability measurements, periodic asset/liability studies and quarterly investment portfolio reviews. The expected long-term rate of return for plan assets is based upon many factors including expected asset allocations, historical asset returns, current and expected future market conditions and risk. The current target asset allocation for plan assets on a weighted average basis are 30% equity securities and 70% debt securities. The actual asset allocation as of December 31, 2019, was approximately 30% equity securities and 70% debt securities. The expected return on plan assets assumption was 6.25% and 6.50% at December 31, 2019 and 2018, respectively, for the Company's funded United States pension plans. Actual return on plan assets was 21.28% and (5.43)% for the years ended December 31, 2019 and 2018, respectively. Certain pension plans are unfunded (those plans do not hold plan assets).

A 25 basis point change in the expected return on plan assets would have the following impact on net pension income for the year ended December 31, 2019:

	0.25% ncrease]	0.25% Decrease
	(in mi	llion	s)
Net pension income	\$ 1.1	\$	(1.1)

The Company also participated in MEPPs as a result of the acquisition of World Color Press. The Company has withdrawn from all significant MEPPs and replaced these union sponsored "promise to pay in the future" defined benefit plans with a Company sponsored "pay as you go" defined contribution plan. The two MEPPs, the GCIU and the GCC, are significantly underfunded, and require the Company to pay a withdrawal liability to fund its pro rata share of the underfunding as of the plan year the full withdrawal was completed. As a result of the decision to withdraw, the Company accrued the estimated withdrawal liability based on information provided by each plan's trustee.

In 2016, the Company and the GCC reached a settlement agreement for all claims, with scheduled payments until February 2024.

The Company recorded a \$32.1 million increase to the MEPPs withdrawal liability during the year ended December 31, 2018, which was a result of unfavorable rulings following litigation with the GCIU trustees, and was recorded in restructuring, impairment and transaction-related charges in the consolidated statements of operations. In 2019, the Company and the GCIU reached a settlement agreement for all claims, with scheduled payments until April 2032.

New Accounting Pronouncements

See Note 24, "New Accounting Pronouncements," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to a variety of market risks which may adversely impact the Company's results of operations and financial condition, including changes in interest and foreign currency exchange rates, changes in the economic environment that would impact credit positions and changes in the prices of certain commodities. The Company's management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in the identification, assessment and control of various risks. These risk management strategies may not fully insulate the Company from adverse impacts due to market risks.

Interest Rate Risk

The Company is exposed to interest rate risk on variable rate debt obligations and price risk on fixed rate debt and finance leases. The variable rate debt outstanding at December 31, 2019, was primarily comprised of \$768.3 million outstanding on the Term Loan A. As of December 31, 2019, there was no outstanding balance on the revolving credit

facility. In order to reduce the variability of cash flows from interest payments related to a portion of Quad's variablerate debt, the Company entered into a \$250.0 million interest rate swap in February 2017 and a \$130.0 million interest rate swap in March 2019, and has classified \$380.0 million of the Company's variable rate debt as fixed rate debt. Including the impact of the \$380.0 million interest rate swap of variable rate to fixed rate debt, Quad had variable rate debt outstanding of \$388.1 million at a current weighted average interest rate of 4.5% and fixed rate debt and finance leases outstanding of \$724.1 million at a current weighted average interest rate of 5.6% as of December 31, 2019. A hypothetical 10% increase in the market interest rates impacting the Company's current weighted average interest rate on variable rate debt obligations would not have a material impact on the Company's interest expense. A hypothetical 10% change in market interest rates would change the fair value of fixed rate debt at December 31, 2019, by approximately \$6 million.

Foreign Currency Risk and Translation Exposure

The Company is exposed to the impact of foreign currency fluctuations in certain countries in which it operates. The exposure to foreign currency movements is limited in most countries because the operating revenues and expenses of its various subsidiaries and business units are substantially in the local currency of the country in which they operate. To the extent revenues and expenses are not in the applicable local currency, the Company may enter into foreign exchange forward contracts to hedge the currency risk.

Although operating in local currencies may limit the impact of currency rate fluctuations on the results of operations of the Company's non-United States subsidiaries and business units, rate fluctuations may impact the consolidated financial position as the assets and liabilities of its foreign operations are translated into U.S. dollars in preparing the Company's consolidated balance sheets. As of December 31, 2019, the Company's foreign subsidiaries (excluding Argentina due to the economy's status as highly inflationary) had net current assets (defined as current assets less current liabilities) subject to foreign currency translation risk of \$28.3 million. The potential decrease in net current assets as of December 31, 2019, from a hypothetical 10% adverse change in quoted foreign currency exchange rates would be approximately \$2.8 million. This sensitivity analysis assumes a parallel shift in all major foreign currency exchange rates rarely move in the same direction relative to the U.S. dollar due to positive and negative correlations of the various global currencies. This assumption may overstate or understate the impact of changing exchange rates on individual assets and liabilities denominated in a foreign currency.

The Company's hedging operations have historically not been material, and gains or losses from these operations have not been material to the Company's results of operations, financial position or cash flows. The Company does not use derivative financial instruments for trading or speculative purposes.

These international operations are subject to risks typical of international operations, including, but not limited to, differing economic conditions, changes in political climate, potential restrictions on the movement of funds, differing tax structures, and other regulations and restrictions. Accordingly, future results could be adversely impacted by changes in these or other factors.

The Company has considered the economy in Argentina to be highly inflationary, effective June 30, 2018. In accordance with ASC 830 "Foreign Currency Matters", a highly inflationary economy is one that has experienced cumulative inflation of approximately 100 percent or more over a three-year period. An entity is required to apply the revised accounting guidance in the reporting period following when the economy was deemed to be highly inflationary. As a result of this classification, the functional currency of the Company's Argentina Subsidiaries was changed from the local currency to the U.S. Dollar, beginning July 1, 2018, and impacts from the change in the value of the local currency for monetary assets and liabilities is now reflected in the consolidated statements of operations. The total impact from foreign currency losses was \$2.8 million and \$1.5 million during the years ended December 31, 2019 and 2018, respectively, and was recorded in restructuring, impairment and transaction-related charges in the consolidated assets as of December 31, 2019, and less than 2.0% of total consolidated net sales for the year ended December 31, 2019.

Credit Risk

Credit risk is the possibility of loss from a customer's failure to make payments according to contract terms. Prior to granting credit, each customer is evaluated in an underwriting process, taking into consideration the prospective customer's financial condition, past payment experience, credit bureau information and other financial and qualitative factors that may affect the customer's ability to pay. Specific credit reviews and standard industry credit scoring models are used in performing this evaluation. Customers' financial condition is continuously monitored as part of the normal course of business. Some of the Company's customers are highly leveraged or otherwise subject to their own operating and regulatory risks. Based on those customer account reviews and due to the continued uncertainty of the global economy, the Company has established an allowance for doubtful accounts of \$25.0 million as of December 31, 2019.

The Company has a large, diverse customer base and does not have a high degree of concentration with any single customer account. During the year ended December 31, 2019, the Company's largest customer accounted for less than 5% of the Company's net sales. Even if the Company's credit review and analysis mechanisms work properly, the Company may experience financial losses in its dealings with customers and other parties. Any increase in nonpayment or nonperformance by customers could adversely impact the Company's results of operations and financial condition. Economic disruptions could result in significant future charges.

Commodity Risk

The primary raw materials that Quad uses in its print business are paper, ink and energy. At this time, the Company's supply of raw materials is readily available from numerous vendors; however, based on market conditions, that could change in the future. The Company generally buys these raw materials based upon market prices that are established with the vendor as part of the procurement process.

Approximately half of the paper used in the printing process is supplied directly by its clients. For those clients that do not directly supply their own paper, the Company makes use of its purchasing efficiencies to supply paper by negotiating with leading paper vendors, uses a wide variety of paper grades, weights and sizes, and does not rely on any one vendor. In addition, the Company generally includes price adjustment clauses in sales contracts for paper and other critical raw materials in the printing process. Although these clauses generally mitigate paper price risk, higher paper prices and tight paper supplies, as well as changes in the United States import or trade regulations may have an impact on client demand for printed products. The Company's working capital requirements, including the impact of seasonality, are partially mitigated through the direct purchasing of paper by its clients.

The Company produces the majority of ink used in its print production, allowing it to control the quality, cost and supply of key inputs. Raw materials for the ink manufacturing process are purchased externally from a variety of vendors.

The Company generally cannot pass on to clients the impact of higher electric and natural gas energy prices on its manufacturing costs, and increases in energy prices result in higher manufacturing costs for certain of its operations. The Company mitigates its risk through natural gas hedges when appropriate. In its logistic operations, however, the Company is able to pass a substantial portion of any increase in fuel prices directly to its clients.

As a result, management believes a hypothetical 10% change in the price of paper and other raw materials would not have a significant direct impact on the Company's consolidated annual results of operations or cash flows; however, significant increases in commodity pricing or tight supply could influence future client demand for printed products. Inflation has not had a significant impact on the Company historically.

Item 8. <u>Financial Statements and Supplementary Data</u>

Quarterly Financial Data (Unaudited)

The following table sets forth selected financial information for each of the eight quarters in the two-year period ended December 31, 2019. This unaudited information has been prepared by the Company on the same basis as the consolidated financial statements and includes all normal recurring adjustments necessary to present this information fairly when read in conjunction with the Company's audited consolidated financial statements and the notes thereto.

UNAUDITED INTERIM FINANCIAL INFORMATION

(In millions, except per share data)

	Year Ended December 31,						
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Full Year		
2019							
Net sales	\$ 961.0	\$ 948.9	\$ 943.6	\$ 1,069.9	\$ 3,923.4		
Restructuring, impairment and transaction-related charges	7.6	9.4	56.7	15.7	89.4		
Operating income (loss) from continuing operations ⁽¹⁾	16.4	18.7	(29.4)	29.0	34.7

Earnings (loss) per diluted share attributable to Quad common shareholders	(0.07) 0.18	0.46	(0.42)	0.16		

⁽¹⁾ Operating income from continuing operations increased \$4.1 million during the three months ended March 31, 2019, as compared to the three months ended March 31, 2018, primarily due to the following: (1) a \$22.3 million non-cash expense related to special employee retirement contribution in 2018 resulting from the benefit of tax reform that did not repeat in 2019; (2) \$17.3 million of decreased restructuring, impairment and transaction related charges; (3) savings from cost reduction initiatives; including employee-related costs; and (3) earnings from the Ivie and Periscope acquisition and investment in Rise. These impacts were partially offset by the following: (1) lower print volume and pricing due to ongoing industry pressures; (2) a \$16.4 million net benefit in 2018 in gains from property insurance claims; and (3) a \$5.0 million benefit in 2018 from changes in employee vacation policies.

Operating income from continuing operations decreased \$7.2 million during the three months ended June 30, 2019, as compared to the three months ended June 30, 2018, primarily due to the following: (1) lower print volume and pricing due to ongoing industry pressures from excess capacity in the printing industry; (2) an increase in employee-related costs, primarily due to an \$8.0 million increase in production hourly wages in our most competitive labor markets; and (3) a \$7.0 million decrease in paper byproduct recoveries, partially offset by the following: (1) savings from cost reduction initiatives; (2) earnings from the Periscope acquisition; and (3) \$1.0 million of decreased restructuring, impairment and transaction-related charges.

Operating income from continuing operations decreased \$76.4 million during the three months ended September 30, 2019, as compared to the three months ended September 30, 2018, primarily due to the following: (1) \$51.4 million of increased restructuring, impairment and transaction-related charges; (2) lower print volume and pricing due to ongoing industry pressures from excess capacity in the printing industry; (3) an increase in employee related costs, primarily due to a \$7.5 million increase in production hourly wages in our most competitive labor markers; and (4) an \$8.4 million decrease in paper byproduct recoveries, partially offset by the following: (1) savings from cost reduction initiatives; (2) earnings from the Periscope acquisition; and (3) a \$2.8 million decrease in depreciation and amortization expense;

Operating income from continuing operations increased \$26.9 million for the three months ended December 31, 2019, as compared to the three months ended December 31, 2018, primarily due to the following: (1) \$47.0 million of decreased restructuring, impairment and transaction-related charges; (2) savings from cost reduction initiatives; and (3) earnings from the Periscope acquisition, partially offset by the following: (1) lower print volume and pricing due to ongoing industry pressures; (2) a \$12.7 million decrease in paper byproduct recoveries; (3) a \$5.6 million gain in 2018 from a sales tax litigation settlement in Peru that did not repeat in 2019; and (4) an increase in employee related costs, primarily due to a \$4.7 million increase in production hourly wages in our most competitive labor markets.

⁽²⁾ The results of operations of the Company's United States Book business are included in the earnings (loss) from discontinued operations (see Note 4, "Discontinued Operations," to the consolidated financial statements in Item 8 of this Annual Report on Form 10-K).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Quad/Graphics, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Quad/Graphics, Inc. and subsidiaries (the "Company") as of December 31, 2019 and 2018, the related consolidated statements of operations, comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2019, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2019, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 19, 2020, expressed an unqualified opinion on the Company's internal control over financial reporting.

Change in Accounting Principle

As discussed in Note 13 to the financial statements, the Company has changed its method of accounting for leases, effective January 1, 2019, due to the adoption of Accounting Standards Update (ASU) No. 2016-02, Leases (Topic 842).

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Discontinued Operations - Refer to Notes 1 and 4 to the consolidated financial statements.

Critical Audit Matter Description

As described in Note 4 to the consolidated financial statements, in 2019 the Company made a decision to sell its United States Book business (the "Book business"). Management has reflected the results of this business as a discontinued operation in the consolidated statements of earnings for all periods presented. Management presents discontinued operations when there is a disposal or anticipated disposal of a component group or a group of components that, in management's judgment, represents a strategic shift that will have a major effect on operations and financial results.

Upon the decision to sell the Book business in 2019, the net assets of the Book business were reclassified as held for sale in accordance with the authoritative guidance. Accordingly, the Company is required to assess and measure the net assets at their fair value. In conjunction with this assessment, the fair value of long-lived assets, contract assets and goodwill was determined to be below the carrying value of the related assets. The Company recorded impairment charges of \$86.5 million, \$5.6 million and \$10.1 million, respectively, to reduce the carrying values to the estimated fair values. The fair value was determined by the Company based on internal discounted cash flows estimates, quoted market prices where available and independent appraisals, as appropriate.

The principal considerations for our determination that performing procedures relating to the planned divestiture and determination of fair value of the Book business is a critical audit matter is that there was a high degree of auditor effort, judgment and subjectivity involved in designing and performing procedures to evaluate the planned divestiture transaction, due to the estimates and assumptions made by management when assessing whether the Book business met the criteria to be classified as held for sale, including the probability of the sale being complete within one year, to estimate the fair value of the assets given the sensitivity of operations to changes in demand, historical results and the strategic plan of the Company. This required a high degree of auditor judgment and an increased extent of effort when performing audit procedures to evaluate the reasonableness of management's estimates and assumptions related to the determination of the fair value of the Book business and the audit effort required to review the accuracy of the Company's restatement of the prior period financial statements.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the classification of the Book business as a discontinued operation and impairment of assets within the Book business included the following, among others:

- We tested the effectiveness of controls related to management's assertion that the Book business met the criteria to be presented as a discontinued operation and the effectiveness of controls over management's goodwill and long-lived asset impairment evaluation.
- We inquired of management to understand progression of potential divestiture transactions.
- We inquired of management and reviewed management's plan to sell the business.
- We evaluated the evidence used by the Company in the evaluation of whether the planned divestiture met the criteria for discontinued operations, including the probability of the sale being completed within one year.
- We evaluated the allocation of goodwill to the Book business based on the weighting of the relative fair value of the Book business compared to the remainder of the Core Print reporting unit.
- We evaluated the reasonableness of management's forecasts of future net sales and EBITDA margins by comparing the forecasts to (1) historical growth of net sales and historical EBITDA margins,
 (2) management's long-range strategic plan which was communicated to the Board of Directors, and
 (3) forecasted information included in Company press releases, as well as, in analyst and industry reports for the Company and companies in its peer group.

- We evaluated the reasonableness of the (1) valuation methodology and (2) weighted average cost of capital by comparing the fair value calculated under the market approach and income approach, evaluating the weighting of each valuation methodology, testing the source information underlying the determination of the weighted average cost of capital and the mathematical accuracy of the calculation as well as developing a range of independent estimates and comparing those to the weighted average cost of capital selected by management.
- We evaluated the reasonableness of the assessment performed by management's specialist in the determination of the fair value of the real estate of the long-lived assets by comparing the determined fair value to our independent estimate through comparison to external sources.
- We reviewed the accuracy of the Company's restatement of the prior period financial statements.

Revenues - Refer to Notes 1 and 2 to the consolidated financial statements

Critical Audit Matter Description

The Company recognizes revenue upon transfer of control of promised products or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products or services. The Company has various products and service lines which have differing levels involvement of management judgment and timing of revenue recognition.

We identified revenues as a critical audit matter because of the diversity in products and service lines and diversity in audit evidence obtained as each billing arrangement is individually unique which requires a higher degree of auditor judgment and an increased extent of effort when designing and performing audit procedures to evaluate the appropriateness of management's estimates and audit evidence related to the recognition of revenues.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to revenues included the following:

- We tested the effectiveness of controls related to the revenue recognition process.
- We evaluated management's significant accounting policies related to revenue recognition for reasonableness.
- We selected a sample of recorded revenue transactions and performed the following procedures:
 - Obtained customer source documents and the contract for each selection, including master agreements and related amendments to evaluate if relevant contractual terms have been appropriately considered by management.
 - Evaluated management's application of their accounting policy and tested revenue recognition for specific performance obligations by comparing management's conclusions to the underlying master agreement and any related amendments.
 - Tested the mathematical accuracy of management's calculations of revenue and the associated timing of revenue recognized in the financial statements.

We have served as the Company's auditor since 2002.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Quad/Graphics, Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Quad/Graphics, Inc. and subsidiaries (the "Company") as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2019, of the Company and our report dated February 19, 2020, expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company's adoption of a new accounting standard.

As described in Management's Report on Internal Control Over Financial Reporting, management excluded from its assessment the internal control over financial reporting at Periscope, Inc. ("Periscope"), which was acquired on January 3, 2019. The operations that were excluded from the assessment constitute approximately 3% of consolidated total current assets, approximately 1% of consolidated net sales and approximately 1% of consolidated cost of sales as of and for the year ended December 31, 2019. Accordingly, our audit did not include the internal control over financial reporting at Periscope.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Note 1. Basis of Presentation and Summary of Significant Accounting Policies

Nature of Operations—Quad is a worldwide marketing solutions partner dedicated to creating a better way for its clients through a data-driven, integrated marketing platform that helps reduce complexity, increase efficiency and enhance marketing spend effectiveness. Quad provides its clients with unmatched scale for on-site services and expanded subject expertise in marketing strategy, creative solutions, media deployment (which includes a strong foundation in print) and marketing management services. With a client-centric approach, that drives its expanded offering, combined with leading-edge technology and single-source simplicity, the Company believes it has the resources and knowledge to help a wide variety of clients in multiple vertical industries, including retail, financial/insurance, healthcare, consumer packaged goods, publishing and direct-to-consumer.

The Company operates primarily in the commercial print portion of the printing industry as a printer of retail inserts, publications, catalogs, special interest publications, journals, direct mail, directories, in-store marketing and promotion, packaging, newspapers, custom print products, other commercial and specialty printed products and global paper procurement. The Company's products and services for a variety of industries are sold primarily throughout North America, South America and Europe. In addition, the Company strategically sources packaging product manufacturing over multiple end markets in Central America and Asia.

Principles of Consolidation and Basis of Presentation—The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned and majority-owned controlled subsidiaries and have been prepared in accordance with GAAP. The results of operations and accounts of businesses acquired are included in the consolidated financial statements from the dates of acquisition (see Note 3, "Acquisitions and Strategic Investments").

Investments in entities where the Company has both the ability to exert significant influence but not control and an ownership interest of 50% or less but more than 20% are accounted for using the equity method of accounting. Investments in entities where the Company does not exert significant influence or control and has an ownership interest of less than 20% are accounted for using the cost method of accounting. Intercompany transactions and balances have been eliminated in consolidation.

Discontinued Operations—The results of operations of the Company's Book business have been reported as discontinued operations for all periods presented, in accordance with ASC 205-20 — *Discontinued Operations*. The corresponding current and long-term assets and liabilities of the Book business have been classified as held for sale in the consolidated balance sheets in accordance with ASC 205-20 as of December 31, 2019 and 2018. The financial information pertaining to discontinued operations has been excluded from all relevant notes to the consolidated financial statements, unless otherwise noted. See all required disclosures and further information in Note 4, "Discontinued Operations" for information about the Company's intent to sell its Book business.

Foreign Operations—Assets and liabilities denominated in foreign currencies are translated into United States dollars at the exchange rate existing at the respective balance sheet dates. Income and expense items are translated at the average rates during the respective periods. Translation adjustments resulting from fluctuations in exchange rates are recorded as a separate component of accumulated other comprehensive income (loss) on the consolidated statements of shareholders' equity, while transaction gains and losses are recorded in selling, general and administrative expenses on the consolidated statements of operations. Foreign exchange transactions resulted in losses of \$1.2 million during the year ended December 31, 2019, gains of \$1.6 million during the year ended December 31, 2018, and losses of \$1.5 million during the year ended December 31, 2017.

The Company had a 49% interest in Plural, a commercial printer based in São Paulo, Brazil, as of December 31, 2019. The Company accounts for this entity using the equity method of accounting. The Company's equity in the (earnings) loss of Plural's operations was recorded in equity in (earnings) loss of unconsolidated entity in the Company's consolidated statements of operations, and was included within the International segment. Distributions received from equity method investees follow the nature of the distribution approach, where each distribution is evaluated on the basis of the source of the payment and is classified as either operating cash inflows or investing cash inflows. The Company reviews its equity method investment regularly for indicators of other than temporary impairment. Quad had no other significant unconsolidated entities as of December 31, 2019.

Use of Estimates—The preparation of consolidated financial statements requires the use of management's estimates and assumptions that affect the reported assets and liabilities, disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from these estimates. Estimates are used when accounting for items and matters including, but not limited to: allowances for doubtful accounts, inventory obsolescence, asset valuations and useful lives, pension and postretirement benefits, self-insurance reserves, stock-based compensation, taxes, restructuring and other provisions and contingencies.

Revenue Recognition—The Company recognizes its products and services revenue based on when the transfer of control passes to the customer or when the service is completed and accepted by the customer. Under agreements with certain customers, products may be stored by the Company for future delivery. In these situations, the Company may receive warehouse management fees for the services it provides. Product returns are not significant because the products are customized; however, the Company accrues for the estimated amount of customer allowances at the time of sale based on historical experience and known trends.

Revenue from services is recognized as services are performed. Revenues related to the Company's imaging operations, which include digital content management, photography, color services and page production, are recognized in accordance with the terms of the contract, typically upon completion of the performed service and acceptance by the customer. Revenues related to the Company's logistics operations, which includes the delivery of printed material, are recognized upon completion of services.

Certain revenues earned by the Company require judgment to determine if revenue should be recorded gross as a principal or net of related costs as an agent. Billings for third-party shipping and handling costs, primarily in the Company's logistics operations, and out-of-pocket expenses are recorded gross in net sales and cost of sales in the consolidated statements of operations. Many of the Company's operations process materials, primarily paper, that may be supplied directly by customers or may be purchased by the Company and sold to customers. No revenue is recognized for customer-supplied paper. Revenues for Company-supplied paper are recognized on a gross basis.

On January 1, 2018, the Company adopted Accounting Standards Update 2014-09, "Revenue from Contracts with Customers" ("ASU 2014-09"), which provides revised guidance on recognizing revenue from contracts with customers. The Company adopted ASU 2014-09 using the modified retrospective approach and applied the guidance applied the new guidance under ASC 606 — Revenue from Contracts with Customers ("ASC 606") to those contracts which were not completed as of January 1, 2018. This means that ASC 606 has been applied to the 2018 financial statements and disclosures going forward, but that prior period financial statements and disclosures reflect the revenue recognition standard of ASC 605 — *Revenue Recognition*. See Note 2, "Revenue Recognition," for additional accounting policy and transition disclosures.

Byproduct Recoveries—The Company presents byproduct recoveries as a reduction of cost of sales–products in the consolidated statements of operations. Classification of byproduct recoveries as a reduction of cost of sales aligns the proceeds from byproduct recoveries with the corresponding manufacturing costs.

Financial Instruments—The Company uses derivative financial instruments for the purpose of hedging interest rate, commodity and foreign exchange exposures that exist as part of ongoing business operations, including interest rate swap agreements, natural gas forward purchase contracts and foreign exchange contracts. As a policy, the Company does not engage in speculative or leveraged transactions, nor does the Company hold or issue financial instruments for trading purposes.

Derivative instruments are recorded on the consolidated balance sheets as either assets or liabilities measured at their fair value. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portion of the changes in the fair value of the derivative are recorded as a component of accumulated other comprehensive income (loss) and recognized in the consolidated statements of operations when the hedged item affects earnings.

The ineffective portions of the changes in the fair value of hedges are insignificant and recognized in earnings. Cash flows from derivatives that are accounted for as cash flow or fair value hedges are included in the consolidated statements of cash flows in the same category as the item being hedged.

Fair Value Measurement—The Company applies fair value accounting for all assets and liabilities that are recognized or disclosed at fair value in its consolidated financial statements on a recurring basis. Fair value represents the amount that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities that are required to be recorded at fair value, the Company considers the principal or most advantageous market and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability. See Note 15, "Financial Instruments and Fair Value Measurements," for further discussion.

Research and Development—Research and development costs related to the development of new products or the adaptation of existing products are expensed as incurred, included in cost of sales and totaled \$3.6 million, \$3.6 million and \$9.0 million during the years ended December 31, 2019, 2018 and 2017, respectively.

Cash and Cash Equivalents and Restricted Cash—The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Receivables—Receivables are stated net of allowances for doubtful accounts. No single customer comprised more than 5% of the Company's consolidated net sales in 2019, 2018 or 2017, or 5% of the Company's consolidated receivables as of December 31, 2019 or 2018. Specific customer provisions are made when a review of significant outstanding amounts, utilizing information about customer creditworthiness and current economic trends, indicates that collection is doubtful. In addition, provisions are made at differing rates, based upon the age of the receivable and the Company's historical collection experience. Accounts that are deemed uncollectible are written off when all reasonable collection efforts have been exhausted. See Note 7, "Receivables," for further discussion on the transactions affecting the allowances for doubtful accounts.

Inventories—Inventories include material, labor, and plant overhead and are stated at the lower of cost or net realizable value. At December 31, 2019 and 2018, all inventories were valued using the first-in, first-out ("FIFO") method. See Note 8, "Inventories," for the components of the Company's inventories.

Leases

On January 1, 2019, the Company adopted Accounting Standards Update 2016-02, "Leases (Topic 842)" ("ASU 2016-02"), which establishes a right-of-use model requiring a lessee to record a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than twelve months. Leases are classified as either finance or operating, with classification affecting the pattern of expense recognition. The Company adopted ASU 2016-02 using the modified retrospective approach and applied the new guidance under Accounting Standards Codification 842 — *Leases* ("ASC 842") to those contracts existing at, or entered into after, January 1, 2019. See Note 13, "Leases," for additional accounting policy and transition disclosures.

Property, Plant and Equipment—Property, plant and equipment are recorded at cost, and are depreciated over the estimated useful lives of the assets using the straight-line method for financial reporting purposes. See Note 9, "Property, Plant and Equipment," for the components of the Company's property, plant and equipment. Major improvements that extend the useful lives of existing assets are capitalized and charged to the asset accounts. Repairs and maintenance, which do not significantly improve or extend the useful lives of the respective assets, are expensed as incurred. Leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life of the respective asset. When an asset is retired or disposed, the associated costs and accumulated depreciation are eliminated, and the resulting gain or loss is recognized in the Company's consolidated statements of operations.

Asset Category	Range of Useful Lives		
Buildings	10 to 40 Years		
Machinery and equipment.	3 to 15 Years		
Other	3 to 10 Years		

Other Intangible Assets—Identifiable intangible assets are recognized apart from goodwill and are amortized over their estimated useful lives.

Impairment of Long-Lived and Other Intangible Assets—The Company evaluates long-lived assets and other intangible assets (of which the most significant are property, plant and equipment; right-of-use assets and customer relationship intangible assets) whenever events and circumstances have occurred that indicate the carrying value of an asset may not be recoverable. Determining whether impairment has occurred typically requires various estimates and assumptions, including determining which cash flows are directly related to the potentially impaired asset, the useful life over which cash flows will occur, their amount and the asset's residual value, if any. In turn, assessing whether there is an impairment loss requires a determination of recoverability, which is generally estimated by the ability to recover the balance of the assets from expected future operating cash flows on an undiscounted basis. If impairment is determined to exist, any related impairment loss is calculated based on the difference in the fair value and carrying value of the asset.

Goodwill—Goodwill is reviewed annually for impairment as of October 31, or more frequently if events or changes in circumstances indicate that it is more likely than not that the fair value of a reporting unit is below its carrying value. In performing this analysis, the Company compares each reporting unit's fair value to its carrying value. The fair value is estimated based on comparable company market valuations and/or expected future discounted cash flows to be generated by the reporting unit. If the carrying value exceeds the reporting unit's fair value, an impairment loss would be charged to operations in the period identified. See Note 6, "Goodwill and Other Intangible Assets," for further discussion.

Income Taxes—The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of items reported in the financial statements. Under this method, deferred tax assets and liabilities are measured based on the differences between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the effective date of enactment.

The Company records net deferred tax assets to the extent the Company believes these assets will more likely than not be realized. This determination is based upon all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies, and recent financial operations. If the Company determines that a deferred income tax asset will not be fully realized in the future, then a valuation allowance is established or increased to reflect the amount at which the asset will more likely than not be realized, which would increase the Company's provision for income taxes. In a period after a valuation allowance has been established, if the Company determines the related deferred income tax assets will be realized in the future in excess of their net recorded amount, then an adjustment to reduce the related valuation allowance will be made, which would reduce the Company's provision for income taxes.

The Company is regularly audited by foreign and domestic tax authorities. These audits occasionally result in proposed assessments where the ultimate resolution might result in the Company owing additional taxes, including in some cases, penalties and interest. The Company recognizes a tax position in its consolidated financial statements when it is more likely than not that the position would be sustained upon examination by tax authorities. This recognized tax position is then measured at the largest amount of benefit that is more likely than not of being recognized upon ultimate settlement. The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense.

The determination of the Company's worldwide tax provision and related tax assets and liabilities requires the use of significant judgment in estimating the impact of uncertainties in the application of GAAP and the interpretation of complex tax laws. In the ordinary course of business, there are transactions and calculations where the final tax outcome is uncertain. Where fair market value is required to measure a tax asset or liability for GAAP purposes, the Company periodically obtains independent, third party assistance to validate that such value is determined in conformity with Internal Revenue Service fair market value guidelines. While the Company believes it has the appropriate support for the positions taken, certain positions may be successfully challenged by taxing authorities. Resolution of these uncertainties in a manner inconsistent with management's expectations could have a material impact on the Company's financial condition and operating results. The Company applies the provisions of the authoritative guidance on accounting for uncertain tax positions to determine the appropriate amount of tax benefits to be recognized with respect to uncertain tax positions. The determination of the Company's worldwide tax provision includes the impact of any changes to the amount of tax benefits recognized with respect to uncertain tax positions. See Note 14, "Income Taxes," for further discussion.

Pension Plans—The Company assumed certain frozen underfunded defined benefit pension plans as part of the 2010 World Color Press acquisition. Pension plan costs are determined using actuarial methods and are funded through contributions. The Company records amounts relating to its pension plans based on calculations which include various actuarial assumptions including discount rates, assumed rates of return, and mortality. The Company reviews its actuarial assumptions on an annual basis and modifies the assumptions based on current rates and trends when it is appropriate to do so. The effects of modifications are recognized immediately on the consolidated balance sheets, but are generally amortized into operating income over future periods, with the deferred amount recorded in accumulated other comprehensive loss on the consolidated balance sheets. The Company believes that the assumptions utilized in recording its obligations under its plans are reasonable based on its experience, market conditions and input from its actuaries and investment advisors. For the purposes of calculating the expected return on plan assets, those assets are valued at fair value. When an event gives rise to both a curtailment and a settlement, the curtailment is accounted for

prior to the settlement. The Company's measurement date to measure the defined benefit plan assets and the projected benefit obligation is December 31.

The Company has previously participated in MEPPs as a result of the acquisition of World Color Press. Due to the significant underfunded status of the MEPPs, the Company has withdrawn from all significant MEPPs and replaced these union sponsored "promise to pay in the future" defined benefit plans with a Company sponsored "pay as you go" defined contribution plan, which is historically the form of retirement benefit provided to Quad's employees. As a result of the decision to withdraw, the Company recorded an estimated withdrawal liability for the MEPPs as part of the World Color Press purchase price allocation process based on information received from the MEPPs' trustees. See Note 16, "Employee Retirement Plans," for further discussion.

Stock-Based Compensation—The Company recognizes stock-based compensation expense over the vesting period for all stock-based awards made to employees and directors based on the fair value of the instrument at the time of grant. Equity awards accounted for as liabilities are recorded at fair value on the initial issuance date and are remeasured to fair value at each reporting period, with the change in fair value being recorded in selling, general and administrative expense in the condensed consolidated statements of operations. See Note 18, "Equity Incentive Programs," for further discussion.

Accumulated Other Comprehensive Income (Loss)—Accumulated other comprehensive income (loss) consists primarily of unrecognized actuarial gains and losses and prior service costs for pension plans, foreign currency translation adjustments and interest rate swap adjustments, and is presented in the consolidated statements of shareholders' equity. See Note 20, "Accumulated Other Comprehensive Loss," for further discussion.

Supplemental Cash Flow Information—The following table summarizes certain supplemental cash flow information for the years ended December 31, 2019, 2018 and 2017:

	2019			2018	2017
Interest paid, net of amounts capitalized	\$	7.1	\$	60.5	\$ 57.8

Equity incentive awards		(3.2))	_	
Acquisition of businesses—net of cash acquired	\$ 12	21.0	\$	71.4	\$

Note 2. Revenue Recognition

The Company recognizes its products and services revenue based on when the transfer of control passes to the customer or when the service is completed and accepted by the customer.

The adoption of ASC 606 in the year ended December 31, 2018, did not have a material effect on the consolidated financial statements. In adopting ASC 606, the timing of recognition changed for certain variable consideration paid to customers and costs to obtain contracts with customers.

Revenue Disaggregation

The following table provides information about disaggregated revenue by the Company's operating segments and major products and services offerings for the years ended December 31, 2019, 2018 and 2017:

United States Print and Related Services In			ternational	Total

Nature of Products and Services

The products offering is predominantly comprised of the Company's print operations which includes retail inserts, publications, catalogs, special interest publications, journals, direct mail, directories, in-store marketing and promotion, packaging, newspapers, custom print products, other commercial and specialty printed products and global paper procurement.

The Company considers its logistic operations as services, which include the delivery of printed material. The Services offering also includes revenues related to the Company's imaging operations, which include digital content management, photography, color services, page production, marketing services, media planning and placement, facilities management and medical services.

Performance Obligations

At contract inception, the Company assesses the products and services promised in its contracts with customers and identifies performance obligations for each promise to transfer to the customer a product or service that is distinct. To identify the performance obligations, the Company considers the goods or services promised in the contract regardless of whether they are explicitly stated or are implied by customary business practices. The Company determined that the following distinct products and services represent separate performance obligations:

- Pre-Press Services
- Print
- Other Services

For Pre-Press and Other Services, the Company recognizes revenue at point-in-time upon completion of the performed service and acceptance by the customer. The Company considers transfer of control to occur once the service is performed as the Company has right to payment and the customer has legal title and risk and reward of ownership.

The Company recognizes its Print revenues upon transfer of title and the passage of risk of loss, which is pointin-time upon shipment to the customer, and when there is a reasonable assurance as to collectability. Revenues related to the Company's logistics operations, which includes the delivery of printed material, are included in the Print performance obligation and are also recognized at point-in-time as services are completed. Under agreements with certain customers, products may be stored by the Company for future delivery. In these situations, the Company may receive warehouse management fees for the services it provides. Revenue from warehouse management fees was immaterial for the years ended December 31, 2019, 2018 and 2017.

Certain revenues earned by the Company require judgment to determine if revenue should be recorded gross as principal or net of related costs as an agent. Billings for third-party shipping and handling costs, primarily in the Company's logistics operations, and out-of-pocket expenses are recorded gross in net sales and cost of sales in the consolidated statements of operations. Many of the Company's operations process materials, primarily paper, that may be supplied directly by customers or may be purchased by the Company and sold to customers. No revenue is recognized for customer-supplied paper. Revenues for the Company-supplied paper are recognized on a gross basis. In some cases, the Company will print items that are mailed to consumers and bill the customer for postage. In these cases, the Company is acting as an agent and billings are recorded on a net basis in net sales.

Significant Payment Terms

Payment terms and conditions for contracts with customers vary. The Company typically offers standard terms of net 30 days. It is not the Company's standard business practice to offer extended payment terms longer than one year. The Company may offer cash discounts or prepayment and extended terms depending on certain facts and circumstances. As such, when the timing of the Company's delivery of products and services differs from the timing of payment, the Company will record either a contract asset or a contract liability.

Variable Consideration

When evaluating the transaction price, the Company analyzes on a contract by contract basis all applicable variable considerations and non-cash consideration and also performs a constraint analysis. The nature of the Company's contracts give rise to variable consideration, including, volume rebates, credits, discounts, and other similar items that generally decrease the transaction price. These variable amounts generally are credited to the customer, based on achieving certain levels of sales activity, when contracts are signed, or making payments within specific terms.

Product returns are not significant because the products are customized; however, the Company accrues for the estimated amount of customer allowances at the time of sale based on historical experience and known trends.

When the transaction price requires allocation to multiple performance obligations, the Company uses the estimated stand-alone selling prices using the adjusted market assessment approach.

Costs to Obtain Contracts

In accordance with ASC 606, the Company capitalizes certain sales incentives of the sales compensation packages for costs that are directly attributed to being awarded a customer contract or renewal and would not have been incurred had the contract not been obtained. The Company also defers certain contract acquisition costs paid to the customer at contract inception. Costs to obtain contracts with a duration of less than one year are expensed as incurred. For all contract costs with contracts over one year, the Company amortizes the costs to obtain contracts on a straight-line basis over the estimated life of the contract and reviews quarterly for impairment. Activity impacting costs to obtain contracts for the year ended December 31, 2019, was as follows:

	Costs to Obta Contracts	nin
Balance at January 1, 2019	\$	14.6
Costs to obtain contracts		5.0
Amortization of costs to obtain contracts		(6.9)
Balance at December 31, 2019	\$	12.7

Practical Expedients

The Company has elected to apply the following practical expedients allowed under ASC 606:

• For certain performance obligations related to print contracts, the Company has elected not to disclose the value of unsatisfied performance obligations for the following: (1) contracts that have an original expected length of one year or less; (2) contracts where revenue is recognized as invoiced; or (3) contracts with variable consideration related to unsatisfied performance obligations. The Company had approximately \$21.7 million in volume commitments in contracts that extend beyond one year as of December 31, 2019. The Company expects to recognize approximately 55% of these volume commitments in contracts as revenue by the end of 2020, and the remaining 45% by the end of 2021.

- The Company expenses costs to obtain contracts as incurred when the contract duration is less than one year.
- The transaction amount is not adjusted for a significant financing component as the period between transfer of the products or services and payment is less than one year.
- The Company accounts for shipping and handling activities, which includes postage, that occur after control of the related products or services transfers to the customer as fulfillment activities and are therefore recognized at time of shipping.
- The Company excludes from its transaction price any amounts collected from customers for sales taxes.

Note 3. Acquisitions and Strategic Investments

2019 Acquisition of Periscope

On January 3, 2019, the Company completed the acquisition of Periscope, a creative agency headquartered in Minneapolis, Minnesota, for \$121.0 million cash paid. Periscope provides a comprehensive service offering, including media buying and analytics, creative and account management. Periscope also has packaging design and premedia services that complement Quad's print-production capabilities. The purchase price of \$134.0 million includes \$9.8 million of acquired cash and non-cash equity incentive awards with a grant date fair value of \$3.2 million. Included in the purchase price allocation are \$69.8 million of identifiable other intangible assets, which are amortized over their estimated useful lives, ranging from five to six years, and \$58.5 million of goodwill, of which \$52.7 million is deductible for tax purposes. The final allocation of the purchase price was based on valuations performed to determine the fair value of the net assets as of the acquisition date. The net assets acquired, excluding acquired cash, were classified as Level 3 in the valuation hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 3 inputs). Periscope's operations are included in the United States Print and Related Services segment.

2018 Acquisition of Ivie

The Company completed the acquisition of Ivie on February 21, 2018, for \$90.0 million cash paid, which is subject to a potential earn-out of up to an additional \$16.0 million, to the extent that certain financial metrics are achieved post-integration. Ivie is headquartered in Flower Mound, Texas and provides a full array of marketing services, including creative and production services, studio services, sourcing, procurement, staff enhancement, media services, public relations, digital services, technology solutions and project management for many leading brands throughout the world. The purchase price of \$105.4 million includes \$13.6 million of acquired cash and an estimated \$15.4 million of future cash payments related to the acquisition. In April 2019, the first year earn-out payment of \$5.3 million was made. Included in the purchase price allocation are \$79.6 million of identifiable other intangible assets, which are amortized over their estimated useful lives, ranging from three to eight years, and \$28.3 million of goodwill, of which \$26.4 million is deductible for tax purposes. The final allocation of the purchase price was based on valuations performed to determine the fair value of the net assets as of the acquisition date. The net assets acquired, excluding acquired cash, were classified as Level 3 in the valuation hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 3 inputs). Ivie's operations are included in the United States Print and Related Services segment.

2018 Investment in Rise

On March 14, 2018, the Company increased its equity position in Rise from 19% to 57% for the conversion of \$9.3 million of loans to equity ownership and \$8.7 million cash paid. The Company had historically accounted for Rise as a cost method investment. Rise is a digital marketing agency headquartered in Chicago, Illinois, that specializes in digital media, analytics and customer experience, and helps enterprise marketers see, shape, and act on opportunities in digital media. The Company has consolidated the results of Rise as of the date the Company obtained controlling financial interest in Rise and accounts for the 43% portion of Rise's results not owned by the Company as noncontrolling interest in the consolidated financial statements. The fair value of the assets and liabilities of, and noncontrolling interest in Rise is estimated to be \$48.5 million, including \$13.7 million of acquired cash. Also included in the fair value allocation are \$23.1 million of identifiable other intangible assets, which are amortized over their estimated useful lives, ranging from five to six years, and \$26.3 million of goodwill, which is not deductible for tax purposes. The final allocation of the purchase price was based on valuations performed to determine the fair value of the net assets as of the acquisition date. The net assets acquired, excluding acquired cash, were classified as Level 3 in the valuation hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 3 inputs). Rise's operations are included in the United States Print and Related Services segment.

Note 4. Discontinued Operations

During the third quarter of 2019, the Company made a decision to sell its United States Book business as a part of an ongoing process to review its business portfolio and divest assets not core to the Company's transformation strategy. Accordingly, the Company has classified the Book business as a discontinued operation, as required by ASC 205-20 — *Discontinued Operations*. The Book business primarily consists of three facilities: Versailles, Kentucky; Fairfield, Pennsylvania; and Martinsburg, West Virginia. The Company's Book business has historically been included within the United States Print and Related Services segment and the Core Print and Related Services reporting unit.

The following table summarizes the results of operations of the Company's Book business, which are included in the loss from discontinued operations in the consolidated statements of operations for the years ended December 31, 2019, 2018 and 2017:

	For The Year Ended December 31,										
	201	9		2018		2017					
Total net sales	\$	213.8	\$	207.9	\$	180.2					
Total cost of sales, excluding depreciation and amortization		226.8		207.9		168.1					
Selling, general and administrative expenses		5.5		13.2		15.1					
Depreciation and amortization		13.6		15.8		14.0					
Restructuring, impairment and transaction-related charges ⁽¹⁾		92.1		0.3		0.5					
Goodwill impairment ⁽²⁾		10.1		_		—					
Other expenses, net		0.1		0.1		0.2					
Loss from discontinued operations before income taxes		(134.4)		(29.4)		(17.7)					
Income tax benefit		(33.8)		(7.4)		(6.8)					
Loss from discontinued operations, net of tax	\$	(100.6)	\$	(22.0)	\$	(10.9)					

⁽¹⁾ The Company recognized impairment charges during the year ended December 31, 2019, to reduce the carrying value of the Book business to its fair value, including \$86.5 million of impairment charges for tangible property, plant and equipment and \$5.6 million of impairment charges for contract assets.

⁽²⁾ The Book business was included in the Core Print and Related Services reporting unit. The amount of goodwill allocated to the Book business was determined based on the relative fair value of the Book business and the portion of the reporting unit that will

be retained. Due to the decision to sell the Book business, the Company must determine whether any of the assets of the Book business were impaired. Therefore, management performed an interim goodwill impairment test. Due to the carrying value of the Book business net assets exceeding the estimated fair value, the Company recorded a \$10.1 million goodwill impairment charge.

The consolidated statements of cash flows for all periods have not been adjusted to separately disclose cash flows related to discontinued operations. Cash flows used in operating activities related to the Book business were \$8.0 million, \$10.9 million and \$5.7 million during the years ended December 31, 2019, 2018 and 2017, respectively; and cash flows used in investing activities related to the Book business were \$17.2 million, \$14.5 million and \$11.5 million during the years ended December 31, 2017, respectively.

The following table summarizes the current and long-term assets and liabilities of the discontinued Book business that were classified as held for sale in the consolidated balance sheets at December 31, 2019, and 2018:

	December 31, 2019	December 31, 2018
Receivables—net	\$ 19.6	\$ 31.1
Inventories	14.0	21.6
Prepaid expenses and other current assets ⁽¹⁾	23.0	2.6
Current assets of discontinued operations	56.6	55.3

Other long-term liabilities	0.6	0.8
Long-term liabilities of discontinued operations	0.6	0.8

⁽¹⁾ Includes land and building assets that were reclassified to other current assets as of December 31, 2019.

Note 5. Restructuring, Impairment and Transaction-Related Charges

The Company recorded restructuring, impairment and transaction-related charges for the years ended December 31, 2019, 2018 and 2017, as follows:

	2019	2018	2017
Employee termination charges	\$ 22.2	\$ 23.0	\$ 26.4
Impairment charges.	7.9	26.2	12.0
Transaction-related charges.	51.6	8.2	3.1
Integration costs	3.3	1.3	_
Other restructuring charges	4.4	44.6	18.4
Total	89.4	\$ 103.3	\$ 59.9

The costs related to these activities have been recorded on the consolidated statements of operations as restructuring, impairment and transaction-related charges. See Note 21, "Segment Information," for restructuring, impairment and transaction-related charges by segment.

Restructuring Charges

The Company began a restructuring program in 2010 related to eliminating excess manufacturing capacity and properly aligning its cost structure. The Company has announced a total of 45 plant closures since 2010. The Company announced the closures of the facilities located in Midland, Michigan and Shakopee, Minnesota during the year ended December 31, 2019. The Company classifies the following charges as restructuring:

- *Employee termination charges* are incurred when the Company reduces its workforce through facility consolidations and separation programs.
- *Integration costs* are incurred primarily for the integration of acquired companies (see Note 3, "Acquisitions and Strategic Investments," for descriptions of the Company's recent acquisitions).
- Other restructuring charges are comprised of the following components and are presented net of the gains on the sale of facilities and businesses. During the year ended December 31, 2019, the Company recognized an \$8.4 million gain on the sale of a business, as well as gains from the sale of the facilities located in Franklin, Kentucky and Hazleton, Pennsylvania. During the year ended December 31, 2018, the Company recognized a \$32.1 million increase to the Company's MEPPs withdrawal liability and \$10.0 million in charges for certain legal matters and customer contract penalties related to the Company's operations in Peru, as well as gains from the sale of the facilities located in Taunton, Massachusetts (Book); Dallas, Texas; and San Ixhuatepec, Mexico. During the year ended December 31, 2017, the Company recognized a \$6.7 million loss on the sale of a business and a \$1.2 million gain from settlements with vendors through bankruptcy proceedings for the Company's Argentina Subsidiaries, as well as gains from the sale of the facilities located in Atglen, Pennsylvania; Dickson, Tennessee; Lenexa, Kansas; East Greenville, Pennsylvania; and Marengo, Iowa.

	Year Ended December 31,										
		2019		2018		2017					
Vacant facility carrying costs and lease exit charges	\$	9.5	\$	16.9	\$	18.1					
Equipment and infrastructure removal costs		0.4		1.4		1.9					
Gains on the sale of facilities		(6.1)		(17.3)		(7.1)					
Other restructuring activities		0.6		43.6		5.5					
Other restructuring charges	\$	4.4	\$	44.6	\$	18.4					

The restructuring charges recorded were based on plans that have been committed to by management and were, in part, based upon management's best estimates of future events. Changes to the estimates may require future restructuring charges and adjustments to the restructuring liabilities. The Company expects to incur additional restructuring charges related to these and other initiatives.

Impairment Charges

The Company recognized impairment charges of \$7.9 million during the year ended December 31, 2019, consisting of the following: (1) \$7.6 million of impairment charges primarily for machinery and equipment no longer being utilized in production as a result of facility consolidations, as well as other capacity and strategic reduction restructuring initiatives; and (2) \$0.3 million of land and building impairment charges. Additional impairment charges were recorded related to the Book business during the year ended December 31, 2019, which are disclosed in Note 4, "Discontinued Operations".

The Company recognized impairment charges of \$26.2 million during the year ended December 31, 2018, consisting of the following: (1) \$16.6 million of impairment charges primarily for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Hazleton, Pennsylvania; and Franklin, Kentucky; as well as other capacity and strategic reduction restructuring initiatives, including \$5.0 million of impairment charges for machinery and equipment in Peru; and (2) \$4.6 million of land and building impairment charges, primarily related to the Franklin, Kentucky plant closure.

The Company recognized impairment charges of \$12.0 million during the year ended December 31, 2017, consisting of the following: (1) \$6.7 million of impairment charges primarily for machinery and equipment no longer being utilized in production as a result of facility consolidations, including Waseca, Minnesota; Columbus, Ohio; and Taunton, Massachusetts, as well as other capacity and strategic reduction restructuring initiatives.; and (2) \$5.3 million of land and building impairment charges related to the Waseca, Minnesota and Taunton, Massachusetts (Book) plant closures.

The fair values of the impaired assets were determined by the Company to be Level 3 under the fair value hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 3 inputs) and were estimated based on broker quotes, internal expertise related to current marketplace conditions and estimated future discounted cash flows. These assets were adjusted to their estimated fair values at the time of impairment. If estimated fair values subsequently decline, the carrying values of the assets are adjusted accordingly.

Transaction-Related Charges

The Company incurs transaction-related charges primarily consisting of professional service fees related to business acquisition and divestiture activities. The Company recognized transaction-related charges of \$51.6 million, \$8.2 million and \$3.1 million during the years ended December 31, 2019, 2018 and 2017, respectively. Transaction-related charges included a \$45.0 million reverse termination fee paid during the year ended December 31, 2019, in

connection with the termination of the definitive agreement pursuant to which Quad would have acquired LSC; \$6.4 million related to the then proposed acquisition of LSC during the year ended December 31, 2018; and \$1.0 million related to the sale of a business during the year ended December 31, 2017. The transaction-related charges were expensed as incurred in accordance with the applicable accounting guidance on business combinations.

Restructuring Reserves

Activity impacting the Company's restructuring reserves for the years ended December 31, 2019 and 2018, was as follows:

	Employee Termination Charges	Impairment Charges		Fransaction- Related Charges (Income)		egration Costs	Rest	Other ructuring harges	1	Total
Balance at January 1, 2018	\$ 17.6	\$	\$	0.4	\$	0.2	\$	11.3	\$	29.5
Expense, net	23.0	26.2		8.2		1.3		44.6		103.3
Cash payments, net	(28.7)			(7.4)		(1.1)		(6.6)		(43.8)
Non-cash adjustments/ reclassifications	(2.6)	(26.2))	_		(0.2)		(32.2)		(61.2)
Balance at December 31, 2018	\$ 9.3	\$	\$	1.2	\$	0.2	\$	17.1	\$	27.8
Expense, net	22.2	7.9		51.6		3.3		4.4		89.4
Cash payments, net	(20.0)	—		(52.6)		(3.2)		(1.8)		(77.6)
Non-cash adjustments/ reclassifications	(1.6)	(7.9))	0.6	_	(0.1)		(6.1)		(15.1)
Balance at December 31, 2019	\$ 9.9	\$	\$	0.8	\$	0.2	\$	13.6	\$	24.5

The Company's restructuring reserves at December 31, 2019, included a short-term and a long-term component. The short-term portion included \$15.8 million in other current liabilities (see Note 10, "Other Current and Long-Term Liabilities") and \$1.3 million in accounts payable in the consolidated balance sheets as the Company expects these reserves to be paid within the next twelve months. The long-term portion of \$7.4 million was included in other long-term liabilities (see Note 10, "Other Current and Long-Term Liabilities (see Note 10, "Other Current and Long-Term Liabilities") in the consolidated balance sheets. Included in the above table is a \$2.0 million non-cash reclassification to transition lease liabilities previously accounted for under ASC 420 — *Exit or Disposal Cost Obligations,* to operating lease obligations, in accordance with the new guidance under ASC 842. See Note 13, "Leases," for additional accounting policy and transition disclosures.

Note 6. Goodwill and Other Intangible Assets

Goodwill

Goodwill represents the excess of the purchase price over the fair value of identifiable net assets acquired in a business combination. Goodwill is assigned to specific reporting units and is tested annually for impairment as of October 31, or more frequently if events or changes in circumstances indicate that it is more likely than not that the fair value of a reporting unit is below its carrying value. Due to the Company's decision to sell its Book business, an interim goodwill impairment test was required to be completed on the remaining goodwill in the Core Print and Related Services reporting unit during the third quarter of 2019.

Fair value was determined using an equal weighting of both the income and market approaches. Under the income approach, the Company determined fair value based on estimated future cash flows discounted by an estimated weighted-average cost of capital, which reflects the overall level of inherent risk and the rate of return an outside investor would expect to earn. Under the market approach, the Company derived the fair value of the reporting units based on market multiples of comparable publicly-traded companies. This fair value determination was categorized as Level 3 in the fair value hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 3 inputs).

Due to the carrying value of the Book business net assets exceeding the estimated fair value, the Company recorded a \$10.1 million goodwill impairment charge related to the Book business during the third quarter of 2019 (see Note 4, "Discontinued Operations").

In addition, the remaining goodwill that is not allocated to a business to be sold must be tested for impairment. No goodwill impairment was recorded on the remaining \$103.0 million related to the retained portion of the Core Print and Related Services reporting unit during the year ended December 31, 2019.

No goodwill impairment charges were recorded related to the Company's continuing operations during the years ended December 31, 2019, 2018 or 2017. The accumulated goodwill impairment losses and the carrying value of goodwill from continuing operations at December 31, 2019 and 2018, were as follows:

		De	cembe	r 31, 2019			December 31, 2018								
	-	nited States Print and Related Services	Inter	International Total				Inited States Print and Related Services	Int	ernational	Total				
Goodwill	\$	881.3	\$	30.0	\$	911.3	\$	822.8	\$	30.0	\$	852.8			
Accumulated goodwill impairment loss		(778.3)		(30.0)		(808.3)		(778.3)		(30.0)		(808.3)			
Goodwill, net of accumulated goodwill impairment loss	\$	103.0	\$		\$	103.0	\$	44.5	\$		\$	44.5			

Activity impacting goodwill for the years ended December 31, 2019 and 2018, was as follows:

	United States Print and Related Services	International	Total
Balance at January 1, 2018	\$	\$	\$
Acquisition of Ivie (see Note 3)	28.3		28.3
Investment in Rise (see Note 3)	26.3	—	26.3
Reclassification of Book business goodwill to discontinued operations (see Note 4)	(10.1)		(10.1)
Balance at December 31, 2018	44.5		44.5
Acquisition of Periscope (see Note 3)	58.5		58.5
Balance at December 31, 2019	\$ 103.0	\$	\$ 103.0

Other Intangible Assets

The components of other intangible assets at December 31, 2019 and 2018, were as follows:

	December 31, 2018											
	Average Gross Amortization Carrying Accumulated Net Book An		Weighted Average Amortization Period (Years)	Gross Carrying Amount			umulated ortization	Net Book Value				
Finite-lived intangible as	ssets:											
Trademarks, patents, licenses and agreements	6	\$	68.6	\$ (33.6)	\$ 35.0	7	\$	59.8	\$	(22.4)	\$	37.4
Capitalized software	5		16.1	(8.5)	7.6	5		15.3		(5.1)		10.2
Customer relationships.	6		562.1	 (467.5)	 94.6	6		514.7		(449.7)		65.0
Total finite-lived intangi	ble assets	\$	646.8	\$ (509.6)	\$ 137.2		\$	589.8	\$	(477.2)	\$	112.6

During the year ended December 31, 2019, the gross carrying amount of other intangible assets increased primarily due to \$69.8 million of acquired identifiable finite-lived intangible assets as discussed in Note 3, "Acquisitions and Strategic Investments." Other intangible assets are evaluated for potential impairment whenever events or circumstances indicate that the carrying value may not be recoverable. There were no impairment charges recorded on finite-lived intangible assets for the years ended December 31, 2019, 2018 and 2017.

Amortization expense for other intangible assets was \$44.8 million, \$34.4 million and \$18.3 million for the years ended December 31, 2019, 2018 and 2017, respectively. The following table outlines the estimated future amortization expense related to other intangible assets as of December 31, 2019:

	Amortization Expense				
2020	\$ 38.5				
2021	30.2				
2022	28.3				
2023	19.8				
2024	18.1				
2025 and thereafter	2.3				
Total	\$ 137.2				

Note 7. Receivables

Activity impacting the allowances for doubtful accounts for the years ended December 31, 2019, 2018 and 2017, was as follows:

	2019		2019		 2017
Balance at beginning of year	\$	27.4	\$	28.6	\$ 53.3
Provisions		5.6		3.1	2.6
Write-offs ⁽¹⁾		(7.8)		(4.7)	(26.3)
Translation and other		(0.2)		0.4	 (1.0)
Balance at end of year	\$	25.0	\$	27.4	\$ 28.6

⁽¹⁾ Write-offs primarily consisted of fully reserved receivables for the years ended December 31, 2019, 2018 and 2017.

Note 8. Inventories

The components of inventories at December 31, 2019 and 2018, were as follows:

	2019	2018		
Raw materials and manufacturing supplies	\$ 112.2	\$	158.3	
Work in process	41.2		45.0	
Finished goods	57.1		75.7	
Total	\$ 210.5	\$	279.0	

Note 9. Property, Plant and Equipment

The components of property, plant and equipment at December 31, 2019 and 2018, were as follows:

	2019	2018
Land	\$ 102.5	\$ 106.9
Buildings	846.1	874.1
Machinery and equipment	3,337.1	3,411.3
Other ⁽¹⁾	175.7	176.4
Construction in progress	35.0	32.7
Property, plant and equipment—gross	4,496.4	 4,601.4
Less: accumulated depreciation.	 (3,459.9)	 (3,447.6)
Property, plant and equipment—net	\$ 1,036.5	\$ 1,153.8

⁽¹⁾ Other consists of computer equipment, vehicles, furniture and fixtures, leasehold improvements and communication related equipment.

The Company recorded impairment charges of \$7.9 million, \$26.2 million and \$12.0 million during the years ended December 31, 2019, 2018 and 2017, respectively, to reduce the carrying amounts of certain property, plant and equipment no longer utilized in production, or due to other capacity and strategic reduction restructuring initiatives, to fair value (see Note 5, "Restructuring, Impairment and Transaction-Related Charges," for further discussion on impairment charges).

The Company recognized depreciation expense for continuing operations of \$164.7 million, \$180.5 million and \$200.2 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Assets Held for Sale from Continuing Operations

The Company considered certain closed facilities and the Omaha packaging plant for held for sale classification in the consolidated balance sheets. Assets held for sale are carried at the lesser of original cost or fair value, less the estimated costs to sell. Assets held for sale from continuing operations were \$59.3 million as of December 31, 2019, and there were no assets held for sale from continuing operations as of December 31, 2018. These assets were carried at the lesser of original cost or fair value, less the estimated costs to sell. The fair values were determined by the Company to be Level 3 under the fair value hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 3 inputs) and were estimated based on quoted market prices where available and independent appraisals, as appropriate. Assets held for sale were included in prepaid expenses and other current assets in the consolidated balance sheets.

Note 10. Other Current and Long-Term Liabilities

The components of other current and long-term liabilities at December 31, 2019 and 2018, were as follows:

	Ι	December 31, 201	9	I	8	
	Other Current Liabilities	Other Long-Term Liabilities	Total	Other Current Liabilities	Other Long-Term Liabilities	Total
Employee-related liabilities ⁽¹⁾	\$ 129.4	\$ 61.9	\$ 191.3	\$ 122.4	\$ 62.8	\$ 185.2
Single employer pension plan obligations	1.8	77.1	78.9	1.7	80.9	82.6
Multiemployer pension plans – withdrawal liability	8.4	35.7	44.1	8.4	42.5	50.9
Tax-related liabilities	24.6	10.7	35.3	29.5	8.1	37.6
Restructuring liabilities	15.8	7.4	23.2	23.1	2.9	26.0
Interest and rent liabilities .	4.9	0.2	5.1	6.0	1.4	7.4
Liabilities held for sale from continuing operations ⁽²⁾	17.9	_	17.9	_	_	_
Other	100.2	28.1	128.3	94.0	33.2	127.2
Total	\$ 303.0	\$ 221.1	\$ 524.1	\$ 285.1	\$ 231.8	\$ 516.9

⁽¹⁾ Employee-related liabilities consist primarily of payroll, bonus, vacation, health and workers' compensation.

⁽²⁾ The Omaha packaging plant was considered held for sale in the consolidated balance sheets.

Note 11. Commitments and Contingencies

Commitments

The Company had firm commitments of \$26.6 million as of December 31, 2019, to purchase press and finishing equipment.

Litigation

The Company is named as a defendant in various lawsuits in which claims are asserted against the Company in the normal course of business. The liabilities, if any, which ultimately result from such lawsuits are not expected by management to have a material impact on the consolidated financial statements of the Company.

Beginning in April 2016, the Company self-reported to the SEC and to the United States Department of Justice ("DOJ") certain Foreign Corrupt Practices Act ("FCPA") issues arising from its operations managed from Peru, and from Quad/Tech China. Also, during the course of its internal investigation of these matters, the Company identified and informed the Office of Foreign Assets Control ("OFAC"), the DOJ and the SEC of certain transactions involving Cuba arising from the Company's operations managed from Peru. During the third quarter of 2019, the Company and the SEC entered into a resolution of these matters and the Company paid \$9.9 million to the SEC in October 2019. The DOJ declined to bring any action against the Company, citing the Company's voluntary and prompt self-reporting, cooperation and full remediation.

During the third and fourth quarters of 2019, the Company and the Peruvian antitrust authority, INDECOPI, negotiated agreements regarding INDECOPI's investigation into certain competition law issues with regard to private and public sector clients, and the Company agreed to pay a total of \$6.9 million during the next four years, beginning in January 2020.

Environmental Reserves

The Company is subject to various laws, regulations and government policies relating to health and safety, to the generation, storage, transportation, and disposal of hazardous substances, and to environment protection in general. The Company provides for expenses associated with environmental remediation obligations when such amounts are probable and can be reasonably estimated. Such reserves are adjusted as new information develops or as circumstances change. The environmental reserves are not discounted. The Company believes it is in compliance with such laws, regulations and government policies in all material respects. Furthermore, the Company does not anticipate that maintaining compliance with such environmental statutes will have a material impact upon the Company's consolidated financial position.

Note 12. Debt

The components of long-term debt at December 31, 2019 and 2018, were as follows:

	Weighted Average Interest Rate	2019	2018
Master note and security agreement	7.24%	\$ 70.7	\$ 96.2
Term loan A	4.52%	768.3	281.3
Term loan B	7.33%	_	279.5
Revolving credit facility	4.85%	_	_
Senior unsecured notes	7.00%	243.5	243.5
International term loans	1.87%	16.5	17.8
International revolving credit facilities	1.90%	5.7	11.8
Other	11.52%	3.1	2.6
Debt issuance costs		(9.3)	(7.2)
Total debt		\$ 1,098.5	\$ 925.5
Less: short-term debt and current portion of long-term debt		(40.0)	(42.9)
Long-term debt		\$ 1,058.5	\$ 882.6

Description of Debt Obligations

Master Note and Security Agreement

On September 1, 1995, and as last amended on November 24, 2014, Quad entered into its Master Note and Security Agreement. As of December 31, 2019, the borrowings outstanding under the Master Note and Security Agreement were \$70.7 million. The senior notes under the Master Note and Security Agreement had a weighted average interest rate of 7.24% at December 31, 2019, which is fixed to maturity, with interest payable semiannually. Principal payments commenced September 1997 and extend through April 2031 in various tranches. The notes are collateralized by certain United States land, buildings and press and finishing equipment under the terms of the Master Note and Security Agreement.

Senior Secured Credit Facility

On April 28, 2014, the Company entered into its Senior Secured Credit Facility, which included a revolving credit facility, Term Loan A and Term Loan B. The Company completed the third amendment to the Senior Secured Credit Facility on January 31, 2019. This third amendment was completed to provide Quad with the liquidity and structural flexibility to consummate the proposed, but now terminated, acquisition of LSC and to extend existing maturities by (a) increasing the aggregate amount of the existing revolving credit facility from \$725.0 million to \$800.0 million with a term of five years, maturing on January 31, 2024; (b) increasing the aggregate amount of the existing Term Loan A from \$375.0 million to \$825.0 million with a delayed draw feature and term of five years, maturing on January 31, 2024; and (c) increasing the aggregate amount of the existing Term Loan B from \$300.0 million to \$500.0 million with a term of seven years, maturing on January 31, 2026. The Company intended that the loans available under the amended revolving credit facility would be used to repay, refinance, repurchase, redeem, exchange or otherwise terminate LSC's existing indebtedness in connection with the consummation of tLSC, Quad fully funded the \$825.0 million delayed draw Term Loan A to retire the entire amount outstanding on the \$500.0 million Term Loan B and reduced the borrowings under the revolving credit facility. The third amendment also amended certain of the

quarterly financial covenants to which the Company is subject (all financial terms, numbers and ratios are as defined in the Senior Secured Credit Facility, as amended by the third amendment).

At December 31, 2019, the Company had no outstanding borrowings on the revolving credit facility, and had \$35.8 million of issued letters of credit, leaving \$764.2 million available for future borrowings. Borrowings under the revolving credit facility and delayed draw Term Loan A made under the Senior Secured Credit Facility at December 31, 2019, bear interest at 2.50% in excess of reserve adjusted LIBOR, or 1.50% in excess of an alternate base rate. The Senior Secured Credit Facility is secured by substantially all of the unencumbered assets of the Company. The Senior Secured Credit Facility also requires the Company to provide additional collateral to the lenders in certain limited circumstances.

Senior Unsecured Notes

The Company issued \$300.0 million aggregate principal amount of its Senior Unsecured Notes due May 1, 2022, on April 28, 2014. The Senior Unsecured Notes bear interest at 7.00%, and interest is payable semi-annually. The Senior Unsecured Notes were issued to extend and stagger the Company's debt maturity profile, further diversify its capital structure and provide more borrowing capacity to better position the Company to execute on its strategic goals. The Company received \$294.8 million in net proceeds from the sale of the Senior Unsecured Notes, after deducting the initial purchasers' discounts and commissions. The proceeds from the Senior Unsecured Notes were used for the same purposes detailed above for the Senior Secured Credit Facility.

Each of the Company's existing and future domestic subsidiaries that is a borrower or guarantees indebtedness under the Company's Senior Secured Credit Facility or that guarantees certain of the Company's other indebtedness or indebtedness of the Company's restricted subsidiaries (other than intercompany indebtedness) fully and unconditionally guarantee or, in the case of future subsidiaries, will guarantee, on a joint and several basis, the Senior Unsecured Notes (the "Guarantor Subsidiaries"). All of the Guarantor Subsidiaries are 100% owned by the Company. Guarantor Subsidiaries will be automatically released from these guarantees upon the occurrence of certain events. See Note 23, "Separate Financial Information of Subsidiary Guarantors of Indebtedness," for further details on the Guarantor Subsidiaries.

International Debt Obligations

The Company has two fixed rate, Euro denominated, international term loans for purposes of financing certain capital expenditures and general business needs. The first international term loan in the amount of \$19.9 million was entered into on December 28, 2015, was fully funded during 2016 and has a term of six years, maturing December 28, 2021. As of December 31, 2019, \$6.0 million remained outstanding on the first international term loan at a weighted average interest rate of 1.72%. The second international term loan in the amount of \$11.8 million was entered into on December 21, 2018, bears interest at 1.96% and has a term of five years, maturing on December 31, 2023. As of December 31, 2019, \$10.5 million remained outstanding on the second international term loan.

The Company has two multicurrency international revolving credit facilities that are used for financing working capital and general business needs. The Company had \$5.7 million of borrowings outstanding at a weighted average interest rate of 1.90% on the international revolving credit facilities as of December 31, 2019, leaving \$10.1 million available for future borrowing. The terms of the international revolving credit facilities includes certain financial covenants, a guarantee of the international revolving credit facilities by the Company and a security agreement that includes collateralizing substantially all of the Quad Europe Sp. z.o.o. assets. The first multicurrency international revolving credit facility expires on October 31, 2020, and bears interest at the aggregate of the Warsaw Interbank Offered Rate ("WIBOR") plus 0.90% for any Polish Zloty denominated borrowings or the aggregate of British pound sterling LIBOR plus 0.95% for any British pound sterling denominate borrowings. The second multicurrency international revolving credit facility expires on November 20, 2020, and bears interest at the aggregate of WIBOR plus 0.70% for any Polish Zloty denominated borrowings. The second multicurrency international revolving credit facility expires on November 20, 2020, and bears interest at the aggregate of WIBOR plus 0.70% for any Polish Zloty denominated borrowings.

Fair Value of Debt

Based upon the interest rates available to the Company for borrowings with similar terms and maturities, the fair value of the Company's total debt was approximately \$1.1 billion and \$0.9 billion at December 31, 2019 and 2018, respectively. The fair value determination of the Company's total debt was categorized as Level 2 in the fair value hierarchy (see Note 15, "Financial Instruments and Fair Value Measurements," for the definition of Level 2 inputs). As of December 31, 2019, approximately \$2.0 billion of the Company's assets were pledged as security under various loans and other agreements.

Debt Issuance Costs and Original Issue Discount

Activity impacting the Company's capitalized debt issuance costs and original issue discount for the years ended December 31, 2019 and 2018, was as follows:

	italized Debt uance Costs	Original I	ssue Discount
Balance at January 1, 2018	\$ 10.3	\$	1.4
Amortization expense	(3.1)		(0.4)
Balance at December 31, 2018	 7.2		1.0
Impacts from January 31, 2019 debt financing arrangement	6.0		15.0
Loss on debt extinguishment from February 10, 2017 debt financing arrangement.	(0.7)		(1.0)
Loss on debt extinguishment from July 26, 2019 delayed draw Term Loan A funding and retirement of Term Loan B	(0.5)		(14.1)
Amortization expense	(2.7)		(0.9)
Balance at December 31, 2019	\$ 9.3	\$	

Amortization expense for debt issuance costs was \$2.7 million, \$3.1 million and \$3.1 million for the years ended December 31, 2019, 2018 and 2017, respectively. Amortization expense for original issue discount was \$0.9 million, \$0.4 million and \$0.4 million for the years ended December 31, 2019, 2018 and 2017, respectively. The debt issuance costs and original issue discount are amortized on a straight-line basis over the four, seven and eight year lives of the related debt instruments.

Loss on Debt Extinguishment

2019 Loss on Debt Extinguishment

In conjunction with the third amendment to the Company's Senior Secured Credit Facility completed on January 31, 2019, the Company incurred \$20.2 million in debt issuance costs. In accordance with the accounting guidance for the treatment of debt issuance costs in a debt extinguishment, of the \$20.2 million in new debt issuance costs, \$6.0 million was classified as a reduction of long-term debt in the consolidated balance sheets and \$14.2 million was expensed and was classified as loss on debt extinguishment in the consolidated statements of operations at the time of the refinancing.

The loss on debt extinguishment recorded during the year ended December 31, 2019, was comprised of the following:

	Loss on Debt Extinguishment
Debt issuance costs:	
Debt issuance costs from February 10, 2017 debt financing arrangement	\$ 0.7
Debt issuance costs from January 31, 2019 debt financing arrangement	14.2
Debt issuance costs from July 26, 2019 delayed draw Term Loan A funding and retirement of Term Loan B	0.5
Original issue discount:	
Original issue discount from February 10, 2017 debt financing arrangement	1.0
Original issue discount from July 26, 2019 delayed draw Term Loan A funding and retirement of Term Loan B	14.1
Total	\$ 30.5

2017 Loss on Debt Extinguishment

The Company incurred \$4.7 million in debt issuance costs in conjunction with the second amendment to the Company's Senior Secured Credit Facility. In accordance with the accounting guidance for the treatment of debt issuance costs in a debt extinguishment, of the \$4.7 million in new debt issuance costs, \$3.2 million is classified as a reduction of long-term debt in the consolidated balance sheets and \$1.5 million was expensed and is classified as loss on debt extinguishment in the consolidated statements of operations.

The loss on debt extinguishment recorded in the consolidated statements of operations for the year ended December 31, 2017, was comprised of the following:

	Loss on Debt Extinguishment
Debt issuance costs from April 28, 2014 debt financing arrangement	\$ 1.1
Debt issuance costs from February 10, 2017 debt financing arrangement	1.5
Total	\$ 2.6

Covenants and Compliance

The Company's various lending arrangements include certain financial covenants (all financial terms, numbers and ratios are as defined in the Company's debt agreements). Among these covenants, the Company was required to maintain the following as of December 31, 2019:

- *Total Leverage Ratio.* On a rolling twelve-month basis, the Total Leverage Ratio, defined as consolidated total indebtedness to consolidated EBITDA, shall not exceed 3.75 to 1.00 (for the twelve months ended December 31, 2019, the Company's Total Leverage Ratio was 3.22 to 1.00).
- If there is any amount outstanding on the Revolving Credit Facility or Term Loan A, or if any lender has any revolving credit exposure or Term Loan A credit exposure, the Company is required to maintain the following:
 - Senior Secured Leverage Ratio. On a rolling twelve-month basis, the Senior Secured Leverage Ratio, defined as consolidated senior secured net indebtedness to consolidated EBITDA, shall not exceed 3.50 to 1.00 (for the twelve months ended December 31, 2019, the Company's Senior Secured Leverage Ratio was 2.30 to 1.00).
 - *Interest Coverage Ratio.* On a rolling twelve-month basis, the Interest Coverage Ratio, defined as consolidated EBITDA to cash consolidated interest expense, shall not be less than 3.00 to 1.00 (for the twelve months ended December 31, 2019, the Company's Interest Coverage Ratio was 4.52 to 1.00).

The indenture underlying the Senior Unsecured Notes contains various covenants, including, but not limited to, covenants that, subject to certain exceptions, limit the Company's and its restricted subsidiaries' ability to incur and/or guarantee additional debt; pay dividends, repurchase stock or make certain other restricted payments; enter into agreements limiting dividends and certain other restricted payments; prepay, redeem or repurchase subordinated debt; grant liens on assets; enter into sale and leaseback transactions; merge, consolidate, transfer or dispose of substantially all of the Company's consolidated assets; sell, transfer or otherwise dispose of property and assets; and engage in transactions with affiliates.

In addition to those covenants, the Senior Secured Credit Facility also includes certain limitations on acquisitions, indebtedness, liens, dividends and repurchases of capital stock. The following limitations utilize a Total Net Leverage Ratio calculation, which, on a rolling twelve-month basis, is defined as consolidated net indebtedness to consolidated EBITDA (for the twelve months ended December 31, 2019, the Company's Total Net Leverage Ratio was 3.01 to 1.00).

• If the Company's Total Net Leverage Ratio is greater than 2.75 to 1.00, the Company is prohibited from making greater than \$120.0 million of annual dividend payments, capital stock repurchases and certain other payments. If the Total Net Leverage Ratio is less than 2.75 to 1.00, there are no such restrictions. As the Company's Total Net Leverage Ratio as of December 31, 2019, was 3.01 to 1.00, the limitations described above are currently applicable.

If the Company's Senior Secured Leverage Ratio is greater than 3.00 to 1.00 or the Company's Total Net Leverage Ratio is greater than 3.50 to 1.00, the Company is prohibited from voluntarily prepaying any of the Senior Unsecured Notes and from voluntarily prepaying any other unsecured or subordinated indebtedness, with certain exceptions (including any mandatory prepayments on the Senior Unsecured Notes or any other unsecured or subordinated debt). If the Senior Secured Leverage Ratio is less than 3.00 to 1.00 and the Total Net Leverage Ratio is less than 3.50 to 1.00, there are no such restrictions. The limitations described above are currently not applicable, as the Company's Senior Secured Leverage Ratio was 2.30 to 1.00 and Total Net Leverage Ratio was 3.01 to 1.00, as of December 31, 2019.

Estimated Principal Payments

The approximate annual principal amounts due on long-term debt, excluding \$9.3 million for future amortization of debt issuance costs, at December 31, 2019, were as follows:

	Principal Payments
2020	\$ 40.0
2021	89.5
2022	334.9
2023	90.2
2024	540.4
2025 – 2029	10.8
2030 - 2032	2.0
Total	\$ 1,107.8

Note 13. Leases

The Company determines if an arrangement is or contains a lease at contract inception. The Company recognizes a right-of-use ("ROU") asset and a lease liability at the lease commencement date.

For operating and finance leases, the lease liability is initially measured at the present value of the unpaid lease payments at the lease commencement date, and is subsequently measured at amortized cost using the effective interest method.

Key estimates and judgments include how the Company determines the discount rate, lease term and lease payments.

- ASC 842 requires a lessee to discount its unpaid lease payments using the interest rate implicit in the lease or, if that rate cannot be readily determined, its incremental borrowing rate. Generally, the Company cannot determine the implicit interest rate as it does not have access to the lessor's estimated residual value or the amount of the lessor's deferred initial direct costs. Therefore, the Company generally uses its incremental borrowing rate as the discount rate for the lease. The Company's incremental borrowing rate for a lease is the rate of interest it would have to pay on a collateralized basis to borrow an amount equal to the lease payments under similar terms based on the published United States Treasury rates as well as the Company's credit rating at implementation or at the lease inception date.
- The lease term for all of the Company's leases includes the non-cancelable period of the lease, plus or minus any additional periods covered by an option to extend or terminate the lease that the Company is reasonably certain to exercise.

• Lease payments included in the lease liability are comprised of fixed payments as well as any exercise price of a Company option to purchase the underlying asset if the Company is reasonably certain to exercise. The Company's leases do not contain variable lease payments.

ROU assets are initially measured at cost, which comprises the initial amount of the lease liability adjusted for lease payments made at or before the lease commencement date, plus any initial direct costs incurred less any lease incentives received. For operating leases, the ROU asset is subsequently amortized by the straight-line lease expense adjusted by the lease liability accretion over the lease term.

For finance leases, the ROU asset is subsequently amortized on a straight-line basis from the lease commencement date to the earlier of the end of its useful life or the end of the lease term. Amortization of the ROU asset is recognized and presented separately from interest expense on the lease liability.

The Company's ROU assets for both operating and finance leases are reviewed for impairment losses on a quarterly basis in line with ASC 360-10 — *Property, Plant, and Equipment* — *Overall.* The Company has not recognized any impairment losses to date from continuing operations.

The Company also monitors its leases for events or changes in circumstances that require a reassessment of the lease. When a reassessment results in the remeasurement of a lease liability, a corresponding adjustment is made to the carrying amount of the ROU asset.

Operating leases are included in operating lease right-of-use assets—net, current portion of operating lease obligations, and operating lease obligations in the consolidated balance sheets. Finance leases are included in property and equipment—net, current portion of finance lease obligations, and finance lease obligations in the consolidated balance sheets.

The Company has elected not to recognize ROU assets and lease liabilities for short-term leases that have an original lease term of twelve months or less. Therefore, the Company recognizes the lease payments associated with these short-term leases as an expense over the lease term in the consolidated statement of operations.

Adoption of ASU 2016-02 — Transition Approach

The Company adopted ASU 2016-02 as of January 1, 2019 using the additional optional transition method pursuant to Accounting Standards Update 2018-11 "Leases (Topic 842): Targeted Improvements", meaning that restatement of prior period consolidated financial statements or presentation of comparative disclosures is not necessary. During adoption, the Company elected the following practical expedients allowed:

- The Company elected the practical expedient package and therefore did not reassess for any existing leases:
 - whether contracts are or contain leases;
 - the lease classification for any existing leases; and
 - any initial direct costs.
- The Company elected the practical expedient related to land easements, allowing to carry forward the accounting treatment for land easements on existing agreements.
- The Company used "hindsight" judgments that impact the lease term.
- The Company elected to combine lease and non-lease components into one lease component for select underlying lease asset categories. Real estate leases are accounted for separately while all other leases,

primarily equipment leases, with separate lease and non-lease components are accounted for as a single lease component.

Adoption of the new standard resulted in the recording of operating lease right-of-use assets and operating lease obligations of \$130.8 million and \$132.4 million respectively, as of January 1, 2019. The transition adjustment included right-of-use assets and operating lease obligations attributable to the Book business of \$0.6 million and \$0.6 million, respectively. The transition had no impact to the consolidated statement of operations.

Leases Financial Information

The Company enters into various lease agreements for real estate, such as office space and manufacturing facilities, as well as equipment leases, including press, finishing and transportation equipment. Many of these leases provide the Company with options to renew, terminate, or in the case of equipment leases, purchase the related equipment at the termination value, as defined, and at various early buyout dates during the term of the lease. In general, the Company has determined these options were not reasonably certain to be exercised, and therefore are not included in the determination of the lease term.

The following summarizes certain lease information for the year ended December 31, 2019:

	Year Ended December 31, 2019
Lease cost	
Finance lease cost:	
Amortization of right-of-use assets	\$ 5.8
Interest on lease liabilities	1.0
Operating lease cost	42.6
Short-term lease cost.	0.5
Sublease income	(3.1)
Total lease cost	\$ 46.8
<i>Other information</i> Cash paid for amounts included in the measurement of lease liabilities	
Operating cash flows from finance leases	\$
Operating cash flows from operating leases	43.0
Financing cash flows from finance leases	8.7
Right-of-use assets obtained in exchange for new finance lease liabilities	7.7
Right-of-use assets obtained in exchange for new operating lease liabilities.	18.7
Weighted-average remaining lease term — finance leases	2.0 years
Weighted-average remaining lease term — operating leases	5.1 years
Weighted-average discount rate — finance leases	6.5%
Weighted-average discount rate — operating leases	6.7%

Rent expense under the Company's operating lease agreements prior to the adoption of ASU 2016-02 totaled \$37.8 million and \$36.8 million during the years ended December 31, 2018 and 2017, respectively.

The components of finance lease assets at December 31, 2019 and 2018, were as follows:

	2019	2018
Leased equipment—gross	\$ 30.2	\$ 29.3
Less: accumulated depreciation	 (17.8)	 (14.9)
Leased equipment—net	\$ 12.4	\$ 14.4

Future maturities of lease liabilities at December 31, 2019, were as follows:

	Future Maturities of Operating Leases	Future Maturities of Finance Leases			
2020	\$ 36.6	\$ 8.2			
2021	25.2	4.1			
2022	18.4	1.8			
2023	14.5	0.2			
2024	8.6	_			
2025 and thereafter	12.9	_			
Total minimum payments	116.2	14.3			
Less: present value discount	(15.6)	(0.6)			
Present value of minimum payments	100.6	13.7			
Less: current portion	(30.2)	(7.7)			
Long-term lease liability	\$ 70.4	\$ 6.0			

Note 14. Income Taxes

Income taxes from continuing operations have been based on the following components of earnings (loss) from continuing operations before income taxes and equity in (earnings) loss of unconsolidated entity for the years ended December 31, 2019, 2018 and 2017:

	2	2019	2018	2017
United States	\$	(94.1)	\$ 23.6	\$ 83.3
Foreign		14.3	 2.9	 25.6
Total	\$	(79.8)	\$ 26.5	\$ 108.9

The components of income tax benefit from continuing operations for the years ended December 31, 2019, 2018 and 2017, were as follows:

	2019	2018	2017
Federal:			
Current	\$ (2.2)	\$ 4.7	\$ —
Deferred	(21.0)	(1.1)	2.1
State:			
Current	0.9	(2.1)	2.6
Deferred	(4.9)	1.7	0.2
Foreign:			
Current	0.1	2.0	2.4
Deferred	2.7	(7.6)	(16.5)
Total income tax benefit	\$ (24.4)	\$ (2.4)	\$ (9.2)

The following table outlines the reconciliation of differences between the Federal statutory tax rate and the Company's income tax benefit from continuing operations for the years ended December 31, 2019, 2018 and 2017:

	2019	2018	2017
Federal statutory rate	\$ (16.8)	\$ 5.6	\$ 38.1
State taxes, net of federal benefit	(4.1)	(0.8)	2.6
Adjustment of uncertain tax positions	(2.5)	(3.7)	(2.6)
Adjustment of deferred tax liabilities	(1.6)	1.4	(1.7)
Adjustment to valuation allowances	(0.2)	(6.9)	(20.0)
Impact from foreign branches	2.6	2.6	7.1
Foreign rate differential	—	(0.8)	(2.9)
Federal rate change	—	(0.8)	(28.8)
Domestic production activity deduction	—	—	(0.9)
Other	(1.8)	1.0	(0.1)
Income tax benefit	\$ (24.4)	\$ (2.4)	\$ (9.2)

The \$6.9 million adjustment to valuation allowance in 2018 primarily relates to net operating losses and deferred tax assets related to property, plant and equipment expected to be realized in the future by one of the Company's Mexican subsidiaries based on current and projected future profitability. The \$20.0 million adjustment to valuation allowance in 2017 primarily relates to an income tax credit utilized by the Company's Polish subsidiaries due to sustainable profitability. The Company determined the utilization of the credit is sufficient to record a reduction in the valuation allowance in order to reflect the current net realizable value of related deferred tax assets based on estimated credit utilization through 2026, the year the credit expires.

Deferred Income Taxes

The significant deferred tax assets and liabilities as of December 31, 2019 and 2018, were as follows:

	2019	2018
Deferred tax assets:		
Net operating loss and other tax carryforwards \$	125.1	\$ 125.1
Interest limitation	73.7	47.1
Pension and workers compensation benefits	43.1	46.0
Accrued compensation	16.1	16.6
Accrued liabilities	11.1	14.1
Goodwill and intangible assets	17.4	11.4
Allowance for doubtful accounts	5.5	6.4
Other	8.0	7.3
Total deferred tax assets	300.0	274.0
Valuation allowance.	(107.1)	 (115.2)
Net deferred tax assets	192.9	\$ 158.8
Deferred tax liabilities:		
Property, plant and equipment \$	(130.6)	\$ (153.8)
Other	(3.9)	(9.7)
Total deferred tax liabilities	(134.5)	 (163.5)
Net deferred tax assets (liabilities)	58.4	\$ (4.7)

The Company has recorded deferred income tax liabilities of \$2.8 million and \$32.1 million as of December 31, 2019 and 2018, respectively, which were included in deferred income taxes in the consolidated balance sheets. The Company has also recorded deferred income tax assets of \$61.2 million and \$27.4 million as of December 31, 2019 and 2018, respectively, which were included in other long-term assets in the consolidated balance sheets.

At December 31, 2019, the Company had the following gross amounts of tax-related carryforwards:

- Net operating loss carryforwards of \$32.8 million, \$81.1 million and \$522.3 million for federal, foreign and state, respectively. The federal net operating loss carryforward was generated in 2019 and is available without expiration. Of the foreign net operating loss carryforwards, \$29.1 million is available without expiration, while the remainder expires through 2039. The state net operating loss carryforwards expire in varying amounts through 2039.
- Capital loss carryforwards of \$18.3 million and \$9.0 million for federal and state, respectively. Of the federal capital loss carryforwards, \$1.1 million expires in 2021 and \$17.2 million expires in 2022; and of the state capital loss carryforwards, \$0.5 million expires in 2021 and \$8.5 million expires in 2022.

• Various credit carryforwards of \$2.1 million, \$28.4 million and \$43.9 million for federal, foreign and state, respectively. The federal carryforward expires in 2039, the foreign credit carryforward expires in 2026, and the state credit carryforwards include \$32.1 million that is available without expiration, while the remainder expires through 2034.

As of December 31, 2019, the Company has recorded a valuation allowance of \$107.1 million on its consolidated balance sheet primarily related to the tax-affected amounts of the above carryforwards. The valuation allowance includes \$4.5 million, \$47.0 million and \$55.6 million of federal, foreign and state deferred tax assets, respectively, that are not expected to be realized.

Uncertain Tax Positions

The following table summarizes the activity of the Company's liability for unrecognized tax benefits at December 31, 2019, 2018 and 2017:

	2019		2018	2017
Balance at beginning of period	\$ 14.	4 \$	21.6	\$ 29.6
Additions for tax positions of the current year	-	-	—	2.3
Additions for tax positions of prior years	7.	3	0.5	1.3
Reductions for tax positions of prior years	_	-	(0.8)	(11.3)
Lapses of applicable statutes of limitations	(4	3)	(6.1)	(0.3)
Settlements during the period	(0.	l)	(0.8)	—
Balance at end of period	\$ 17.	3 \$	14.4	\$ 21.6

As of December 31, 2019, \$10.5 million of unrecognized tax benefits would impact the Company's effective tax rate, if recognized. Of that amount, it is reasonably possible that \$1.6 million of the total amount of unrecognized tax benefits will decrease within the next twelve months due to resolution of income tax audits or statute expirations.

The Company classified interest expense (income) and any related penalties (refunds) related to income tax uncertainties as a component of income tax expense (benefit). The following table summarizes the Company's interest expense (income) related to tax uncertainties and penalties recognized during the years ended December 31, 2019, 2018 and 2017:

	 2019	 2018	 2017
Interest expense (income)	\$ 0.5	\$ (2.8)	\$ (2.5)
Penalties (refunds).	_	(0.4)	0.1

Accrued interest and penalties related to income tax uncertainties are reported as components of other current liabilities and other long-term liabilities in the consolidated balance sheets. The following table summarizes the Company's liabilities for accrued interest and penalties related to income tax uncertainties at December 31, 2019 and 2018:

	December 31, 2019				December 31, 2018			
	Accrued Accrued interest penalties			Accrued interest		Accrued penalties		
Other current liabilities	\$	0.5	\$	0.1	\$	0.2	\$	0.1
Other long-term liabilities		0.5		_		0.3		—
Total liabilities	\$	1.0	\$	0.1	\$	0.5	\$	0.1

The Company has tax years from 2016 through 2019 that remain open and subject to examination by the Internal Revenue Service. Tax years from 2015 through 2019 remain open and subject to examination in the Company's various major state jurisdictions within the United States.

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Act. The Tax Act makes broad and complex changes to the U.S. tax code, including, but not limited to, (1) reducing the U.S. federal corporate tax rate from 35 percent to 21 percent; (2) requiring companies to pay a one-time transition tax on certain unrepatriated earnings of foreign subsidiaries; (3) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries; (4) requiring a current inclusion in U.S. federal taxable income of certain earnings of controlled foreign corporations; (5) creating a new limitation on deductible interest expense; (6) creating the base erosion anti-abuse tax, a new minimum tax; (7) the repeal of the domestic production activity deduction; and (8) bonus depreciation that will allow for full expensing of qualified property.

The SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118"), which provides guidance on accounting for the tax effects of the Tax Act. SAB 118 provides a measurement period that should not extend beyond one year from the Tax Act enactment date for companies to complete the accounting under ASC 740. In accordance with SAB 118, a company must reflect the income tax effects of those aspects of the Tax Act for which the accounting under ASC 740 is complete. To the extent that a company's accounting for certain income tax effects of the Tax Act is incomplete, but it is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax laws that were in effect immediately before the enactment of the Tax Act.

The Company applied the guidance in SAB 118 when accounting for the enactment-date effects of the Tax Act in 2017 and throughout 2018. As of December 31, 2017, the Company had not completed the accounting for all of the enactment-date income tax effects of the Tax Act for the following aspects: (1) remeasurement of deferred tax assets and liabilities due to the reduced U.S. federal corporate rate; (2) deemed repatriation transition tax; and (3) global intangible low-tax income ("GILTI"). As of December 31, 2018, the Company had completed the accounting for all the enactment-date income tax effects of the Tax Act. As discussed further below, during the year ended December 31, 2018, the Company recognized adjustments of \$0.8 million to the preliminary provisional amount recorded at December 31, 2017, and included these adjustments as a component of income tax expense.

Reduction of U.S. federal corporate rate: The Tax Act reduced the corporate tax rate to 21 percent, effective January 1, 2018. The Company had recorded a provisional decrease of \$23.7 million to its net deferred tax liabilities, with a corresponding net adjustment to deferred income tax expense. Upon refinement of the calculation during the year ended December 31, 2018, the Company increased the provisional adjustment by \$0.8 million to \$24.5 million, which was included as a component of income tax expense.

Deemed Repatriation Transition Tax: The Deemed Repatriation Transition Tax ("Transition Tax") is a tax on previously untaxed accumulated and current earnings and profits ("E&P") of certain foreign subsidiaries. To determine the amount of the Transition Tax, the Company must determine, in addition to other factors, the amount of post-1986 E&P of the relevant subsidiaries, as well as the amount of non-U.S. income taxes paid on such earnings. After further analysis, the Company concluded that its Transition Tax was zero based on the aggregate post-1986 foreign earnings and profits deficit of the relevant subsidiaries. Therefore, there was no change from the initial estimate as of December 31, 2017.

Global intangible low taxed income: The Tax Act creates a new requirement that certain income (*i.e.* GILTI) earned by controlled foreign corporations ("CFCs") must be included currently in the gross income of the CFCs' U.S. shareholder. GILTI is the excess of the shareholder's "net CFC tested income" over the net deemed tangible income return, which is currently defined as the excess of (1) ten percent of the aggregate of the U.S. shareholder's pro rata share of the qualified business asset investment of each CFC with respect to which it is a U.S. shareholder over (2) the amount of certain interest expense taken into account in the determination of net CFC-tested income.

Under GAAP, the Company is allowed to make an accounting policy choice of either (1) treating taxes due on future U.S. inclusions in taxable income related to GILTI as current-period expense when incurred (the "period cost method") or (2) factoring such amounts into a company's measurement of its deferred taxes (the "deferred method"). The Company has elected to account for GILTI as a period cost. Accordingly, this income has been included as a component of current income tax expense for the years ended December 31, 2019 and 2018.

As a result of the Tax Act, historical earnings in certain foreign subsidiaries became subject to the U.S. Transition Tax, as described above. However, an actual repatriation from these subsidiaries could be subject to additional foreign and U.S. state income taxes. In general, it is the Company's practice and intention to reinvest certain earnings of its non-U.S. subsidiaries in those operations. The Company has analyzed its global working capital and cash requirements and the potential tax liabilities attributable to repatriation of earnings, and has determined not to change its prior assertion. The Company does not have significant prior year untaxed, undistributed earnings from its foreign operations at December 31, 2019, and the Company does not provide for, nor expect to incur, any significant, additional taxes which could become payable upon repatriation of such amounts.

Note 15. Financial Instruments and Fair Value Measurements

Certain assets and liabilities are required to be recorded at fair value on a recurring basis, while other assets and liabilities are recorded at fair value on a nonrecurring basis, generally as a result of acquisitions or impairment charges. Fair value is determined based on the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. GAAP also classifies the inputs used to measure fair value into the following hierarchy:

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability.
- Level 3: Unobservable inputs for the asset or liability. There were no Level 3 recurring measurements of assets or liabilities as of December 31, 2019.

Interest Rate Swaps

The Company currently holds two interest rate swap contracts designated as cash flow hedges, as the purpose is to reduce the variability of cash flows from interest payments related to a portion of Quad's variable-rate debt. The swaps effectively convert the notional value of the Company's variable rate debt based on one-month LIBOR to a fixed rate, including a spread on underlying debt, and a monthly reset in the variable interest rate. The key terms of the interest rate swaps are as follows:

	March 19, 2019 Interest Rate Swap	February 7, 2017 Interest Rate Swap
Effective date	March 29, 2019	February 28, 2017
Termination date	March 28, 2024	February 28, 2022
Term	5 years	5 years
Notional amount	\$130.0	\$250.0
Fixed swap rate	2.43%	1.89%

The Company classifies the interest rate swaps as Level 2 because the inputs into the valuation model are observable or can be derived or corroborated utilizing observable market data at commonly quoted intervals. The fair values of the interest rate swaps classified as Level 2 as of December 31, 2019 and 2018, were as follows:

	Balance Sheet Location	December 31, 2019 Decem			ecember 31, 2018		
Interest rate swap assets	Prepaid expenses and other current assets	\$	_	\$	4.3		
Interest rate swap liabilities	Other long-term liabilities		(6.4)		_		

The interest rate swaps were highly effective as of December 31, 2019. No amount of ineffectiveness has been recorded into earnings related to these cash flow hedges. The cash flows associated with the interest rate swaps have been recognized as an adjustment to interest expense in the consolidated statements of operations, and the changes in the fair value of the interest rate swaps have been included in other comprehensive loss in the consolidated statements of comprehensive income (loss):

	Ye	ar Ended December	· 31,
_	2019	2018	2017
Net interest paid (received) \$	0.8	\$ (0.2)	\$ 1.6
Gain (loss) recognized in other comprehensive income (loss)	(10.7)	2.2	2.1

Foreign Exchange Contracts

The Company has operations in countries that have transactions outside their functional currencies and periodically enters into foreign exchange contracts. These contracts are used to hedge the net exposures of changes in foreign currency exchange rates and are designated as either cash flow hedges or fair value hedges. Gains or losses on net foreign currency hedges are intended to offset losses or gains on the underlying net exposures in an effort to reduce the earnings volatility resulting from fluctuating foreign currency exchange rates. There were no open foreign currency exchange contracts as of December 31, 2019.

Natural Gas Forward Contracts

The Company periodically enters into natural gas forward purchase contracts to hedge against increases in commodity costs. The Company's commodity contracts qualified for the exception related to normal purchases and sales during the years ended December 31, 2019 and 2018, as the Company takes delivery in the normal course of business.

Debt

The Company measures fair value on its debt instruments using interest rates available to the Company for borrowings with similar terms and maturities and is categorized as Level 2. See Note 12, "Debt," for the fair value of the Company's debt as of December 31, 2019.

Nonrecurring Fair Value Measurements

In addition to assets and liabilities that are recorded at fair value on a recurring basis, the Company is required to record certain assets and liabilities at fair value on a nonrecurring basis, generally as a result of acquisitions or the remeasurement of assets resulting in impairment charges. See Note 3, "Acquisitions and Strategic Investments," for further discussion on acquisitions. See Note 4, "Discontinued Operations"; Note 5, "Restructuring, Impairment and Transaction-Related Charges"; Note 6, "Goodwill and Other Intangible Assets"; and Note 9, "Property, Plant and Equipment" for further discussion on impairment charges recorded as a result of the remeasurement of certain long-lived assets.

Other Estimated Fair Value Measurements

The Company records the fair value of its forward contracts and pension plan assets on a recurring basis. The fair value of cash and cash equivalents, receivables, inventories, restricted cash, accounts payable and other current liabilities approximate their carrying values as of December 31, 2019 and 2018. See Note 16, "Employee Retirement Plans," for the details of Level 1 and Level 2 inputs related to employee retirement plans.

Note 16. Employee Retirement Plans

Defined Contribution Plans

The Quad/Graphics, Inc. Diversified Plan is comprised of participant-directed 401(k) contributions, Company match and profit sharing contributions, with total participant assets of \$2.1 billion as of December 31, 2019. Company 401(k) matching contributions were \$15.4 million, \$8.5 million and \$7.2 million for the years ended December 31, 2019, 2018 and 2017, respectively. The ESOP holds profit sharing contributions of Company stock, which are made at the discretion of the Company's Board of Directors. On February 16, 2018, the Company's Board of Directors authorized the issuance of 1,006,061 shares of Company class A common stock from treasury to the Company's ESOP, at a stock price of \$22.18 per share for a total value of \$22.3 million. There were no profit sharing contributions for the years ended December 31, 2019.

Defined Benefit Plans

The Company assumed various funded and unfunded frozen pension plans for a portion of its full-time employees in the United States as part of the acquisition of World Color Press in 2010. Benefits are generally based upon years of service and compensation. These plans are funded in conformity with the applicable government regulations. The Company funds at least the minimum amount required for all qualified plans using actuarial cost methods and assumptions acceptable under government regulations.

The components of net pension income for the years ended December 31, 2019, 2018 and 2017, were as follows:

	Pension Benefits						
		2019		2018		2017	
Interest cost	\$	(17.5)	\$	(16.0)	\$	(17.3)	
Expected return on plan assets		23.5		28.4		27.7	
Net periodic benefit income		6.0		12.4		10.4	
Settlement charge		_		_		(0.8)	
Net pension income.	\$	6.0	\$	12.4	\$	9.6	

The underfunded pension obligations are calculated using generally accepted actuarial methods and are measured annually as of December 31. The following table provides a reconciliation of the projected benefit obligation, fair value of plan assets and the funded status of the pension plans as of December 31, 2019 and 2018:

	Pension	Benefits
	2019	2018
Changes in benefit obligation		
Projected benefit obligation, beginning of year	\$ (476.4)	\$ (538.9)
Interest cost.	(17.5)	(16.0)
Actuarial gain (loss)	(64.6)	34.2
Benefits paid	42.8	44.3
Projected benefit obligation, end of year	(515.7)	(476.4)
Changes in plan assets		
Fair value of plan assets, beginning of year	393.8	454.8
Actual return (loss) on plan assets	80.0	(23.7)
Employer contributions	5.8	7.0
Benefits paid	(42.8)	(44.3)
Fair value of plan assets, end of year	436.8	393.8
Funded status	\$ (78.9)	\$ (82.6)

Amounts recognized on the consolidated balance sheets as of December 31, 2019 and 2018, were as follows:

	Pension	Ben	efits
	2019		2018
Current liabilities	\$ (1.8)	\$	(1.7)
Noncurrent liabilities	(77.1)		(80.9)
Total amount recognized	\$ (78.9)	\$	(82.6)

The following table provides a reconciliation of the Company's accumulated other comprehensive loss prior to any deferred tax effects at December 31, 2019 and 2018:

	 uarial Gain / Loss), net
Balance at January 1, 2018	\$ (15.2)
Amount arising during the period	(18.1)
Balance at December 31, 2018.	(33.3)
Amount arising during the period	 (8.1)
Balance at December 31, 2019.	\$ (41.4)

On July 1, 2017, the Company provided the option to receive a lump-sum pension payment to a select group of terminated vested participants. Total lump sum payments of \$21.4 million were paid during 2017, of which \$8.4 million was paid in October 2017 under the lump-sum program. During 2017, the Company settled \$23.3 million of pension liabilities for \$21.4 million of pension payments.

Payments to eligible participants who elected to receive a lump-sum pension payment were funded from existing pension plan assets and constituted a settlement of the Company's pension liabilities with respect to these participants. As a result of the lump-sums paid to participants, non-cash settlement charges of \$0.8 million were recognized during the year ended December 31, 2017. These charges resulted from the recognition in earnings of a portion of the actuarial losses recorded in accumulated other comprehensive loss based on the proportion of the obligation settled.

Actuarial gains and losses in excess of 10% of the greater of the projected benefit obligation or the marketrelated value of plan assets are recognized as a component of net periodic benefit costs over the average remaining service period of a plan's active employees. Unrecognized prior service costs or credits are also recognized as a component of net periodic benefit cost over the average remaining service period of a plan's active employees. No amortization of amounts in accumulated other comprehensive loss is expected to be recognized as a component of net periodic pension income in 2020.

The weighted average assumptions used to determine net periodic benefit costs for the years ended December 31, 2019, 2018 and 2017, were as follows:

	Pe	nsion Benefits	
_	2019	2018	2017
Discount rate	4.22%	3.52%	3.91%
Expected long-term return on plan assets	6.25%	6.50%	6.50%

The weighted average assumptions used to determine pension benefit obligations at December 31, 2019 and 2018, were as follows:

	Pension B	enefits
	2019	2018
Discount rate (end of year rate)	3.20%	4.22%

The Company determines its assumed discount rate based on an index of high-quality corporate bond yields and matched-funding yield curve analysis as of the measurement date.

Estimated Company Contributions and Benefit Payments

In 2020, the Company expects to make cash contributions of \$11.1 million to its qualified defined benefit pension plans and expects to make estimated benefit payments of \$1.9 million to its non-qualified defined benefit pension plans. The actual pension contributions may differ based on the funding calculations, and the Company may choose to make additional discretionary contributions. The estimated benefit payments may differ based on actual experience.

Estimated Future Benefit Payments by the Plans to or on Behalf of Plan Participants

An estimate of the Plans' present value of future benefit payments to be made from funded qualified plans and unfunded non-qualified plans to plan participants at December 31, 2019, were as follows:

	Future Pension Benefit Payments
2020	\$ 39.4
2021	38.1
2022	37.0
2023	35.6
2024	34.7
2025 – 2029	158.4
Thereafter	172.5
Total	\$ 515.7

Plan Assets and Investment Strategy

The Company follows a disciplined investment strategy, which provides diversification of investments by asset class, foreign currency, sector and company. The Pension Committee has an approved investment policy for the pension plan that establishes long-term asset mix targets based on several factors including the following: the funded status, historical returns achieved by worldwide investment markets, the time horizon of the pension plan's obligations, and the investment risk. An allocation range by asset class is developed whereby a mix of equity securities and debt securities are used to provide an appropriate risk-adjusted long-term return on plan assets. Third-party investment managers are employed to invest assets in both passively-indexed and actively-managed strategies and investment returns and risks are monitored on an ongoing basis. Derivatives are used at certain times to hedge foreign currency exposure. Gains or losses on the derivatives are offset by a corresponding change in the value of the hedged assets. Derivatives are strictly used for hedging purposes and not speculative purposes.

The current target allocations for plan assets on a weighted average basis are 30% equity securities and 70% debt securities, including cash and cash equivalents. The actual asset allocation as of December 31, 2019, and as of December 31, 2018, was approximately 30% equity securities and 70% debt securities. Equity investments are diversified by country, issuer and industry sector. Debt securities primarily consist of government bonds and corporate bonds from diversified industries.

The expected long-term rate of return on assets assumption is selected by first identifying the expected range of long-term rates of return for each major asset class. Expected long-term rates of return are developed based on long-term historical averages, current expectations of future returns and anticipated inflation rates. The expected long-term rate of return on plan assets is then calculated by weighting each asset class.

The fair values of the Company's pension plan assets at December 31, 2019 and 2018, by asset category were as follows:

	December 31, 2019								December 31, 2018							
Asset Category	,	Total	Le	vel 1	L	evel 2	L	evel 3	,	Total	Le	vel 1	L	evel 2	Lev	vel 3
Cash and cash equivalents	\$	1.9	\$	1.9	\$		\$	_	\$	2.7	\$	2.7	\$	_	\$	
Debt securities		118.0		—		118.0		—		113.9		_		113.9		—
Equity securities		27.0		—		27.0		—		26.4		_		26.4		_
Total pension plan assets, excluding those measured at net asset value ("NAV") Investments measured at NAV ⁽¹⁾ Total pension plan assets	\$	146.9 289.9 436.8	\$	1.9	\$	145.0	\$	_	\$	143.0 250.8 393.8	\$	2.7	\$	140.3	\$	_

(1) These investments consist of privately placed funds that are valued based on NAV. NAV of the funds is based on the fair value of each fund's underlying investments. In accordance with ASC Subtopic 820-10, certain investments that are measured at fair value using the NAV per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy.

There were no Level 3 assets as of December 31, 2019 and 2018. See Note 15, "Financial Instruments and Fair Value Measurements," for definitions of fair value levels.

The Company segregated its plan assets by the following major categories and levels for determining their fair value as of December 31, 2019:

Cash and cash equivalents. Carrying value approximates fair value and these assets are classified as Level 1.

Debt Securities. This category consists of bonds, short-term fixed income securities and fixed income pooled funds fair valued based on a compilation of primarily observable market information or broker quotes in over-the-counter markets and are classified as Level 2.

Equity Securities. This category consists of equity pooled funds that are classified as Level 2 in the fair value hierarchy. Level 2 assets are valued using quoted prices in markets that are not active, broker dealer quotations, and other methods by which all significant input was observable at the measurement date.

The valuation methodologies described above may generate a fair value calculation that may not be indicative of net realizable value or future fair values. While the Company believes the valuation methodologies used are appropriate, the use of different methodologies or assumptions in calculating fair value could result in different amounts. The Company invests in various assets in which valuation is determined by NAV. The Company believes that NAV is representative of fair value at the reporting date, as there are no significant restrictions on redemption on these investments or other reasons to indicate that the investment would be redeemed at an amount different than NAV.

The fair value measurements in common/collective trusts, calculated using a NAV and their redemption restrictions, for the years ended December 31, 2019 and 2018, are as follows:

]	Fair V	alue		Redemption Frequency (If	Redemption Notice Period	
	2019			2018	Currently Eligible)		
JP Morgan Chase Bank Strategic Property Fund	\$	12.6	\$	18.0	Quarterly	30 days	
Pyramis Long Corporate A or Better		93.3		78.6	Daily	15 days	
Pyramis Long Duration		92.2		79.2	Daily	15 days	
Russell 3000 Index NL		91.8		75.0	Daily	1 day	
Total value of investments measured at NAV	\$ 2	89.9	\$	250.8			

Risk Management

For all directly invested funds, the concentration risk is monitored through specific guidelines in the investment manager mandates. The investment manager mandates were developed by the Company's external investment advisor, and specify diversification standards such as the maximum exposure per issuer, and concentration limits per type of security, industry and country when applicable.

For the investments made through pooled funds, the investment mandates of the funds were again reviewed by the Company's external investment advisor, to determine that the investment objectives and guidelines were consistent with the Company's overall pension plan risk management objectives. In managing the plan assets, management reviews and manages risk associated with funded status risk, interest rate risk, market risk, counterparty risk, liquidity risk and operational risk. Liability management and asset class diversification are central to the Company's risk management approach and are integral to the overall investment strategy.

Given the process in place to ensure a proper diversification of the portfolio, management believes that the Company pension plan assets are not exposed to significant concentration risk.

Multiemployer Pension Plans

The Company has previously participated in a number of MEPPs under terms of collective bargaining agreements that cover a number of its employees. The risks of participating in these MEPPs are different from single employer plans in the following aspects:

- Assets contributed to the MEPPs by one company may be used to provide benefits to employees of other participating companies.
- If a participating company stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating companies.
- If the Company stops participating in some or all of its MEPPs, and continues in business, the Company would be required to pay an amount, referred to as a withdrawal liability, based on the unfunded status of the plan.

The Company has withdrawn from all significant MEPPs and replaced these union sponsored "promise to pay in the future" defined benefit plans with a Company sponsored "pay as you go" defined contribution plan. The two MEPPs, the GCIU and GCC, are significantly underfunded, and will require the Company to pay a withdrawal liability to fund its pro rata share of the underfunding as of the plan year the full withdrawal was completed. As a result of the decision to withdraw, the Company accrued the estimated withdrawal liability based on information provided by each plan's trustee, as part of the purchase price allocation for World Color Press.

The GCIU Plan is a defined benefit plan that provides retirement benefits, total and permanent disability benefits, and pre-retirement death benefits for the participating union employees of the Company. The funded status of the GCIU Plan is classified as critical and declining based on the GCIU Plan's 2019 certification to the United States Department of Labor, as the funded percentage for the plan is less than 65%, and the plan is projected to become insolvent in 2029. As a result, the GCIU Plan implemented a rehabilitation plan to improve the plan's funded status.

The Company recorded a \$32.1 million increase to the MEPPs withdrawal liability during the year ended December 31, 2018, which was a result of unfavorable rulings following litigation with the GCIU trustees, and was recorded in restructuring, impairment and transaction-related charges in the consolidated statements of operations.

In 2019, the Company and the GCIU reached a settlement agreement for all claims, with scheduled payments until April 2032.

The GCC Plan is a defined benefit plan that provides retirement benefits, disability benefits, and early retirement benefits for the participating union employees of the Company. The funded status of the GCC Plan is classified as critical and declining based on the GCC Plan's 2019 certification to the United States Department of Labor, as the funded percentage for the plan is less than 65%, and the plan is projected to become insolvent by 2023. As a result, the GCC Plan implemented a rehabilitation plan to improve the plan's funded status.

In 2016, the Company and the GCC reached a settlement agreement for all claims, with scheduled payments until February 2024.

The Company made payments totaling \$10.4 million, \$13.1 million and \$24.0 million for the years ended December 31, 2019, 2018 and 2017, respectively. The Company has reserved \$44.1 million as its estimate of the total MEPPs withdrawal liability as of December 31, 2019, of which \$35.7 million was recorded in other long-term liabilities and \$8.4 million was recorded in other current liabilities in the consolidated balance sheets.

Note 17. Earnings (Loss) Per Share Attributable to Quad Common Shareholders

Basic earnings (loss) per share attributable to Quad common shareholders is computed as net earnings (loss) attributable to Quad common shareholders, divided by the basic weighted average common shares outstanding. The calculation of diluted earnings (loss) per share attributable to Quad common shareholders includes the effect of any dilutive equity incentive instruments. The Company uses the treasury stock method to calculate the effect of outstanding dilutive equity incentive instruments, which requires the Company to compute total proceeds as the sum of the amount the employee must pay upon exercise of the award and the amount of unearned stock-based compensation costs attributed to future services.

Equity incentive instruments for which the total employee proceeds from exercise exceed the average fair value of the same equity incentive instrument over the period have an anti-dilutive effect on earnings per share during periods with net earnings, and accordingly, the Company excludes them from the calculation. Due to the net loss incurred during the year ended December 31, 2019, the assumed exercise of all equity incentive instruments was anti-dilutive and therefore, not included in the diluted loss per share calculation. Anti-dilutive equity incentive instruments of 0.5 million and 0.7 million of class A common shares were excluded from the computations of diluted net earnings per share for the years ended December 31, 2018 and 2017, respectively.

Reconciliations of the numerator and the denominator of the basic and diluted per share computations for the Company's common stock for the years ended December 31, 2019, 2018 and 2017, are summarized as follows:

		2019		2018	2017		
Numerator:							
Net earnings (loss) from continuing operations		(55.7)	\$	29.9	\$	118.1	
Less: net loss attributable to noncontrolling interests				(0.6)			
Net earnings (loss) from continuing operations attributable to Quad common shareholders		(55.7)		30.5		118.1	
Loss from discontinued operations, net of tax		(100.6)		(22.0)		(10.9)	
Net earnings (loss) attributable to Quad common shareholders	\$	(156.3)	\$	8.5	\$	107.2	
Denominator:							
Basic weighted average number of common shares outstanding for all classes of common stock.		50.0		49.8		49.6	
Plus: effect of dilutive equity incentive instruments		—		1.8		2.2	
Diluted weighted average number of common shares outstanding for all classes of common shares		50.0		51.6		51.8	
Earnings per share attributable to Quad common shareholders:							
Basic:							
Continuing operations	\$	(1.11)	\$	0.61	\$	2.38

Cash dividends paid per common share for all classes of common shares	\$	1.05	\$	1.20	\$	1.20	

Note 18. Equity Incentive Programs

The shareholders of the Company approved the Quad/Graphics, Inc. 2010 Omnibus Incentive Plan ("Omnibus Plan") for two complementary purposes: (1) to attract and retain outstanding individuals to serve as directors, officers and employees; and (2) to increase shareholder value. In May 2019, an additional 1,800,000 shares were approved for issuance, providing for an aggregate 12,671,652 shares of class A stock reserved for issuance under the Omnibus Plan. Awards under the Omnibus Plan may consist of incentive awards, stock options, stock appreciation rights, performance shares, performance share units, shares of class A stock, restricted stock ("RS"), restricted stock units ("RSU"), deferred stock units ("DSU") or other stock-based awards as determined by the Company's Board of Directors. Each stock option granted has an exercise price of no less than 100% of the fair market value of the class A stock on the date of grant. As of December 31, 2019, there were 1,682,404 shares available for issuance under the Omnibus Plan. Authorized but unissued shares of the Company's class A stock or treasury shares of its class A common stock or issue shares of class A common stock to meet the stock requirements of its awards in the future.

The Company recognizes compensation expense based on estimated grant date fair values for all share-based awards issued to employees and non-employee directors, including stock options, performance shares, performance share units, restricted stock, restricted stock units and deferred stock units. The Company recognizes these compensation costs for only those awards expected to vest, on a straight-line basis over the requisite three to four year service period of the awards, except DSU awards, which are fully vested and expensed on the grant date. The Company estimated the number of awards expected to vest based, in part, on historical forfeiture rates and also based on management's expectations of employee turnover within the specific employee groups receiving each type of award. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods, if actual forfeitures differ from those estimates.

Equity Incentive Compensation Expense

The total compensation expense recognized related to all equity incentive programs was \$13.6 million, \$15.6 million and \$16.4 million for the years ended December 31, 2019, 2018 and 2017, respectively, and was recorded primarily in selling, general and administrative expenses in the consolidated statements of operations. Total stock-based compensation expense included income of \$1.1 million recognized for liability awards that are remeasured on a quarterly basis during the year ended December 31, 2019. Total future compensation expense related to all equity incentive programs granted as of December 31, 2019, is estimated to be \$15.8 million, which consists entirely of expense for RS and RSU awards. Estimated future compensation expense is \$9.8 million for 2020, \$5.3 million for 2021 and \$0.7 million for 2022.

Stock Options

Options vest over four years, with no vesting in the first year and one-third vesting upon the second, third and fourth anniversary dates. As defined in the individual grant agreements, acceleration of vesting may occur under a change in control, death, disability or normal retirement of the grantee. Options expire no later than the tenth anniversary of the grant date, 24 months after termination for death, 36 months after termination for normal retirement or disability and 90 days after termination of employment for any other reason. Options are not credited with dividend declarations, except for the November 18, 2011 grants. Stock options are only to be granted to employees.

There were no stock options granted during the years ended December 31, 2019, 2018 and 2017. There was no compensation expense recognized related to stock options for the years ended December 31, 2019, 2018 and 2017. There is no future compensation expense for stock options granted as of December 31, 2019. The following table is a summary of the stock option activity for the year ended December 31, 2019:

	Shares Under Option	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	In	gregate trinsic Value tillions)
Outstanding and exercisable at December 31, 2018	942,315	\$ 24.31	1.8	\$	_
Granted	—				
Exercised	_	—			
Canceled/forfeited/expired	(152,078)	19.35			
Outstanding and exercisable at December 31, 2019	790,237	\$ 25.27	1.1	\$	

The intrinsic value of options outstanding and exercisable as of December 31, 2019 and 2018, was based on the fair value of the stock price. All outstanding options are vested as of December 31, 2019. The following table is a summary of the stock option exercises and vesting activity for the years ended December 31, 2019, 2018 and 2017:

	2019	2018	2017
Total intrinsic value of stock options exercised	\$ —	\$ 3.7	\$ 1.7
Proceeds from stock options exercised	_	4.2	2.6
Total grant date fair value of stock options vested	_	_	_

Restricted Stock and Restricted Stock Units

Restricted stock and restricted stock unit awards consist of shares or the rights to shares of the Company's class A stock which are awarded to employees of the Company. The awards are restricted such that they are subject to substantial risk of forfeiture and to restrictions on their sale or other transfer by the employee. RSU awards are typically granted to eligible employees outside of the United States. As defined in the individual grant agreements, acceleration of vesting may occur under a change in control, death, disability or normal retirement of the grantee. Grantees receiving RS grants are able to exercise full voting rights and receive full credit for dividends during the vesting period. All such dividends will be paid to the RS grantee within 45 days of full vesting. Grantees receiving RSUs are not entitled to vote but do earn dividends. Upon vesting, RSUs will be settled either through cash payment equal to the fair market value of the RSUs on the vesting date or through issuance of Company class A stock.

		Rest	ricted Stoc	k	Restricted Stock Units								
	Shares	Weighted- Average Grant Date Fair Value Per Share		Weighted- Average Remaining Contractual Term (Years)	Units	Av Gra Fai	ighted- verage int Date r Value r Share	Weighted- Average Remaining Contractual Term (Years)					
Nonvested at December 31, 2018.	2,335,916	\$	17.36	1.0	107,092	\$	16.70	0.8					
Granted	1,503,344		12.31		186,807		12.33						
Vested	(1,118,071)		9.46		(58,187)		9.51						
Forfeited	(97,218)		17.72		(5,091)		26.88						
Nonvested at December 31, 2019.	2,623,971	\$	17.82	1.5	230,621	\$	14.75	1.9					

The following table is a summary of RS and RSU award activity for the year ended December 31, 2019:

In the first quarter of 2019, the Company issued RSU awards in connection with the acquisition of Periscope that are accounted for as liability awards that will vest on March 1, 2022. The awards were recorded at fair value on the initial issuance date and are remeasured to fair value at each reporting period, with the change in fair value being recorded in selling, general and administrative expense in the consolidated statements of operations. The change in fair value of the awards classified as liabilities resulted in income of \$1.1 million for the year ended December 31, 2019. As of December 31, 2019, the fair value of the RSU awards classified as liabilities was \$0.6 million and was included in other long-term liabilities on the consolidated balance sheets.

In general, RS and RSU awards will vest on the third anniversary of the grant date, provided the holder of the share is continuously employed by the Company until the vesting date. Compensation expense recognized for RS and RSUs classified as equity was \$13.8 million, \$14.7 million and \$15.5 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Deferred Stock Units

Deferred stock units are awards of rights to shares of the Company's class A stock and are awarded to nonemployee directors of the Company. The following table is a summary of DSU award activity for the year ended December 31, 2019:

	Deferred Stock Units					
	Units	Ğr Fair	ted Average ant Date Value Per Share			
Outstanding at December 31, 2018	236,561	\$	19.40			
Granted	72,464		12.32			
Dividend equivalents granted	36,309		8.60			
Settled	(30,676)		22.53			
Outstanding at December 31, 2019	314,658	\$	16.22			

Each DSU award entitles the grantee to receive one share of class A stock upon the earlier of the separation date of the grantee or the second anniversary of the grant date, but could be subject to acceleration for a change in control, death or disability as defined in the individual DSU grant agreement. Grantees of DSU awards may not exercise voting rights, but are credited with dividend equivalents and those dividend equivalents will be converted into additional DSU awards based on the closing price of the class A stock. Compensation expense recognized for DSUs was \$0.9 million for each of the years ended December 31, 2019, 2018 and 2017. As DSU awards are fully vested on the grant date, all compensation expense was recognized at the date of grant.

Note 19. Shareholders' Equity

		Issued Common Stock							
	Authorized Shares	Outstanding	Treasury	Total Issued Shares					
Class A stock (\$0.025 par value)	105.0								
December 31, 2019		39.2	1.1	40.3

December 31, 2017		38.2	1.8	40.0					
Class B stock (\$0.025 par value)	80.0								
December 31, 2019		13.5	—	13.5					
December 31, 2018		13.5	_	13.5					
December 31, 2017		13.8	—	13.8					
Class C stock (\$0.025 par value)	20.0								
December 31, 2019		_	0.5	0.5					
December 31, 2018		_	0.5	0.5					
December 31, 2017		_	0.5	0.5					

The Company has three classes of common stock as follows (share data in millions):

In accordance with the Articles of Incorporation, each class A common share has one vote per share and each class B and class C common share has ten votes per share on all matters voted upon by the Company's shareholders. Liquidation rights are the same for all three classes of stock.

The Company also has 0.5 million shares of \$0.01 par value preferred stock authorized, of which none were issued at December 31, 2019, 2018 and 2017. The Company has no present plans to issue any preferred stock.

On May 20, 2019, the Company held its annual meeting of shareholders. At the meeting, the shareholders of the Company approved an amendment to the Company's Articles of Incorporation to increase the number of authorized shares of class A common stock from 80.0 million to 105.0 million, and a corresponding increase to the number of authorized shares of capital stock from 180.5 million to 205.5 million.

On September 6, 2011, the Company's Board of Directors authorized a share repurchase program of up to \$100.0 million of the Company's outstanding class A stock. On July 30, 2018, the Company's Board of Directors discontinued the remainder of the September 6, 2011 share repurchase program and authorized a new share repurchase program of up to \$100.0 million of the Company's outstanding class A stock. There were no shares of the Company's class A stock repurchased during the year ended December 31, 2019. During the year ended December 31, 2018, the Company repurchased 1,871,631 shares of its class A common stock at a weighted average price of \$19.59 per share for a total purchase price of \$36.7 million. During the year ended December 31, 2017, the Company repurchased 200,605 shares of its class A common stock at a weighted average price of \$18.89 per share for a total purchase price of \$3.8 million. As of December 31, 2019, there were \$100.0 million of authorized repurchases remaining under the program.

On February 16, 2018, the Company's Board of Directors authorized the issuance of 1,006,061 shares of Company class A common stock from treasury to the Company's ESOP, at a stock price of \$22.18 per share for a total value of \$22.3 million.

On October 13, 2017, the Company's Board of Directors authorized the cancellation of 1,027,907 shares of the Company's class B common stock held in the Company's treasury and returned the shares to the status of authorized, but unissued shares. In addition, all future acquired shares of the Company's class B common stock will be immediately canceled and returned to the status of authorized but unissued shares. During the year ended December 31, 2018, 284,845 shares of class B common stock were converted to class A common stock. The shares of class B common stock were canceled and returned to the status of authorized but unissued shares. There were no conversions of class B common stock during the year ended December 31, 2019.

In accordance with the Articles of Incorporation, dividends are paid equally for all three classes of common shares. The following table details the dividend activity related to the then outstanding shares of common stock for the years ended December 31, 2019, 2018 and 2017:

	Declaration Date	Record Date	Payment Date	Dividend Amount per Share			
2019							
Q4 Dividend	October 29, 2019	November 18, 2019	December 6, 2019	\$ 0.15			
Q3 Dividend	July 30, 2019	August 19, 2019	September 6, 2019	0.30			
Q2 Dividend	April 30, 2019	May 20, 2019	June 7, 2019	0.30

Note 21. Segment Information

Quad is a worldwide marketing solutions partner dedicated to creating a better way for its clients through a data-driven, integrated marketing platform that helps reduce complexity, increase efficiency and enhance marketing spend effectiveness. The Company's operating and reportable segments are aligned with how the chief operating decision maker of the Company currently manages the business. The Company's operating and reportable segments, including their product and service offerings, and a "Corporate" category are as follows:

- United States Print and Related Services
- International
- Corporate

United States Print and Related Services

The United States Print and Related Services segment is predominantly comprised of the Company's United States printing operations and is managed as one integrated platform. This includes retail inserts, publications, catalogs, special interest publications, journals, direct mail, directories, in-store marketing and promotion, packaging, newspapers, custom print products, other commercial and specialty printed products and global paper procurement, together with marketing and other complementary services, including consumer insights, audience targeting, personalization, media planning and placement, process optimization, campaign planning and creation, pre-media production, videography, photography, digital execution, print execution and logistics. This segment also includes the manufacture of ink.

International

The International segment consists of the Company's printing operations in Europe and Latin America, including operations in England, France, Germany, Poland, Argentina, Colombia, Mexico and Peru, as well as investments in printing operations in Brazil and India. This segment provides printed products and marketing and other complementary services consistent with the United States Print and Related Services segment. As of December 31, 2019, the Company has no unrestricted subsidiaries as defined in the Company's Senior Unsecured Notes indenture.

Corporate

Corporate consists of unallocated general and administrative activities and associated expenses including, in part, executive, legal and finance, as well as certain expenses and income from frozen employee retirement plans, such as pension benefit plans.

The following is a summary of segment information for the years ended December 31, 2019, 2018 and 2017:

	Net Sales		Operating Income		Depreciation and		Capital		Restructuring, Impairment and Transaction-		
	Products	S	ervices		(Loss)	Am	ortization	Expenditures		Relate	d Charges
Year ended December 31, 2019

Note 22. Geographic Area Information

The table below presents the Company's net sales and long-lived assets as of and for the years ended December 31, 2019, 2018 and 2017, by geographic region. The amounts in this table differ from the segment data presented in Note 21, "Segment Information," because each operating segment includes operations in multiple geographic regions, based on the Company's management reporting structure.

Note 23. Separate Financial Information of Subsidiary Guarantors of Indebtedness

On April 28, 2014, Quad completed an offering of the Senior Unsecured Notes (see Note 12, "Debt," for further details on the Senior Unsecured Notes). Each of the Company's Guarantor Subsidiaries fully and unconditionally guarantee or, in the case of future subsidiaries, will guarantee, on a joint and several basis, the Senior Unsecured Notes. All of the current Guarantor Subsidiaries are 100% owned by the Company. Guarantor Subsidiaries will be automatically released from these guarantees upon the occurrence of certain events, including the following:

- the designation of any of the Guarantor Subsidiaries as an unrestricted subsidiary;
- the release or discharge of any guarantee or indebtedness that resulted in the creation of the guarantee of the Senior Unsecured Notes by any of the Guarantor Subsidiaries; or
- the sale or disposition, including the sale of substantially all the assets, of any of the Guarantor Subsidiaries.

The following condensed consolidating financial information reflects the summarized financial information of Quad, the Company's Guarantor Subsidiaries on a combined basis and the Company's non-guarantor subsidiaries on a combined basis.

Note 24. New Accounting Pronouncements

In December 2019, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2019-12 "Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes" ("ASU 2019-12"), which enhances and simplifies various aspects of the income tax accounting guidance, including requirements such as tax basis step-up in goodwill obtained in a transaction that is not a business combination, ownership changes in investments, accounting for hybrid tax regimes, interim-period accounting for enacted changes in tax law and limitation of tax benefit on year-to-date losses. This guidance is effective for interim and annual periods beginning after December 15, 2020, with early adoption permitted. The Company is evaluating the impact of the adoption of ASU 2019-12 on the consolidated financial statements.

In August 2018, the FASB issued Accounting Standards Update 2018-15 "Intangibles—Goodwill and Other— Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract" ("ASU 2018-15"), which aligns the requirements for capitalizing implementation costs incurred in a cloud computing arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. This guidance is effective for interim and annual periods beginning after December 15, 2019, with early adoption permitted. Entities are allowed to apply either a retrospective or prospective transition approach to adopt the guidance. The Company has adopted this standard as of January 1, 2020, and the adoption of ASU 2018-15 did not have a material impact on the consolidated financial statements.

In August 2018, the FASB issued Accounting Standards Update 2018-14 "Compensation—Retirement Benefits —Defined Benefit Plans—General (Subtopic 715-20): Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plans" ("ASU 2018-14"), which adds, removes and clarifies year-end disclosure requirements related to defined benefit pension and other postretirement plans. This guidance is effective for annual periods ending after December 15, 2020, with early adoption permitted. This new guidance will require a retrospective adoption approach. The Company is evaluating the impact of the adoption of ASU 2018-14 on the notes to the consolidated financial statements.

In August 2018, the FASB issued Accounting Standards Update 2018-13 "Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement" ("ASU 2018-13"), which changes the requirements on fair value measurements by removing, modifying or adding certain disclosures. This guidance is effective for interim and annual periods beginning after December 15, 2019, with early adoption permitted. Entities electing to early adopt are permitted to early adopt the eliminated or modified disclosure requirements and delay the adoption of all the new disclosure requirements until their effective date. The adoption of ASU 2018-13 requires the application of a combination of the prospective and retrospective methods of transition, depending on the topic of disclosure. The Company has adopted this standard as of January 1, 2020, and the adoption of ASU 2018-13 did not have a material impact on the consolidated financial statements.

In June 2016, the FASB issued Accounting Standards Update 2016-13 "Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments" ("ASU 2016-13"), which changes the impairment model for most financial assets and certain other instruments. Under the new guidance, entities will be required to measure expected credit losses for financial instruments, including trade receivables, based on historical experience, current conditions and reasonable forecasts. This guidance is effective for interim and annual periods beginning after December 15, 2019, with early adoption permitted for interim and annual periods beginning after December 15, 2018. This new guidance will require a modified retrospective transition approach, where the entity will need to apply a cumulative-effect adjustment to retained earnings (accumulated deficit) as of the beginning of the first reporting period in which the guidance is adopted. The Company has adopted this standard as of January 1, 2020. The Company is in the final stages of calculating the transition adjustment, which is estimated to be an increase to the Company's allowance for credit losses between \$5.0 million and \$8.0 million, with no impact to the consolidated statements of operations.

Note 25. Subsequent Events

Sale of Omaha Packaging Plant

On January 31, 2020, the Company completed the sale of its Omaha, Nebraska packaging plant to Graphic Packaging International, a leading provider of packaging solutions, for \$41.3 million in cash, subject to final working capital adjustments. The divestiture allows the Company to focus on its other two packaging plants to provide high-value packaging solutions that help clients create a cohesive brand experience across all marketing solution channels. The cash proceeds were used to reduce debt obligations.

Declaration of Quarterly Dividend

On February 18, 2020, the Company declared a quarterly dividend of \$0.15 per share, which will be paid on March 9, 2020, to shareholders of record as of February 28, 2020.

[This page has been left blank intentionally.]

Item 9. <u>Changes in and Disagreements with Accountants on Accounting and Financial Disclosure</u>

Not applicable.

Item 9A. <u>Controls and Procedures</u>

Disclosure Controls and Procedures

The Company's management, with the participation of the Company's principal executive officer and principal financial officer, has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report and has concluded that, as of the end of such period, the Company's disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) that occurred during the fiscal quarter ended December 31, 2019, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

The Company's management, including the Company's Chairman, President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of published financial statements in accordance with generally accepted accounting principles.

The Company's management, including the Company's Chairman, President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, has assessed the effectiveness of the Company's internal control over financial reporting based on the framework in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. As allowed by SEC guidance, management excluded from its assessment the internal control over financial reporting at Periscope, which was acquired on January 3, 2019. The financial statements that were excluded from the assessment constitute approximately 3% of consolidated total current assets, approximately 1% of consolidated net sales and approximately 1% of consolidated cost of sales as of and for the year ended December 31, 2019. Based on this assessment, the Company's management has concluded that, as of December 31, 2019, the Company's internal control over financial reporting was effective based on that framework.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Deloitte & Touche LLP, the Company's independent registered public accounting firm, issued an audit report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2019, which is included herein.

Audit Report of Independent Registered Public Accounting Firm

The audit report required under this Item 9A, "Controls and Procedures," is contained in Item 8, "Financial Statements and Supplementary Data," of Part II of this Annual Report on Form 10-K under the heading "Report of Independent Registered Public Accounting Firm."

Item 9B. <u>Other Information</u>

The Company has no other information to report pursuant to this item.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item with respect to directors and Section 16 compliance is included under the captions "Election of Directors" and "Miscellaneous—Delinquent Section 16(a) Reports," respectively, in the Company's definitive Proxy Statement for its 2020 Annual Meeting of Shareholders ("Proxy Statement") and is hereby incorporated herein by reference. Information with respect to the executive officers of the Company appears in Part I, Item 1, "Business," of this Annual Report on Form 10-K. The information required by this Item with respect to audit committees and audit committee financial experts is included under the caption "Corporate Governance—Board Committees" in the Proxy Statement and is incorporated herein by reference.

The Company has adopted a Code of Business Conduct that applies to all of the Company's employees, including the Company's Chief Executive Officer, Chief Financial Officer, Controller and other persons performing similar functions. The Company has posted a copy of the Code of Business Conduct on its website at <u>www.QUAD.com</u>, and such Code of Business Conduct is available in print, without charge, to any shareholder who requests it from the Company's Secretary. The Company intends to satisfy the disclosure requirements under Item 5.05 of Form 8-K regarding amendments to, or waivers from, the Code of Business Conduct by posting such information on its website at <u>www.QUAD.com</u>. The Company is not including the information contained on its website as part of, or incorporating it by reference into, this Annual Report on Form 10-K.

Item 11. <u>Executive Compensation</u>

The information required by this Item is included under the captions "Compensation of Executive Officers," "Director Compensation," "Compensation Committee Report," "Corporate Governance—Board Committees— Compensation Committee Interlocks and Insider Participation," "Miscellaneous—Assessment of Compensation-Related Risk," and "CEO Pay Ratio" in the Proxy Statement and is hereby incorporated herein by reference.

Item 12. <u>Security Ownership of Certain Beneficial Owners and Management and Related Stockholder</u> <u>Matters</u>

The information required by this Item with respect to security ownership of certain beneficial owners and management is included under the caption "Stock Ownership of Management and Others" in the Proxy Statement and is hereby incorporated by reference.

Equity Compensation Plan Information

The following table sets forth information with respect to compensation plans under which equity securities of the Company are authorized for issuance as of December 31, 2019. The table does not include employee benefit plans intended to meet the qualification requirements of Section 401(a) of the Internal Revenue Code. All equity compensation plans are described more fully in Note 18, "Equity Incentive Programs," to the consolidated financial statements in Part II, Item 8, "Financial Statements and Supplementary Data," of this Annual Report on Form 10-K.

Plan Category	Number of securities to be issued upon the exercise of outstanding options, warrants and rights	exei outsta	ghted average rcise price of inding options, nts and rights ⁽²⁾	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in the first column)
Equity compensation plans approved by security holders ⁽¹⁾	3,959,487	\$	25.27	1,682,404
Equity compensation plans not approved by security holders	_			_
Total	3,959,487	\$	25.27	1,682,404

(1) Consists of the Company's 2010 Omnibus Incentive Plan. Awards under the Omnibus Plan may consist of incentive awards, stock options, stock appreciation rights, performance shares, performance share units, shares of class A stock, restricted stock, restricted stock units, deferred stock units or other stock-based awards as determined by the Company's Board of Directors.

(2) The weighted average exercise price of outstanding options, warrants and rights only includes stock options.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is included under the caption "Corporate Governance" in the Proxy Statement and is hereby incorporated by reference.

Item 14. **Principal Accountant Fees and Services**

The information required by this Item is included under the caption "Miscellaneous-Independent Registered Public Accounting Firm" in the Proxy Statement and is hereby incorporated by reference.

PART IV

Item 15. <u>Exhibit Index and Financial Statement Schedules</u>

- 1. Consolidated financial statements—The consolidated financial statements listed in the accompanying index to consolidated financial statements are filed as part of this Annual Report on Form 10-K.
- 2. Financial statement schedule—All financial statement schedules are omitted since the required information is not present or is not present in amounts sufficient to require submission of the schedules, or because the information required is included in the consolidated financial statements and notes thereto.
- 3. Exhibits—The exhibits listed in the accompanying "Exhibit Index" are filed as part of this Annual Report on Form 10-K.
