

Junior Camp/Quad Illness Policy

For the health and safety of all children in our care, we are temporarily changing our illness policy due to COVID-19. Please keep your child home in the event of illness. We recommend that you arrange back-up care prior to needing it.

- Anyone age 5 and older will be required to wear a mask on Quad property. Masks shall cover the nose and mouth snugly & completely, be disposed of or washed daily. Mask fees may be assessed if children do not bring one.
- If an individual has a fever, cough, or shortness of breath and has not been around anyone who has been diagnosed with COVID-19, they should stay home and away from others until 72 hours after the fever is gone and symptoms get better.
- If we have a confirmed case of COVID-19, the classroom in which the child attended would be closed for 14 days, all children and staff in that classroom would need to self-quarantine for 14 days.
- Since the center is unable to provide the one-on-one care a sick child requires, in addition to our concern for the health and wellness of other children; we require that the child be removed from the center within the hour.
- Return to the center may require medical clearance. However, the center may require that in addition to a return to care slip, the minimum policy guidelines found below must also be met.

Subject to change depending on the CDC, DCF or Quad's regulations or policies.

A child must be excluded from the center if displaying the following symptoms:	A child may return to the center when the following has been met:
A temperature of 100.4° or higher	When the child is fever-free for 72 hours <u>without the aid of a fever reducer such as Tylenol, Ibuprofen etc.</u>
Three incidents of diarrhea within a day or <u>24 hour period</u>	When the child is free of diarrhea for 72 hours and has returned to a normal diet.
Vomiting	When the child is free of vomiting for 72 hours and has returned to a normal diet
Inflammation of, or discharge from the eye	The child with eye infections &/or discharge may return after 72 hours of antibiotic treatment <u>and</u> symptoms have improved. This includes but is not limited to pink eye/conjunctivitis.
An unusual rash	The policy for returning after a rash depends on the cause of the rash.
Any known or <u>suspected</u> communicable disease (measles, chicken pox, pink eye, lice, ringworm or roseola)	The policy for returning depends on the communicable disease. See Wisconsin communicable disease guidelines for child care centers for more information.
